Version History

Version	Primary Author(s)	Description of Version	Date Completed
5.1	Northrop Grumman Information Systems	New Release	2/27/2012
5.0	Northrop Grumman Information Systems	Established the non-UII GFP tables, non-UII GFP feed, and the 5.0.2 schema to enter non-UII GFP. No change to document	1/2/2012
4.3.1	Northrop Grumman Information Systems	Added Disposal activities text to Life Cycle Event section.	10/20/2011
4.3	Northrop Grumman Information Systems	New Release	4/25/2011
4.2.1	Northrop Grumman Information Systems	Minor Edits	8/13/2010
4.2	Northrop Grumman Information Systems	New Release	6/28/2010
4.1	Northrop Grumman Information Systems	Update Index	12/29/2009
4.1	Northrop Grumman Information Systems	New Release	9/28/2009
4.0	Northrop Grumman Information Systems	Added Part Number Rollover functionality Added Acquisition Contract Number Type field Query selection change—end items or end items and embedded items. Added new Warranty API Added S/A/C Mark to Mark Query options. Type Designation Mark Value and Vessel Class Mark Value made upper case	1/28/2009
3.4.2.1	Northrop Grumman Information Technology	CO#: 0094-08-- change customer service help desk phone number and email address Replaced Figures 5-35 and 5-36 Added text to Section 5.3.3 Added text to Section 5.3.3.2 Added PIPC to Acronym list Added text to Warranty explanation	6/10/2008
3.4.2	Northrop Grumman Information Technology	New Release	6/30/2008

Version	Primary Author(s)	Description of Version	Date Completed
3.4.1 revised	Northrop Grumman Information Technology	Minor edits to document—replaced Fig. 5-6, removed hyphens from DUNS text.	1/11/2008
3.4.1	Northrop Grumman Information Technology	Update for new contract requirements.	11/9/2007
3.4	Northrop Grumman Information Technology	New Release	6/22/2007

1. SCOPE

1.1 Identification

This Software User Manual (SUM) is for the Item Unique Identification (IUID) Registry, Version 5.1.

1.2 System Overview

This section describes the IUID Registry system, including background, description, users, and overview of benefits.

1.2.1 Background

The DoD IUID policy was created through a series of memoranda issued beginning on July 29, 2003 by the Acting Under Secretary of Defense, Acquisition, Technology & Logistics (AT&L). This policy requires all items delivered to the DoD with a unit acquisition value of \$5,000 or more, or that are serially managed, controlled inventory, mission critical or otherwise designated to be marked with a UII. The IUID policy is mandatory for all DoD contracts that require the delivery of items, including those for other agencies and foreign customers.

The IUID Registry was developed as a data input tool to meet the needs of the IUID policy. IUID is a system of distinguishing one object from another, allowing DoD to track identical items individually throughout their lifecycles. With IUID, DoD can consistently capture the value of the items it buys, control these items during their use, and combat counterfeiting parts. IUID is a business imperative for DoD which had been without a universal method for parts identification.

The IUID Registry is the central repository for IUID information and serves as an acquisition gateway to identify: What the item is, how and when it was acquired, the initial value of the item, current custody, and how it is marked. As IUID has grown, even more item information has been captured in the registry, such as Special Tooling or Special Test Equipment, Condition, and Life Cycle Events. In release 5.0 the IUID Registry created the capability to record non-UII GFP via several automated feeds and direct submission. In 5.1 the IUID Registry gave the web users the ability to review and add Condition Codes to the non-UII GFP.

1.2.2 What is the IUID Registry system?

IUID is a Web entry point that receives and maintains data from authorized submitters of manufacturer item data disallowing duplication and cross contamination. IUID provides an online registration process to validate user registrations within three business days of receipt and single sign-on access to the registry system for varying levels of access. IUID also provides an ad hoc reporting system by permitting authorized users to select elements and values from a predefined report pick list and allows authorized users to select values and elements individually or in combination that provide the optimum accountability and visibility of government owned equipment located at various contractor sites.

IUID is a searchable database with public and controlled access views. The public access view can be used to verify that a record exists for a Unique Item Identifier (UII) Code or Enterprise Identifier and Serial number, or Mark. Part Number and Batch/Lot can also be included in a public

Search. The controlled access view contains IUID records. In the controlled access area, there are four types of users: Contractors, Legacy Submitters, Defense Contract Management Agency (DCMA) Access, and Inquiry.

Information passes to and from the users through IUID Web, IUID Feed, and IUID API. This feeds the IUID Database. Reports are run using the IUID Scheduled Reports Utility.

IUID receives XML transactions from GEX via SSL. These transactions are sent from GEX, and then a response is generated by IUIDFeed that indicates if the transaction was successful or not. This is the source of the majority of the IUID information.

1.2.3 Who Are IUID Users?

Specific DoD components and other government offices using IUID include:

- Contractors add, view and update all data within the database that is associated with their contracts.
- Legacy submitters provide data on legacy items.
- DCMA users may read all query data and reports.
- Inquiry users have read only access to the entire IUID database.
- The public access users verify that a record exists for a Unique Item Identifier (UII) Code or Enterprise Identifier and Serial number, or Mark.
- Approved government systems may view all IUID Registry data, active and inactive.

1.2.4 IUID Application Benefits

The benefits of the IUID Registry are as follows:

- Allows DoD agencies to keep track of each item they use throughout the lifecycle of the item.
- Provides DoD with a universal method of parts identification.
- Enhances the quality of information available to government agencies.
- Enables joint paperless management of DoD property.

1.3 Document Overview

This manual provides information and instructions for using IUID. The acronyms used in this SUM are defined in [Appendix A](#). Explanations for the data entry fields can be found in [Appendix B](#). Appendix B can be printed and used as an easy reference for users. An index can be found in [Appendix C](#).

Screen prints of each of the IUID Web pages are shown and described in sections four and five of the SUM. Underlined text within the printed SUM may indicate a hyperlink for on-screen viewing which when activated jumps to the indicated location in the SUM. Use the Microsoft Word back

arrow button,  to return to the original text area. The Table of Contents is interactive when viewing the document on-screen. Use the Microsoft Word back arrow button to return to the Table of Contents.

2. REFERENCED DOCUMENTS

The following documents have been utilized for reference or content in various areas of the IUID SUM:

- Department of Defense (DoD) Directive 5230.25 – Withholding of Unclassified Technical Data from Public Disclosure.
- IUID_Registry_Requirements_v5.1_schema_v5.0.1 7-12-11.docx
- IUID Design Summary Final 10-28-2011.docx

3. SOFTWARE SUMMARY

The following is a summary of the IUID application and the computer software necessary to use it.

3.1 Software Application

The IUID system allows users to verify IUID records, perform inquiries, add and update IUID database records, and generate reports depending on the users' level of authority.

3.2 Minimum Access Requirements

The Web pages and Web-based applications hosted by the BPN Network require a minimum Web browser of Microsoft Internet Explorer 6.0 or higher or any other Web browser compatible with these standards.

The browser must have 128-bit encryption. Encryption is the ability of the browser to scramble the contents of a Web site so that no one else can see the information being entered. The Web applications need 128-bit encryption to operate properly.

In addition, some Web pages and Web-based applications hosted by the BPN Network require the web browser to support JavaScript and to accept session-based cookies. By default, the major Web browsers are configured to handle this requirement.

3.3 Software Organization and Overview of Operation

- a. A Web browser able to access the internet is the only software component required at the user location.
- b. Response time is the length of time required by the computer to return the results. This time depends on two factors: processing time and network time. Processing time is the amount of time required for the computer to process the transaction. The workstation computer and server will both have an effect on response time. Network time is the length of time required to send the user's request to the BPNSE server and return the results to the user's workstation. This time will vary depending on the type and current utilization of the physical connection.
- c. Supervisory controls are explained in Section 4, Access to IUID.

3.4 Contingencies and Alternate States and Modes of Operation

None.

3.5 Security and Privacy Considerations

Distribution of information from IUID is limited to authorized government agencies and contractors. IUID maintains a C2 level of security in accordance with Defense Logistics Agency Regulation (DLAR) 5200.17, which requires that users be individually accountable for their update actions through logon procedures with user identifications (user name) and passwords, auditing of security-relevant events, and resource isolation.

A time-out feature is in place that automatically terminates a session of IUID after an inactive period of 15 minutes. All data from the current operation is lost when the time-out feature terminates a session.

3.6 Assistance and Problem Reporting

If you have questions regarding policy changes, please contact Customer Service at iuid.helpdesk@bpn.gov or by telephone at 269-961-4745.

4. ACCESS TO IUID

This document assumes that the user is familiar with the basic functions and operations (i.e., powering up, navigation, etc.) of the personal computer or workstation from which IUID is being accessed. In addition, this document is written with the assumption that the user has an understanding of the functions and commands of the browser being used to access the IUID Web site.

4.1 First-Time Users

New users should go to the IUID Registry home page, <https://www.bpn.gov/iuid/>, select Controlled Access, and then select Register. See [Section 5.3.2](#) for registration and password information in the IUID controlled access area. No password is necessary for IUID Public Access. A practice site is provided at <https://www.bpn.gov/iuid/>. Separate registration is required for the production and practice IUID registries.

4.1.1 Equipment Familiarization

Personal computers at various locations have different monitors, keyboards, etc. This manual assumes that users are familiar with the types of equipment being used.

- a. Normal power-up procedures should be followed for powering up the personal computer or workstation.
- b. While the IUID Web site may be displayed on any size monitor, optimum performance and viewing will be achieved with a monitor resolution of 800 x 600 or greater on a 17" or larger monitor with color settings at high color (16 bit). If the text displayed on the

- screen appears to be too small or large, or the color of the text seems unusual, consult the browser documentation or set the browser font and color settings to the default settings.
- c. The appearance and use of the cursor are governed by the type of computer platform that is being used and the options selected for that specific workstation. Standard operating procedures for using the cursor on the workstation should be followed.
 - d. Placing the mouse pointer on any active navigation tab, link, or button and clicking once will activate the relevant page. The Tab key may be used for navigation through text-entry fields, most buttons, and links. When using the Tab key to navigate to a button or link, press the Enter key to select that action. Shift-Tab will reverse the direction and allow return to a previously selected field, button, or link.
 - e. There is no special sequence associated with IUID for powering down the system. After following the application log off procedure, the standard power down procedures for the particular workstation should be followed.

4.1.2 Access Control

There are no access and security features of the software that are visible to the user for the Public Access section of the IUID Web site. However, a user name and password are necessary for the use of the Controlled Access function. Within the Controlled Access section, there are four levels of security: Contractors, Legacy Submitters, Defense Contract Management Agency (DCMA) users, and Inquiry. See [Section 5.3.2](#) for further information.

4.2 Initiating a Session

After launching the Web browser, enter the IUID URL in the location bar, <https://www.bpn.gov/iuid/>. The IUID home page is displayed similar to Figure 4-1.

Figure 4 - 1. IUID Home Page

There are ten links on the IUID home page: Defense Procurement and Acquisition Policy – Unique Identification (UID), DoD Guide to Uniquely Identifying Items, Program Manager Planning Roadmap, Help, User Manual, Documents, E-Gov, Please Read this Notice, Handicapped Accessible, and BPNSE.

- a. The first link under the action buttons is a link to the Defense Procurement and Acquisition Policy – Unique Identification (UID) Web site.
- b. The second link accesses the Department of Defense Guide to Uniquely Identifying Items v2.0 online document.
- c. The third link accesses the Program Manager Planning Roadmap for Implementing Item Unique Identification (IUID) online document.
- d. “**Help**” is a link to the IUID Web Help page.
- e. “**User Manual**” is a link to the IUID Software User Manual in PDF format.
- f. The Documents link accesses the Documents page that contains a list of documents relating to the IUID application and links to get there.
- g. “**E-Gov**” is a link to egov.gov, the official Web site of the President’s Expanding Electronic Government initiative.
- h. “Please Read This Notice” is a link to the federal legal statement page.
- i. “Handicapped Accessible” links to the Section 508 of the Rehabilitation Act Web Accessible notice.
- j. “BPNSE” is a link to the BPNSE Web site, the single source for vendor data for the Federal Government.

Announcements and other links may appear on this page on an as needed basis. To begin a session of IUID, select either Public Access or Controlled Access.

4.3 Stopping and Suspending Work

To stop a session, close the browser or navigate to another Web site. When logged in to the controlled access section of IUID, select the logout link at the bottom of each page to log out and return to the login page, and then close the browser or go to another Web site.

5. PROCESSING REFERENCE GUIDE

5.1 Capabilities

IUID is an application with a Public Access view and a Controlled Access view. Public Access can be used to verify that a record exists and retrieve a limited set of data for a UII Code or Enterprise Identifier, Serial Number and optionally Part number or Batch/Lot, or Mark.

In the controlled access area, there are four types of users: Contractors, Legacy, DCMA, and Inquiry.

- Contractors may input, update, correct, and query item data that is associated with their Prime Contract Identifier or Custody Contract. A user is only "related" to an item's UII

when one of their provided user CAGE Code or DUNS numbers is given as the Prime Contractor Identifier in the Acquisition Contract section or if one of the CAGE or DUNS is listed as the Custodial Contractor in the Custody Section (if applicable). In addition, contractors can correct, update, query, and view reports for any UID that they originally entered via user ID and any record of which they have custody through a DoDAAC related to the user's CAGE or DUNS.

- Legacy submitters provide data on legacy items. Legacy Items are items acquired under contracts issued prior to 1 January 2004 and are still in government inventory. Legacy users may add items, update and add events to existing items, and correct any item they entered.
- DCMA users may read all query data and reports.
- Inquiry users can view all data in the IUID Registry.

Reports can also be generated depending on the user's level of access.

5.2 Conventions

The following characteristics of the system remain consistent between applications, pages, and reports.

- IUID incorporates security conventions such as user names and passwords. See [Section 5.3.2](#) for user name and password information for the Controlled Access Users.
- IUID is equipped with alt-text help that automatically displays when the mouse cursor is rolled over and hovered on an item with a text entry field. More detailed information is displayed when the mouse cursor is rolled over the field titles. Figure 5-1 shows an example of alt text.

The screenshot shows a data entry form with several fields. The 'Acceptance Date' field has a calendar icon and the text '(Format: MM-DD-YYYY)'. The 'Acceptance Location Code' field is highlighted with a yellow background, and a tooltip is displayed over it. The tooltip text reads: 'DoDAAC of the Government entity that accepted the item. Required from Vendors for new procurement; not required when reporting legacy items.' The 'Currency Code' field is set to 'United States of America dollar (\$) (USD 840)'. The 'Unit of Measure' field is set to 'EA'.

Figure 5 - 1. IUID Help Alt Text

- On data-entry pages, an asterisk (*) next to a field means that it is required. A cross (†) designates this field as conditionally required based on a previous selection. (‡) designates one of multiple fields is required. These and other symbols are used to designate fields as necessary.
- All data for the record currently being worked on is lost when the time-out feature terminates a user's session after a 15-minute period of inactivity.

- e. IUID screens contain a menu icon in the upper left-hand corner that when activated displays the menu options available from that screen. Figure 5-2 shows the menu available from the IUID Home page.

Figure 5 - 2. Menu Button

- f. Clicking on the **Home** button returns the user to the [IUID Home page](#) as shown in [Figure 4-1](#).
- g. Clicking on the **Help** button opens the IUID help application.
- h. Clicking on the **User Manual** button opens the IUID Software User Manual in PDF format.
- i. Clicking the **Menu** button returns the user to the IUID Main Menu page.
- j. Clicking the **Logout** button returns the user to the Login page as shown in [Figure 5-15](#).
- k. Calendar selection icons, , are used on several pages in IUID. Clicking on this icon opens the calendar as shown in Figure 5-3.

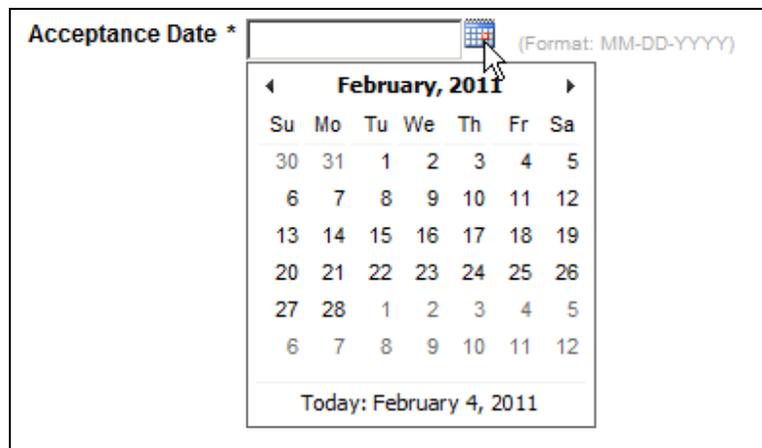

Figure 5 - 3. Calendar Displayed

- Click on the date in the calendar. The date is entered in the date field. The date can also be typed into the field in the proper format, MM-DD-YYYY.
1. **Cancel** or **Quit** buttons can be used to cancel processing in IUID and return to the previous page. If there is a risk of losing data when the Cancel button is selected, a dialog box is displayed as shown in Figure 5-4.

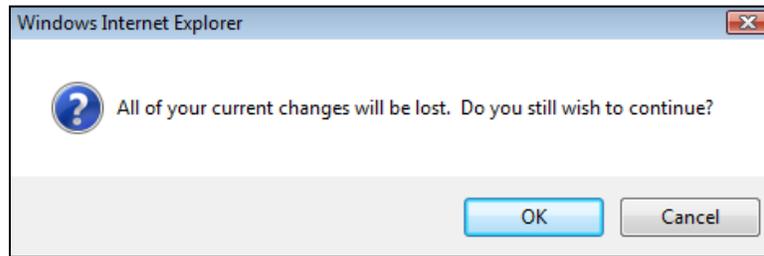

Figure 5 - 4. Cancel Button Dialog Box

- When **OK** is selected, all entered data for this item is lost and the Menu page is displayed. Clicking **Cancel** on the dialog box returns the user to the page Cancel was selected from.
- m. Click on the **Finish** button to complete an addition, update, or correction to a record.
 - n. The **Documents** link at the bottom of the IUID pages accesses the Documents page. The Documents page contains links to documents with information about the IUID application similar to Figure 5-5.

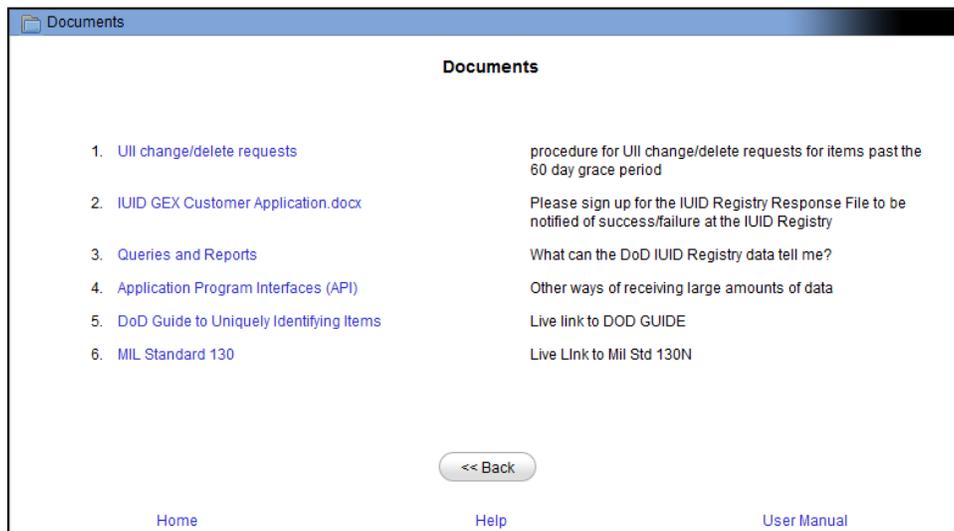

Figure 5 - 5. Documents Page

- o. The **Save as** feature for Reports and Queries saves results as Microsoft Excel Spreadsheets.
- p. User access information can be viewed from Controlled Access IUID. Click on the user type link in the lower right corner of the page to display the Information for User Type page similar to Figure 5-6.

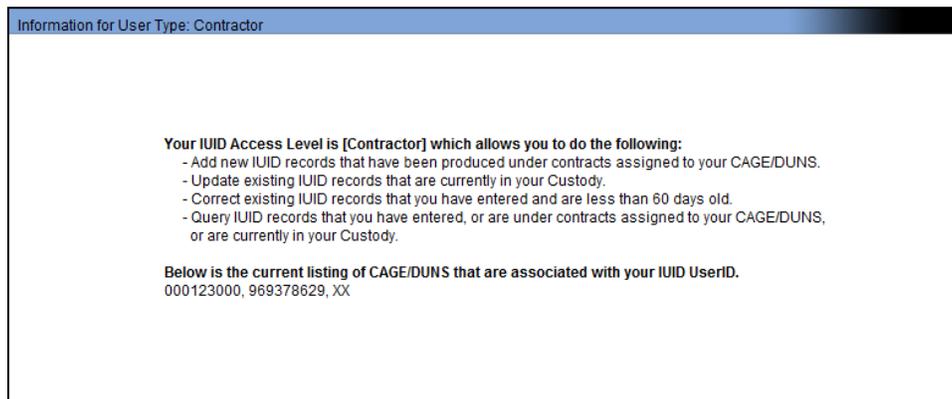

Figure 5 - 6. Information for User Type page

Note that the information for the contractor user type includes a listing of CAGE Codes and DUNS numbers that are associated with the user's IUID user ID.

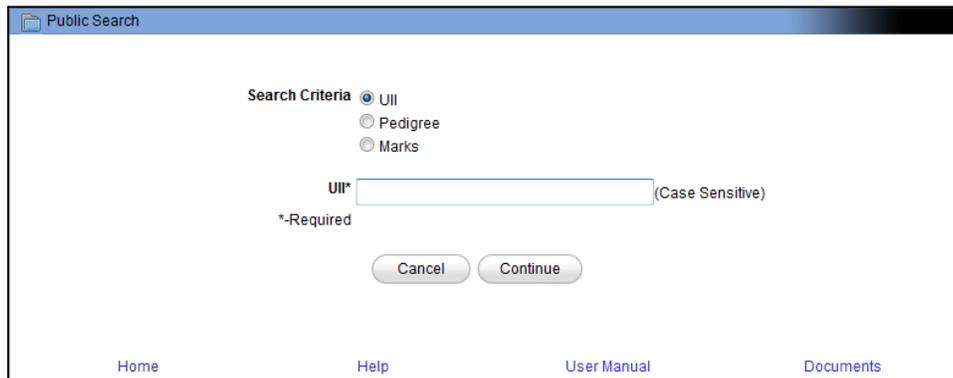

5.3 Processing Procedures

This section describes the procedures for using IUID. Procedures for use of IUID are described in Section 5.3.1 through Section 5.3.7.

- | | |
|---------------------------|---|
| 5.3.1 – Public Access | 5.3.5 – DCMA User |
| 5.3.2 – Controlled Access | 5.3.6 – Inquiry User |
| 5.3.3 – Contractor | 5.3.7 – Application Program Interface (API) |
| 5.3.4 – Legacy User | |

5.3.1 Public Access

The Public Access function of IUID can be used to verify that a record exists for a UII Code or Enterprise Identifier and Part Number. The typical public access user is anyone who wants to know whether their UII was entered in the system, for example, an XML feed participant who does not see on the screen that the UII has been recorded. No user name or password is necessary. Click on the Public Access button on the IUID Home page to display the Public Search page as shown in Figure 5-7.

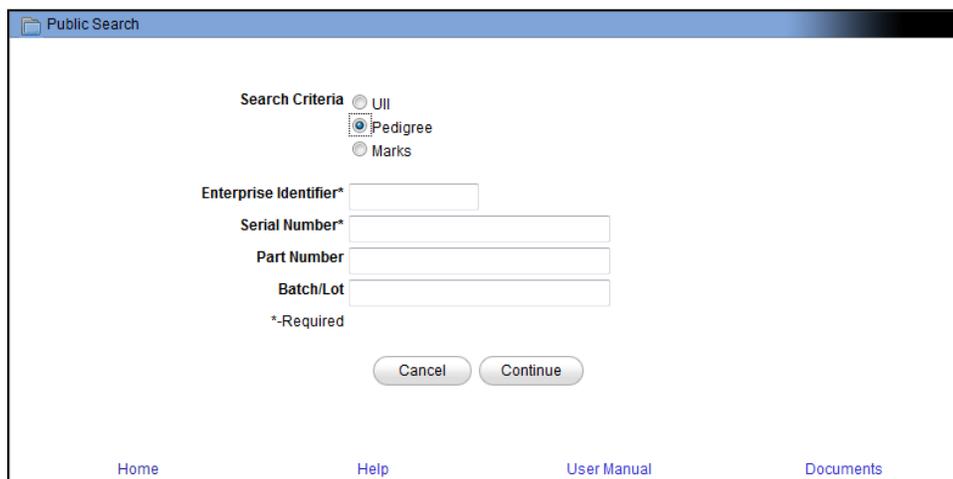

The screenshot shows a web browser window titled "Public Search". Under the heading "Search Criteria", there are three radio buttons: "UII" (which is selected), "Pedigree", and "Marks". Below this, there is a text input field labeled "UII*" with "(Case Sensitive)" to its right. A note below the field states "*-Required". At the bottom of the form are two buttons: "Cancel" and "Continue". At the very bottom of the page are four links: "Home", "Help", "User Manual", and "Documents".

Figure 5 - 7. IUID Public Search Page

Select search criteria: UII, Pedigree, or Marks. **UII** is selected by default and displays the UII field. Note that the UII is case sensitive.

When **Pedigree** is selected, the Search panel is displayed similar to Figure 5-8.

The screenshot shows the "Public Search" window with "Pedigree" selected under "Search Criteria". Below the radio buttons, there are four text input fields: "Enterprise Identifier*", "Serial Number*", "Part Number", and "Batch/Lot". A note below the fields states "*-Required". At the bottom of the form are two buttons: "Cancel" and "Continue". At the very bottom of the page are four links: "Home", "Help", "User Manual", and "Documents".

Figure 5 - 8. Public Search - Pedigree

Enterprise Identifier and Serial Number are required. Part Number and Batch/Lot may also be entered. The Enterprise Identifier is the code identifying the Enterprise that assigned the item with the IUID data elements.

When **Marks** is selected as the Search Criteria, the Search panel is displayed similar to Figure 5-9.

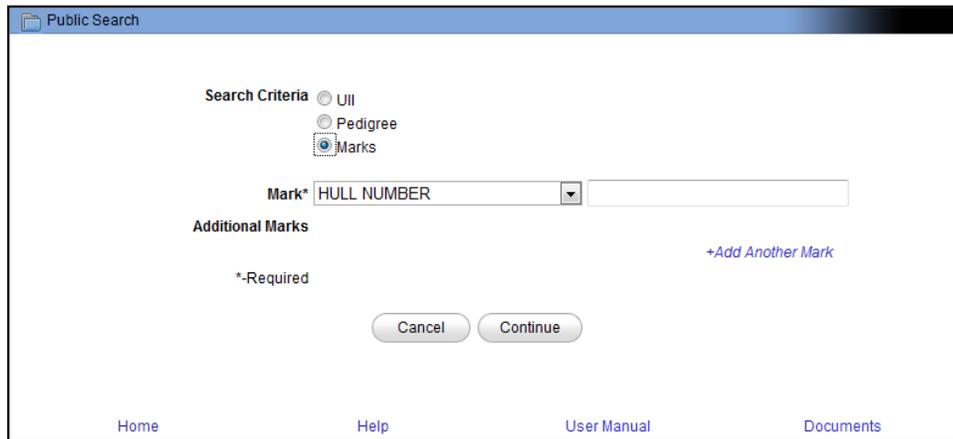

Figure 5 - 9. Public Search - Marks

The query checks against active marks only. Select a Mark content from the drop-down list. Options are Hull Number, Internal Asset Number, Property Control Number, Serial Number, Tail Number, USA Number, USAF Number, and USN Number. To search on more than one mark, click the Add another Mark link. An Additional Marks field is added to the screen similar to Figure 5-10.

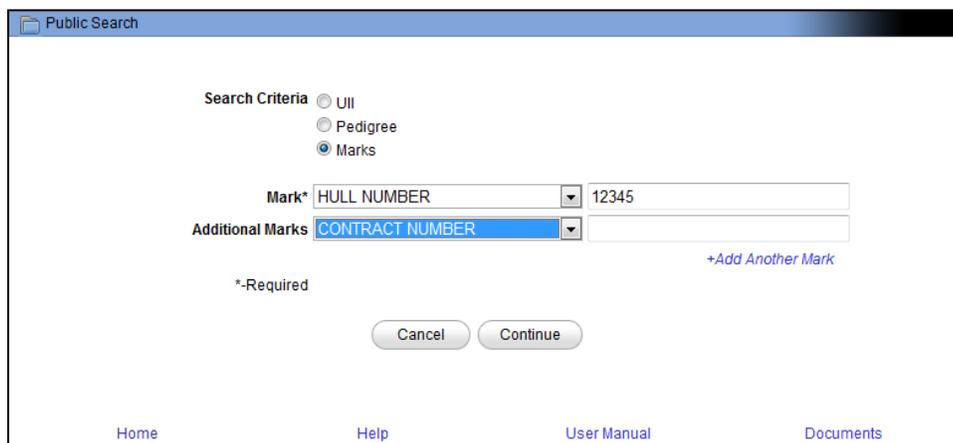

Figure 5 - 10. Additional Mark Field

More Options are added to the content field now to select from. In addition to the above options, select from Contract Number, Date of Manufacture, FAA Certification, GAP UID, Item Nomenclature, Lot Number, Manufacturer CAGE, Manufacturer Name, National Stock Number, Part Number, Service/Agency/Command, Supplier Name, Type Designation, UID, and Vessel Class.

When satisfied with entries of search criteria, click on the **Continue** button. The Public Search result page is displayed as shown in Figure 5-11.

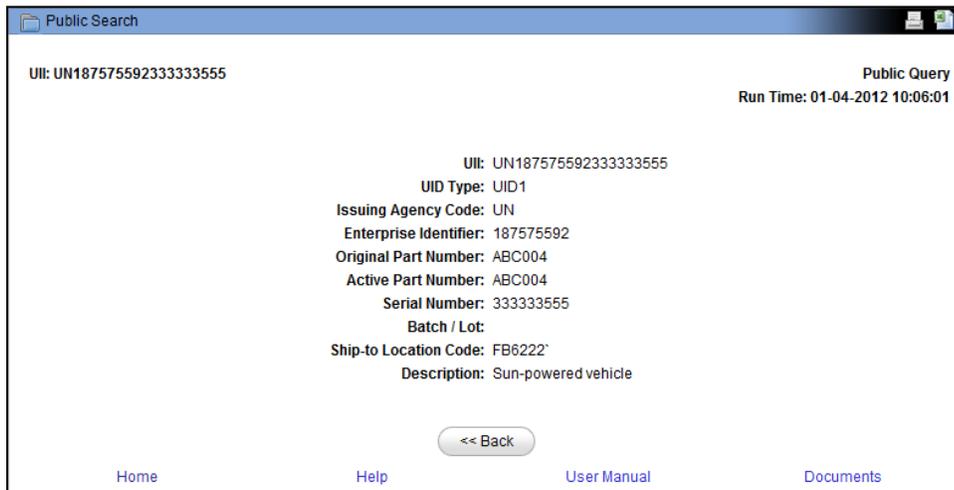

Figure 5 - 11. IUID Public Search Result

If no matching records are found, a message is displayed on the Public Search Page similar to Figure 5-12.

Figure 5 - 12. No Records Found Message

If multiple items match your search criteria, a message is displayed similar to Figure 5-13.

Figure 5 - 13. Multiple Results Found

Click the **Back** button to return to the Public Search query page and add more criteria to refine your search.

5.3.2 Controlled Access

There are four types of access in the Controlled access area: Contractor, Legacy, DCMA, and Inquiry.

- a. Contractors must be registered in CCR first. Contractors can add new IUID records that have been produced under contracts assigned to their CAGE or DUNS. Registered contractors have access to data for new items produced under contracts assigned to their CAGE and DUNS based on the Acquisition Prime Contractor Identifier. They also have access to items actively in their custody as government furnished property (GFP) based on the GFP Prime Contract Identifier. In addition, contractors have access to all Correction, Update, Queries, and Reports pages for any UID that they originally entered via user ID.

If a contractor has custody of GFP items whose Acquisition Prime Contractor Identifier identifies a different contractor, then the custodial contractor has access to all data entered by them as well as the following descriptive data:

- Pedigree data minus Acquisition Cost
- Custody data for which they are the prime
- Active Mark data
- Part Number changes minus Acquisition Value
- Active Parent/Child data

Note: Custodial Contractors cannot see acquisition cost of original item if they are not the acquisition prime contractor.

Users with Contractor Access have 60 days to correct data submitted to the Registry via Web entry or via direct-file through GEX.

- b. Legacy submitters are those users who are providing data on legacy items. Users with this access are able to read all data. They have the ability to update any item record or sub-record. They are able to make corrections (for 60 days from submission date) only to those item records and sub-records that they entered using the Web interface.
- c. Users with DCMA access approved by Defense Contract Management Agency (DCMA) headquarters may read all data elements.
- d. The IUID Registry provides a generic view for government users. These are the Controlled Access Inquiry users. Users with this access have read only access to the entire IUID database.

Click on the **Controlled Access** button. The first page displayed is the DoD Disclaimer page as shown in Figure 5-14.

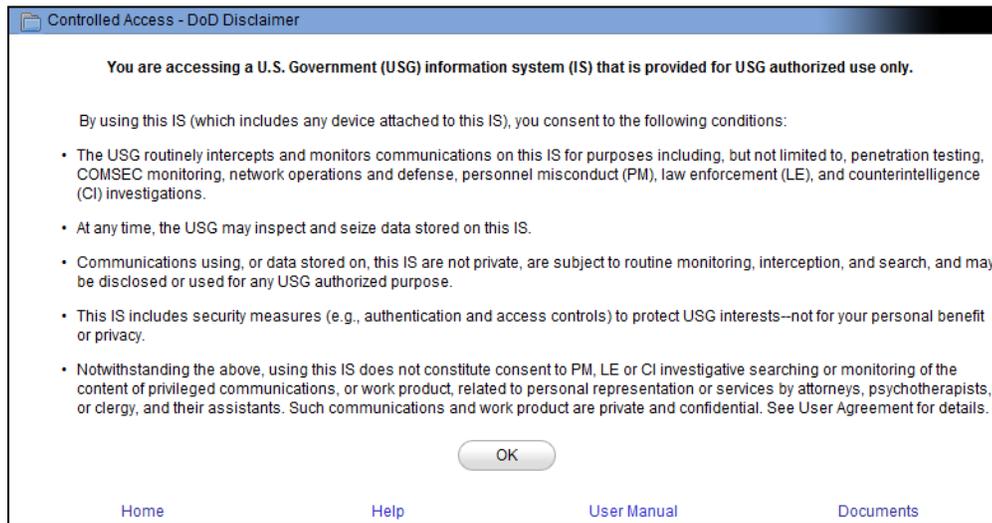

Figure 5 - 14. Controlled Access – DoD Disclaimer

Review the conditions for using a U.S. Government information system. Click **OK** to signify your consent to these conditions. The Login page is displayed as shown in Figure 5-15.

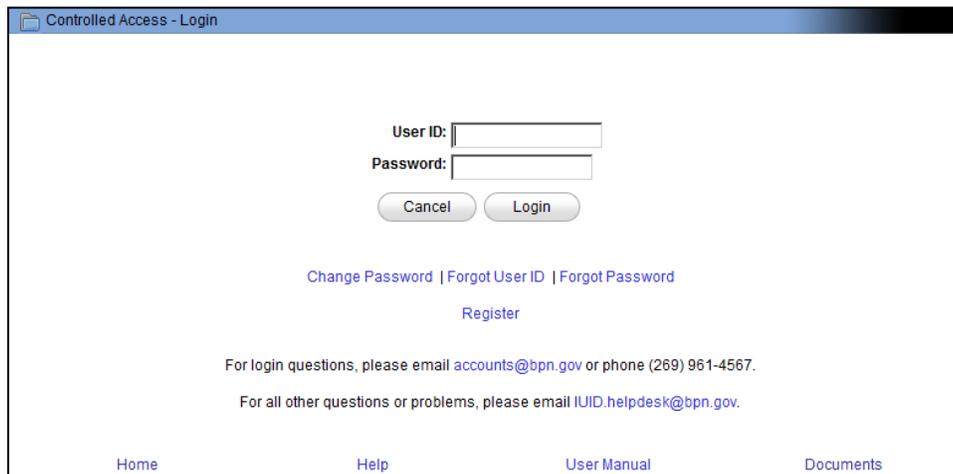

Figure 5 - 15. Login Page

Links on this page are Change Password, Forgot User ID, Forgot Password, Register, BPN Accounts email link for login questions, IUID Helpdesk link for other questions or problems, Home, Help, User Manual, and Documents. Change Password, Forgot User ID, Forgot Password, and Register are discussed in [Sections 5.3.2.1](#) and [5.3.2.2](#). See [Section 5.2](#) for Home, Help, and User Manual.

Click on the accounts@bpn.gov email link or call (269)961-4567 to contact BPN Support if you have questions or need assistance with log in. For all other questions or problems, click on IUID.helpdesk@bpn.gov.

Controlled Access

Log in by entering your User ID and Password on the login page. Click the **Login** button. The IUID Main Menu page is displayed for the Contractor as shown in [Figure 5-22](#), and the Legacy user as shown in [Figure 5-136](#). The DCMA user's Main Menu page is shown in [Figure 5-152](#), and the Inquiry user's Main Menu page is shown in [Figure 5-153](#).

The authentication process disables a user account if a user enters a password incorrectly more than three times in a row. The user can use Forgot Password to unlock it. For further assistance, the user may contact accounts@bpn.gov or (269)961-4567.

Forgot User ID

When Forgot User ID is selected, a Change Password Redirect dialog box is displayed. Click **Continue** to open the BPN Portal Forgot User ID page. Enter your Email address and click the **Next** button. A list of User IDs associated with your email address will be emailed to you.

Forgot Password

When Forgot Password is selected, a Change Password Redirect dialog box is displayed. Click **Continue** to open the BPN Portal Reset Password page. Enter your User ID and Email Address and click the **Next** button. You will be asked to answer security questions to prove your identity. When you have answered three of five questions successfully, you will then be able to [reset your password](#). See Change Password, [Section 5.3.2.2](#).

5.3.2.1 Requesting Access

Users must register through the BPNSE Registration System (BRS) to use IUID. To register, click on the **Register** link. The Item UID Registration Instructions page is displayed as shown in Figure 5-16.

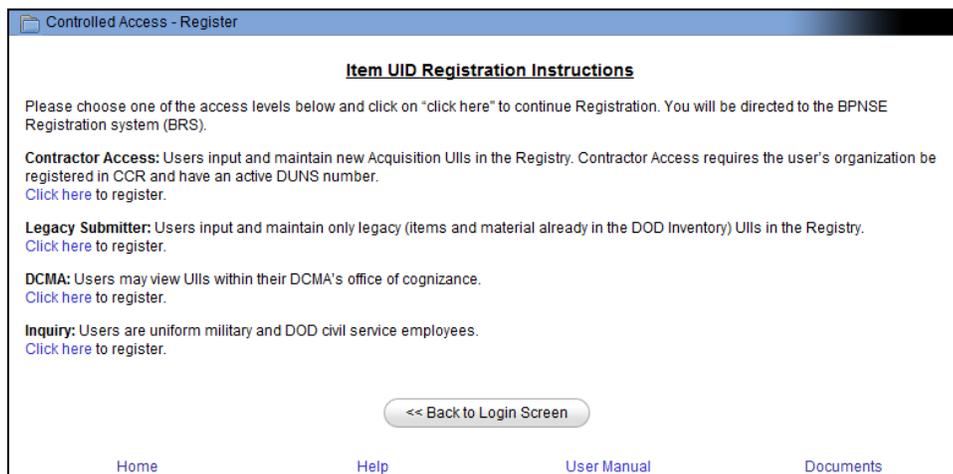

Figure 5 - 16. Item UID Registration Instructions Page

There are registration instructions for the four different users of IUID: Contractor, Legacy Submitter, Defense Contract Management Agency (DCMA), and Inquiry. Choose an access level and select the **Click here** link to access the BRS Web site as shown in Figure 5-17.

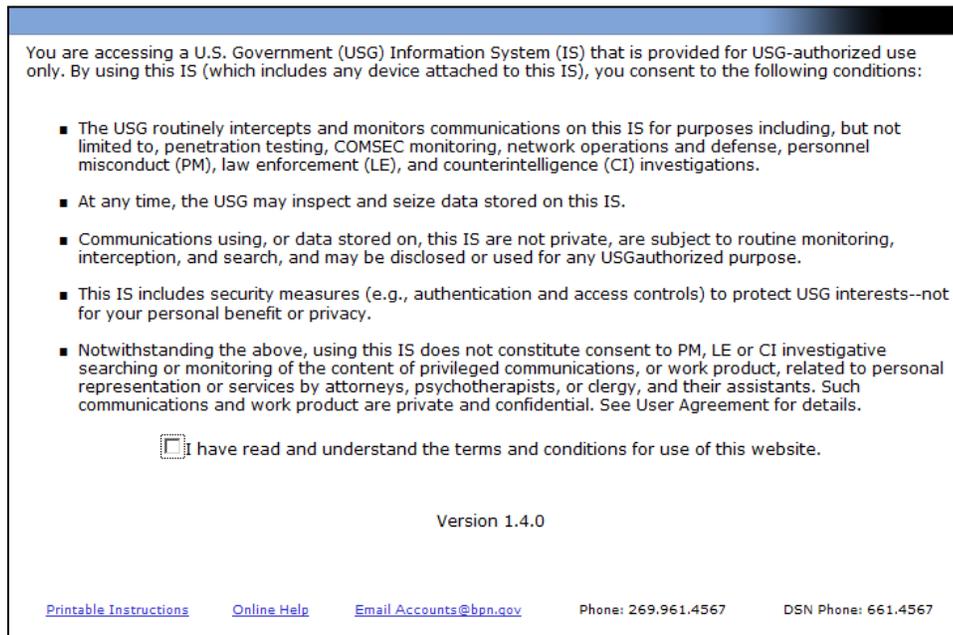

Figure 5 - 17. BRS Terms and Conditions Acceptance Page

Read the terms and conditions on the page and select the **check box** at the bottom to indicate your acceptance. BRS links are then displayed for New User or Returning User as shown in Figure 5-18.

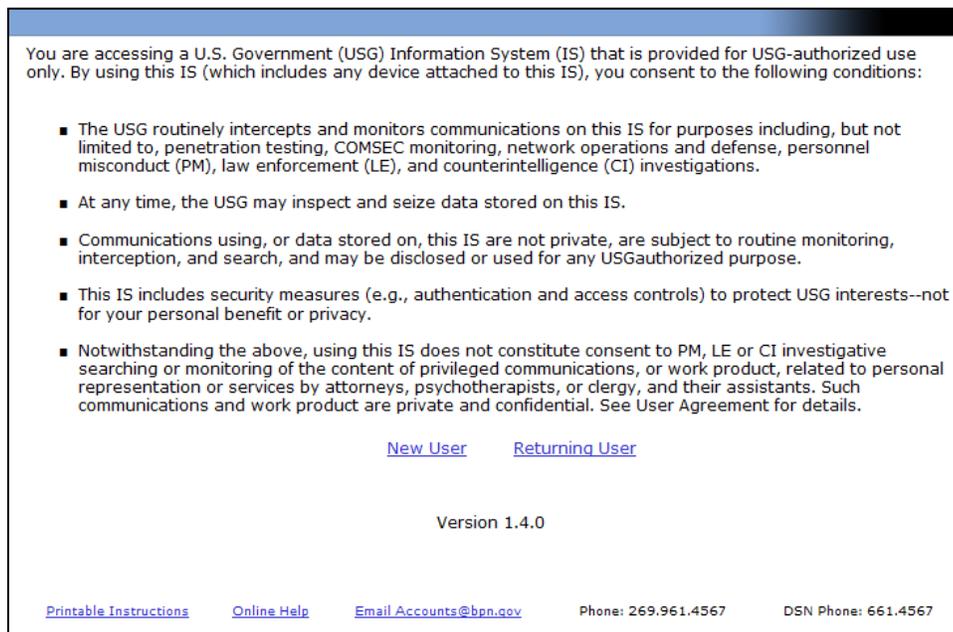

Figure 5 - 18. BPNSE Registration Page

Select **New User**. If you are already registered in the BPNSE system for other applications, you need to register again for each application access you request. Follow the instructions for the appropriate user type.

Note: Once you have accessed the BRS application, there are two help links at the bottom of the page that you can use. Click **Printable Instructions** to print the instructions. Click **Online Help** for the online help file.

Contractor Access

Contractor users input and maintain new UIIs in the system. Contractor access requires the user's organization be registered in CCR and have an active Data Universal Numbering System (DUNS) Number. To register as a contractor, click on the **Click here** link and follow the instructions to register. You will need to enter a valid DUNS Number on the interview page. Once you complete this process, it will take up to three business days for your registration to be processed.

NOTE: Federal government-sponsored contractors are users entering or accessing data on behalf of specific government activities. These sponsored contractors support the government's IUID efforts and are different from the contractors using the Registry to comply with their DFARS IUID contract-clause requirements. Select the **Yes/No** radio buttons in the BRS application that most appropriately describe your situation.

Legacy Submitter

Legacy users input and maintain only legacy UIIs in the IUID system. Click on the **Click here** link to access the BRS Web site. Select IUID: Legacy Submitter on the Select Applications page and continue with BRS instructions or help.

DCMA Users

DCMA users may view all IUID query data and reports. Click on the **Click here** link to access the BRS Web site. Select IUID: DCMA on the Select Applications page, and enter list of DoDAACs separated by commas in the field provided. Continue with BRS instructions or help.

Inquiry Users

Inquiry users are uniform military and civil service employees with government sponsors that need to view data in the IUID registry. Click on the **Click here** link to access the BRS Web site. Select IUID Inquiry on the Select Applications page and continue with BRS instructions or help.

User Access Information

Once a user is logged in, the access level of the user is displayed in the bottom right corner of the IUID page as shown in Figure 5-19.

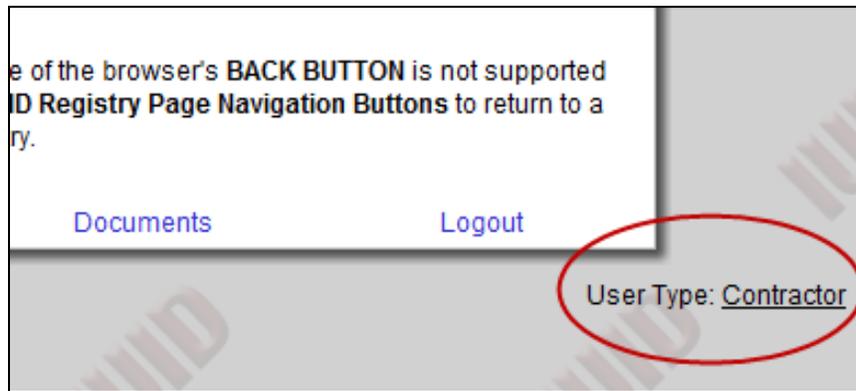

Figure 5 - 19. User Type Displayed

Click on the **User Type** link to display the Information for User Type page as shown in Figure 5-20.

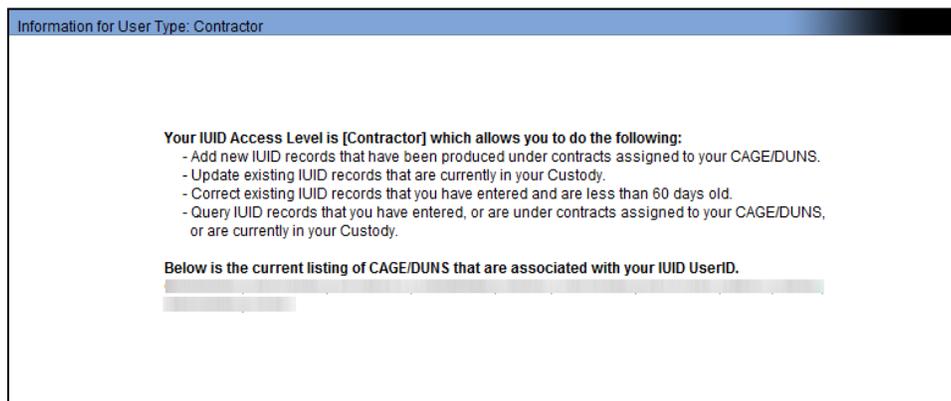

Figure 5 - 20. Information for User Type Page

Note that the Information for User Type for the Contractor includes the current listing of CAGE and DUNS that are associated with the user ID.

5.3.2.2 Change Password

This section explains changing a user’s password. Only the administrator or the user associated with the password may change the password. A user may change his or her password only once in a 24-hour period (for end user accounts). The user’s administrator may change a password at any time.

To change a password, click on the **Change Password** link. The BPN Portal page is displayed as shown in Figure 5-21.

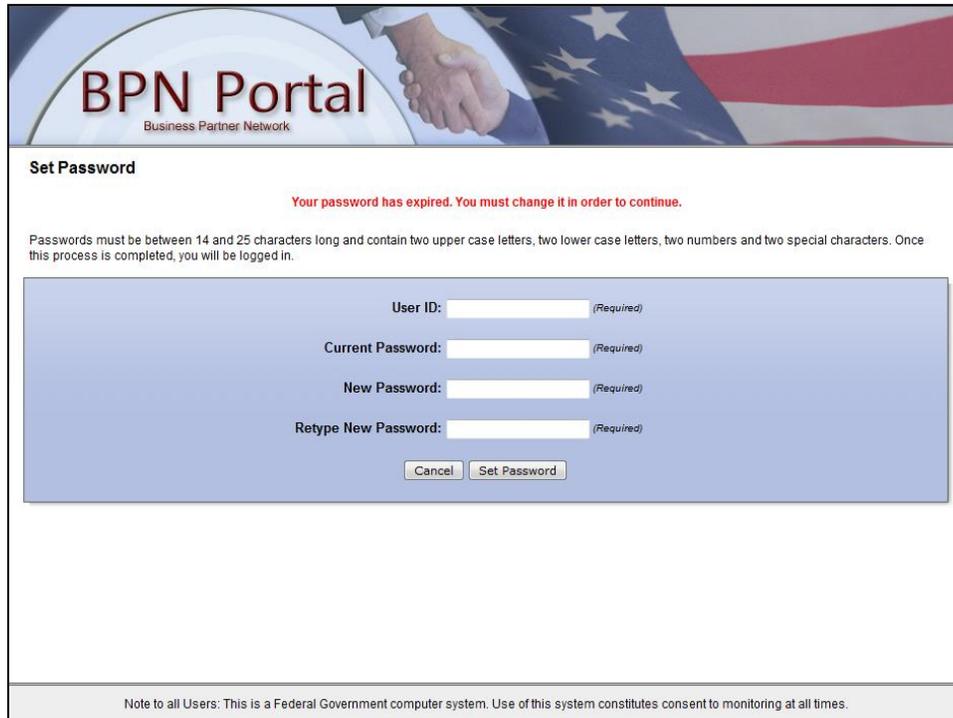

Figure 5 - 21. Change Password in BPN Portal

Enter your user ID, current password, new password, and then retype the new password to confirm, and click the **Set Password** button. Guidelines for creating a strong password are included on the Set Password page. Once you have changed your password, you will be logged in.

The first time you log in with your user ID and password, you will be asked to change it. When a password expires, you will be required to change it the next time you log in. In either case, the Change Password page is displayed containing a password-expired message.

When choosing a password, choose a password you will remember. Passwords should be “strong.” Each password should meet the following criteria:

- Passwords are case sensitive. For example, if you initially entered your new password as Pass\$123, you will not be able to log in to the site if you enter this password as PASS\$123.
- Passwords must be between 14 and 25 characters long.

Change Password

- Passwords must contain at least two of each of the following: upper case alphabetic, lower case alphabetic, numeric, and special character (! @ # \$ % ^ * ()).
- Passwords must have a letter, either upper or lower case, as the first character.
- Passwords must not be the same as a password used in the last 24 passwords.
- Passwords must not be the same as your user ID or your user ID reversed.
- Passwords should not contain a word that can be found in a dictionary, including proper names.

5.3.3 IUID Menu—Contractor

About Contractor Access

Contractors can enter, view, and edit all records within the IUID database that are associated with their contracts. In addition, contractors have access to all Correction, Update, Query, and Report pages for any UID that they originally entered via user ID and any record of which they have custody through a DoDAAC related to the user's CAGE or DUNS. The following paragraphs discuss the data contained in these records and the difference between the Update and Correction functions.

An IUID Registry item record contains static and dynamic data. Static data is entered once and never changes and includes information about the item's initial acquisition and the assigned UII with its components. Dynamic data logs events that occur during the life of the item—for example, changes in marks, GFP Custody, or Part Number /Batch Lot Rollovers, selected life cycle events, and parent/child relationships.

An item's data is entered for two reasons. First, items are added to the registry when they are accepted as new procurements. In addition, existing items are added when they are identified in inventory or operational use. Items are then updated during use.

The IUID Registry has an Update function and a Correction function. The Update function records an event that happened to the item. Examples of events are: a reported mark that has been removed from the item or a new mark that has been placed on the item; a change in GFP contract or possession; part number or batch/lot rollovers; life cycle events such as destruction, donation, retirement, etc.; and removal from or attachment to another item (e.g. an engine is removed from or added to a plane). Please note that records are never erased from the IUID Registry database, even when items are expended. The record remains in the IUID Registry after the item's life cycle has been completed.

The Correction function modifies or removes existing data, static or dynamic, that was entered in error. Static data corrections include entering data missing from the initial item entry such as Acquisition Cost and Acceptance Date or changing existing values. The Correction function is the only place where the item's entire record or one or more events can be deleted. This action permanently removes the record as if it was never entered.

Corrections can only be performed for 60 days from date of UII entry. Following the 60-day window, users attempting to make corrections will receive an "Access Denied" error message and should contact the IUID helpdesk at IUID.helpdesk@bpn.gov to correct the information.

Add IUID

Login

When Contractor users log in to IUID, the IUID Main Menu page is displayed as shown in Figure 5-22.

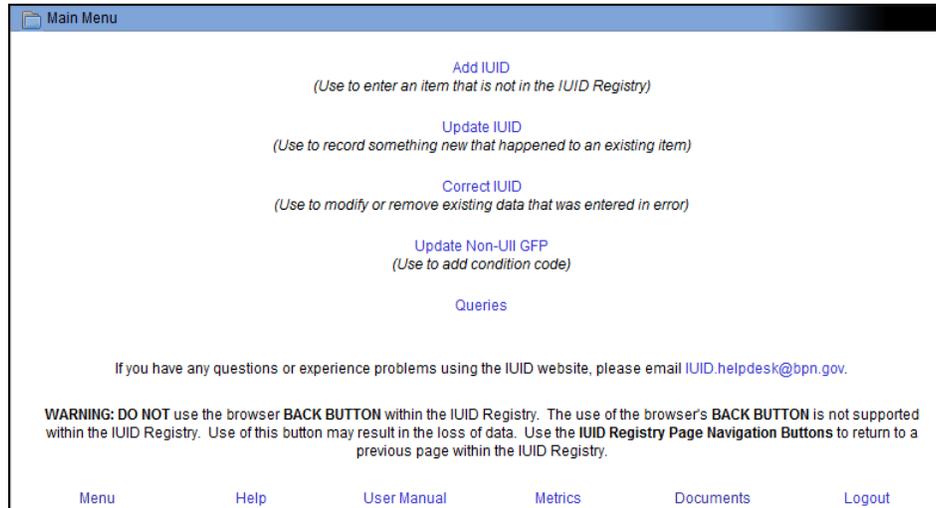

Figure 5 - 22. IUID Main Menu – Contractor Access

There are five options available on the Contractor’s Main Menu: Add IUID, Update IUID, Correct IUID, Update Non-UII GFP, and Queries.

- Use the Add IUID option to enter an item that is not in the IUID Registry. Items added can be New Acquisition items, Legacy items (Non GFP), GFP items, or Embedded Items. See [Section 5.3.3.1](#) for more information about the Add IUID menu option.
- Use the Update IUID option to record something new that happened to an existing item. Updates to be recorded include the following: add custody information, add or delete marks information, add Rollovers, add or delete embedded information, or add a life cycle event status for an item. See [Section 5.3.3.2](#) for more information about the Update IUID menu option.
- Use the Correct IUID option to modify or delete existing data that was entered in error. These corrections can include the following: correct IUID, Acquisition Contract information, delete a UII, correct or delete embedded or marks information, or correct custody information. New IUID records may be corrected for 60 days after their initial entry into the system. See [Section 5.3.3.3](#) for more information about the Correct IUID menu option.
- Use the Update Non-UII GFP option to add a condition code. The condition code contains the designation such as supply or disposal, the condition code, and the effective date of that condition code. Both a supply and a disposal code may be needed to provide the correct overall condition. See [Section 5.3.3.4](#) of the SUM for more information about condition codes.

Use the Queries option to search the IUID database. The following queries can be made from the Queries menu: Single Item Query, Contract Query, Composition Query, GFP Reconciliation Query, GFP Custody by Contract Query, GFP Custody by CAGE/DUNS Query, Mark Query, Pedigree Query, Active Serial/Part/Batch Lot Number Query, Part Number Query, User Activity Query, Non

Add IUID

UUI GFP Query, and User Generated/Saved Queries. See [Section 5.3.3.5](#) of the SUM for more information about these different queries.

5.3.3.1 Add IUID

To add an IUID record, click on the **Add IUID** option on the menu. The Add IUID: Record Type menu is displayed as shown in Figure 5-23.

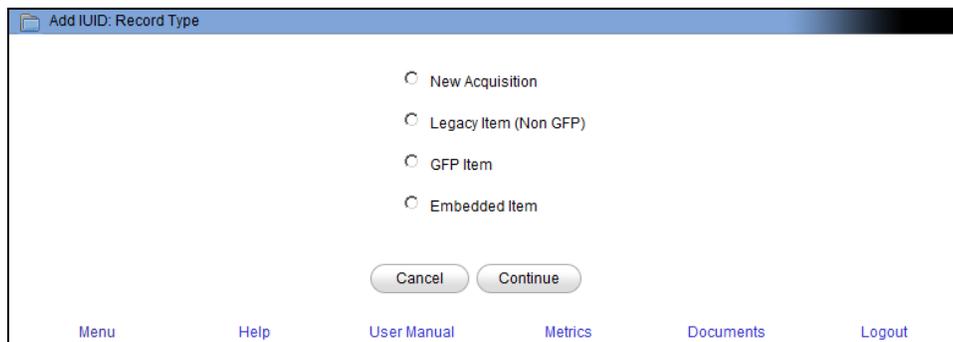

Figure 5 - 23. Add IUID: Record Type Menu Page

Menu options on the Add IUID: Record Type page are New Acquisition, Legacy Item (Non GFP), GFP Item, and Embedded Item.

- New Acquisition adds a new item to the IUID registry.
- Legacy Item (Non GFP) adds a legacy item. Legacy Items are items acquired under contracts issued prior to 1 January 2004 and are still in government inventory.
- GFP Item adds a Government Furnished Property (GFP) item. These are also considered legacy items but legacy items that are in contractor custody.
- Embedded Item adds an embedded item to a parent item.

Select the appropriate option and click on the **Continue** button. The process for each of these options is explained below.

New Acquisition

When New Acquisition is selected from the Add IUID: Record type page, the Add IUID: New Acquisition Record page is displayed as shown in Figure 5-24.

Acquisition Contract

Acquisition Contract Number *

Acquisition Contract Order Number

Acquisition Contract Number Type †

Prime Contractor Identifier *

CLIN

CLIN/SLIN/ELIN *

Quit <<Back Continue

Menu Help User Manual Metrics Documents Logout

Figure 5 - 24. Add IUID: New Acquisition Record Page—Acquisition Contract

Since a newly acquired item is being entered, all fields are required. Explanations for all data-entry fields may be found in [Appendix B. Error messages](#) are displayed as shown in [Figure 5-154](#). See [Section 5.7](#) of this SUM for more information about error messages.

Click on the **Continue** button. The Pedigree page of the Add IUID: New Acquisition Record page is displayed as shown in [Figure 5-25](#).

The screenshot shows a web form titled "IUID Controlled Access Website - Add IUID: New Acquisition Record - Pedigree". The form is organized into several sections:

- IUID Section:** Includes a dropdown for "UII Type *", a dropdown for "Issuing Agency Code", and text input fields for "Enterprise Identifier", "Original Part Number", "Current Part Number", and "Current Part Number Effective Date" (with a calendar icon and "(Format: MM-DD-YYYY)").
- Serial and Batch Section:** Includes text input fields for "Serial Number" and "Batch/Lot".
- UII Section:** Includes a text input field for "UII **".
- Manufacturer and Warranty Section:** Includes a dropdown for "Ship-to Location Code *", a dropdown for "Manufacturer Code", a text input for "Manufacturer ID", and a dropdown for "Warranty Indicator".
- Description Section:** Includes a large text area for "Description *".

At the bottom of the form, there are three buttons: "Quit", "<<Back", and "Continue". Below the buttons, there is a footer with links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Footnotes at the bottom left of the form:

- * - Required
- † - At least one is required
- ** - GRAI and GIAI are mixed case. UII with other types must be upper case.

Figure 5 - 25. Add IUID: New Acquisition Record—Pedigree Page

UII Type, UII, Ship-to Location Code, and Description are required. Issuing Agency Code, Enterprise Identifier, Original Part Number, Serial Number, and Batch/Lot may or may not be required depending on the selected UII Type; however, if either Issuing Agency code or Enterprise ID is provided, then both are required. In addition, if a current part number is entered when adding a new item, the original part number is then required.

Use the drop-down menu to select a UII Type. Use the drop-down menu to select an Issuing Agency Code, or it can be entered by directly typing it. Enter the remaining data on the page. See [Appendix B](#) for explanations of data fields.

When UID 1 or UID 2 is selected for UII Type as the above data is entered, IUID builds a suggested UII Code. When UID1 is selected, the suggested UII Code is based on Issuing Agency Code plus Enterprise Identifier plus Serial Number. This suggestion is displayed as shown in Figure 5-26.

The screenshot shows a web form titled "IUID". The "UII Type" dropdown is set to "UID1". The "Issuing Agency Code" is "UN - DUNS", "Enterprise Identifier" is "187575592", "Original Part Number" is "OPN0001", "Current Part Number" is empty, "Current Part Number Effective Date" is empty with a calendar icon and "(Format: MM-DD-YYYY)", "Serial Number" is "123123456", and "Batch/Lot" is empty. Below these fields, there is a link "Use this UII?" followed by the suggested UII code "UN187575592123123456". The "UII" field at the bottom is empty.

Figure 5 - 26. Suggested UII Code—UID1

To accept a suggested UII value, click on it. The code is entered in the UII field. If the individual values are changed after a UII is selected, the suggested UII value may change and need to be selected again. IUID will only accept the suggested UIIs for UID1 or UID 2.

When UID2 is selected for the UII Type, the UII is built for both the Part Number and the Batch/Lot constructs (Issuing Agency Code + Enterprise ID + Part Number OR Batch/Lot + Serial Number), and either is selectable. Both suggestions are displayed as shown in Figure 5-27.

The screenshot shows the same web form as Figure 5-26, but with "UII Type" set to "UID2". The "Original Part Number" field now has a "†" icon to its left and contains "OPN0001". The "Batch/Lot" field also has a "†" icon to its left and contains "ABC12311122". Below these fields, there are two links: "Use this UII?" followed by "UN187575592ABC12311122123123456" and "UN187575592OPN0001123123456". The "UII" field at the bottom is empty.

Figure 5 - 27. Suggested UII Code—UID2

Click on the desired UII to enter it into the UII field.

Add IUID

When satisfied with all entries, click on the **Continue** button. [Error Messages](#) will appear on the page indicating whether required data is missing or invalid. [Figure 5-154](#) shows an example of an error message. See [Section 5.7](#) of this SUM for more information about error messages. Enter data until these messages no longer appear. The Marks page is the next page that is displayed as shown in [Figure 5-28](#).

Figure 5 - 28. Add IUID: New Acquisition Record - Marks Page

The marks section captures the physical marking associated with an item. Since this item is a new acquisition and the UII is required to be attached with a 2D compliant mark, some data items are pre-populated. Effective Date, the date the mark is placed on the item, is required. Select the Bagged/Tagged check box if mark is applied to a tag attached to the item instead of directly on the item via a label, data plate, or direct part mark. Select a Set option from the drop-down menu. A set is used to indicate what markings are on one data plate or grouping. “Required” message is returned if no entry is selected. For further explanations, see [Appendix B](#). Note: See [Section 5.7](#) for information regarding error messages.

The following rules apply to Marks:

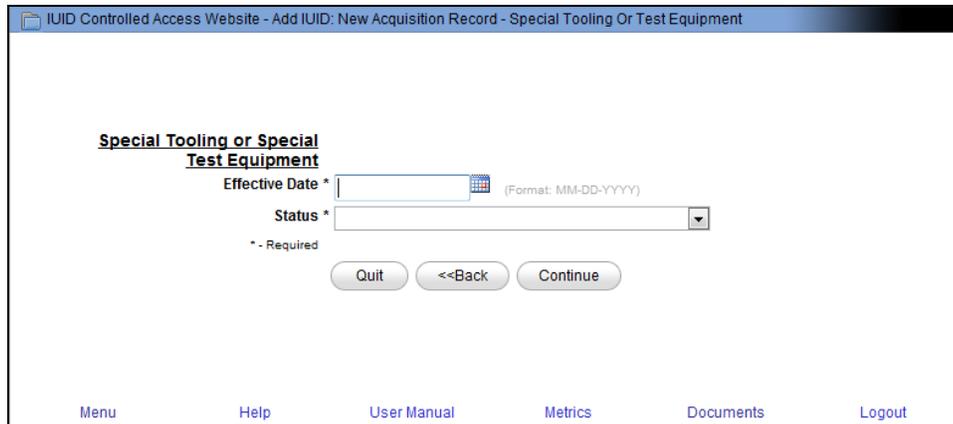

- There must be at least one Mark group whose Content is “UID”.
- If there are multiple Mark groups whose Contents are “UID”, none may have a Medium Code of “DEFINED”.
- If the Medium Code is “DEFINED”, there must be one or more other Mark groups recorded whose Content is not “UID”. Note that “DEFINED” is allowed only for Legacy or GFP items.
- If there are two or more Mark groups where each element has the same value (Effective Date = Effective Date, Contents = Contents, etc.), only one of the matching groups is loaded. The rest is rejected as a duplicate mark. Duplicates can be found within the Mark groups in the file or between the ones in the file and the ones in the database.
- IUID Marks may not have gaps of time.
- Mark contents are restricted to a list of acceptable values.
- Type Designation Mark Value and Vessel Class Mark Value must be upper case.

Add IUID

IUID Registry does not allow the removal of a Mark if doing so violates these rules. See [Appendix B](#) for more information about Marks.

Note: When adding a mark for Service/Agency/Command, please use one of the following as the value: “CHEMBIO”, “MDA”, “TRANSCOM”, “SOCOM”, “USARMY”, “USAF”, “USCG”, “USMC”, or “USN”.

Enter data and click on the **Continue** button. The next section displayed is the Special Tooling or Special Test Equipment page similar to Figure 5-29.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Add IUID: New Acquisition Record - Special Tooling Or Test Equipment". The main content area is titled "Special Tooling or Special Test Equipment". It contains two required fields: "Effective Date *" with a calendar icon and "(Format: MM-DD-YYYY)" text, and "Status *" with a drop-down arrow. Below these fields is a note "* - Required". At the bottom of the form area are three buttons: "Quit", "<<Back", and "Continue". At the very bottom of the page are several blue links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 29. Special Tooling or Special Test Equipment

Effective Date and Status are both required fields. Select an effective date from the calendar, and then select a status from the drop-down menu. Options are Not Special Tooling or Test Equipment, Special Test Equipment (STE), and Special Tooling (ST). When satisfied with entries, click the **Continue** button.

All data is compiled and displayed on the Add IUID: New Acquisition Record – Record Information page as shown in Figure 5-30.

IUID Controlled Access Website - Add IUID: New Acquisition Record - Record Information

Note: Click the Finish button at the bottom of the page to save changes.

Figure 5 - 30. Compiled Add IUID: New Acquisition Record – Record Information

Review data. Use the **Update**, **Add**, and **Delete** links to change or add to any of the information shown.

Add IUID

- Click the **Update** link next to IUID to return to the display of the Add IUID: New Acquisition Record – Pedigree Page, [Figure 5-25](#).
- Click the **Update** link next to Acquisition Contract to return to the display of the Add IUID: New Acquisition Record Page - Acquisition Contract, [Figure 5-24](#).
- To delete a Mark, click on the **Delete** link next to the Mark information. The Mark information is deleted from the Add IUID page. As at least one UII mark is required, another Mark will need to be added in order to finish the addition of the UII.

If more marks are associated with the item, enter them at this screen by clicking on the **Add** button next to Marks. A blank Add IUID: New Acquisition Record - Marks page is opened to add another Marks value. See Figure 5-31.

Figure 5 - 31. Add Marks Page

All fields on the Add Marks page are required. Notice that this Add Marks page is different from the first Marks page in that the Contents, Medium, and Value fields are now editable fields. Enter data and click on the **Continue** button. The Compiled Add IUID: New Acquisition Record page is redisplayed with the new Marks information displayed as shown in Figure 5-32.

Marks Add										
Contents	Medium	Value	Marker Code	Marker ID	Bagged/ Tagged	Effective	Removed	Set		
UID	2D COMPLIANT	UN187575592123357	UN	187575592	N	12-15-2011		SET 1	Update	Delete
UID	2D COMPLIANT	UN187575592123357	UN	187575592	N	12-15-2011		SET 2	Update	Delete

Figure 5 - 32. Marks Added

Marks can be deleted from an item by clicking on the **Delete** link. As at least one UII mark is required, be sure at least one mark value is recorded in order to complete the addition of the new IUID record.

Add IUID

When satisfied that all data is correct and ready to submit, click on the **Finish** button at the bottom of the page (Figure 5-30). A message is displayed that the IUID record has been added as shown in Figure 5-33.

Figure 5 - 33. IUID Added Message

Click on the **Return to Main Menu** button to return to the IUID Main Menu. Click on the **Add another IUID to this Contract** button to display a new Add IUID: New Acquisition Record page and add another IUID.

Note: When entering multiple items under the same Contract and CLIN but with a different Acceptance Date, this **Add another IUID to this Contract** button will not work. Return to the main menu and select **Add IUID** and then **New Acquisition**.

Note: Errors made while entering this UII can be corrected for 60 days after input by using the Correct IUID option on the Main Menu.

Legacy Item (Non GFP)

When **Legacy Item (Non GFP)** is selected from the Add IUID menu, an Organizational Source data entry field is displayed on the menu page as shown in Figure 5-34.

Figure 5 - 34. Organizational Source

Add IUID

The **Organizational Source** field is an optional field. Enter the CAGE, DUNS or DoDAAC of the organization that is the source of the data. Click on the **Continue** button. The Add IUID: Legacy Record – Acquisition Contract page is displayed as shown in Figure 5-35.

The screenshot shows a web form titled "IUID Controlled Access Website - Add IUID: Legacy Record - Acquisition Contract". The form is organized into two main sections: "Acquisition Contract" and "CLIN".

Acquisition Contract Section:

- Acquisition Contract Number:
- Acquisition Contract Order Number:
- Acquisition Contract Number Type:
- Prime Contractor Identifier:

CLIN Section:

- CLIN/SLIN/ELIN:
- Acceptance Date: (Format: MM-DD-YYYY)
- Acceptance Location Code:
- Acquisition Cost:
- Currency Code:
- Unit of Measure:

Below the form, there are three buttons: "Quit", "<<Back", and "Continue".

At the bottom of the page, there are several links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 35. Add IUID: Legacy Record – Acquisition Contract

Entering Legacy items is different from entering new items in that Acquisition Information is not required. In some cases, it will not be readily available to those making the entry. However, please enter as much information as possible for the legacy item as it helps with the item's life later. When satisfied with entries, click the **Continue** button. The Add IUID: Legacy Record – Pedigree page is displayed as shown in Figure 5-36.

Figure 5 - 36. Add IUID: Legacy Record – Pedigree Page

Enter IUID data. UII Type, UII, and Description are required. Issuing Agency Code, Enterprise Identifier, Original Part Number, Serial Number, and Batch/Lot may be required depending on which UII Type is selected; however, if either Issuing Agency Code or Enterprise ID is provided, then both are required. If a UII Type is used that does not require a Part Number but a Part Number is available, including this information in the new item's record is suggested.

A note about Rollovers: When a UII is first created, the part number entered is considered the "original part number". During subsequent updates to the record, any new part number that is entered is considered "current". In addition, if a current part number is entered when adding a new item, the original part number is then required.

Similar to Add New Acquisition, when UID1 is selected for the UII Type as the above data is entered, IUID builds a suggested UII Code based on Issuing Agency Code plus Enterprise Identifier plus Serial Number. This suggestion is displayed after the Serial Number is entered as shown in [Figure 5-26](#). To accept a suggested UII value, click on it. The code is entered in the UII field. If the individual values are changed after a UII is selected, the UII value may change and need to be selected again.

Another UII value option occurs when UID2 is selected for the UII Type. In this case the UII is built similar to UID1 plus another is built and suggested using the Issuing Agency Code plus

Add IUID

Enterprise Identifier plus Batch/Lot Number plus Serial Number. Both suggestions are displayed as shown in [Figure 5-27](#). Click on the desired UII to enter it into the UII field.

Click on the Continue button. See [Appendix B](#) for field explanations. The next page displayed is the Marks page as shown in Figure 5-37.

Figure 5 - 39. Compiled Add IUID: Legacy Record Page

Add IUID

Review data. Use the Update, Add, and Delete links to change any of the information shown. Select the Update link next to IUID to display the Add IUID: Legacy Record – Pedigree Page, [Figure 5-138](#). The [Add link](#) next to Marks is explained in the Add New Acquisition section. The Add Marks page is shown in [Figure 5-139](#). To delete a Mark, click on the **Delete** link next to the Mark information. The Mark information is deleted from the Add IUID page. The Mark information is deleted from the Add IUID page. As a physical UID Mark or a virtual IUID Mark in addition to a non-UID physical Mark is required, another Mark will need to be added in order to finish the addition of the UII. See Mark rules on [Page 27](#).

When satisfied that data is correct and ready to submit, click on the **Finish** button at the bottom of the page. A message is displayed that the IUID record has been added as shown in [Figure 5-31](#).

GFP Item

To add a Government Furnished Property (GFP) item, click on the GFP Item option on the Add IUID Menu. The Add IUID: GFP Item Record – Acquisition Contract page is displayed as shown in [Figure 5-40](#).

Figure 5 - 40. Add IUID: GFP Item Record – Acquisition Contract

For non-mandatory fields, enter the information if known. [Acquisition Contract Number Type](#) is required if a [Contract Number](#) is provided. [Acquisition Cost](#) is required. See [Appendix B](#) for data field explanations.

When satisfied with entries, click on the **Continue** button. If no errors are found, the Add IUID: GFP Item Record, Custody/GFP page is displayed as shown in [Figure 5-41](#).

Figure 5 - 41. Add IUID: GFP Item Record –Custody/GFP Page

Enter all GFP/Custody information: Custodial Contract Number; Custodial Contract Order Number, Custodial Contract Number Type; one of Commercial and Government Entity (CAGE), Department of Defense Activity Address Code (DoDAAC) or DUNS; Received Date, Category Code, and Status Code are required. Note that for a GFP Item, it is preferable to use a CAGE Code or a DUNS rather than a DoDAAC. See [Appendix B](#) for data field explanations.

When satisfied with entries, click on the **Continue** button. If there are no errors, the Add IUID: GFP Item Record - Pedigree page is displayed as shown in Figure 5-42.

Note: If error messages are present, follow the instructions to correct them. See [Section 5.7](#) for more information about error messages.

The screenshot shows a web form titled "IUID Controlled Access Website - Add IUID: GFP Item Record - Pedigree". The form is organized into several sections. At the top, there is a section for "IUID" with a dropdown for "UII Type *". Below this are fields for "Issuing Agency Code" (dropdown), "Enterprise Identifier" (text), "Original Part Number" (text), "Current Part Number" (text), and "Current Part Number Effective Date" (calendar icon, text, with a note "(Format: MM-DD-YYYY)"). The next section is for "Serial Number" (text) and "Batch/Lot" (text). Below that is a section for "UII **" (text), "Ship-to Location Code" (text), "Manufacturer Code" (dropdown), "Manufacturer ID" (text), and "Warranty Indicator" (dropdown). The final section is "Description *" (text area). At the bottom of the form, there are three buttons: "Quit", "<<Back", and "Continue". Below the buttons, there are several small notes: "* - Required", "† - At least one is required", and "‡ - GRAI and GIAI are mixed case. UII with other types must be upper case." At the very bottom of the page, there are links for "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 42. Add IUID: GFP Item Record - Pedigree

Enter IUID data: UII Type, UII, and Description are required. Issuing Agency Code, Enterprise Identifier, Original Part Number, Serial Number, and Batch/Lot may be required depending on which UII Type is selected; however, if either Issuing Agency Code or Enterprise ID is provided, then both are required. In addition, if a current part number is entered when adding a new item, the original part number is then also required.

Similar to Add New Acquisition, when **UID1** is selected for the UII Type as the above data is entered, IUID builds a suggested UII Code based on Issuing Agency Code plus Enterprise Identifier plus Serial Number. This suggestion is displayed after the Serial Number is entered as shown in [Figure 5-24](#). To accept a suggested UII value, click on it. The code is entered in the UII field. If the individual values are changed after a UII is selected, the UII value may change and need to be selected again.

Another UII value option occurs when **UID2** is selected for the UII Type. In this case the UII is built similar to UID1 plus another is built and suggested using the Issuing Agency Code plus Enterprise Identifier plus Batch/Lot Number plus Serial Number. Both suggestions are displayed as shown in [Figure 5-25](#). Click on the desired UII to enter it into the UII field.

When satisfied with entries, click on the **Continue** button. See [Appendix B](#) for field explanations. The next page displayed is the Marks page as shown in Figure 5-43.

Add IUID

Figure 5 - 43. Add IUID: GFP Item Record – Marks Page

Enter Marks information: Medium, Effective Date of the Mark, Marker Code, Marker ID, and Set are required. Note: Rules for applying Marks to items can be found on [Page 27](#) of this SUM.

Defined Marks Note

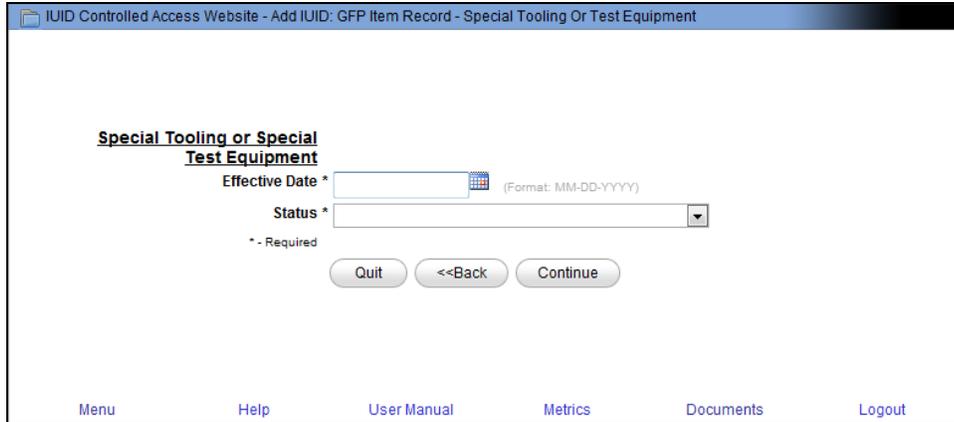

A Defined mark is an identification mark that is not actually on the item; it is an identification mark that is only assigned to the item. When a "Defined" UID mark is recorded, a physical mark is required, and an additional screen is displayed as shown in Figure 5-44.

Figure 5 - 44. Defined IUID Mark Recorded

Enter your Mark data; all fields are required. When satisfied with entries, click on the **Continue** button.

Add IUID

The next section displayed is the Special Tooling or Special Test Equipment page similar to Figure 5-45.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Add IUID: GFP Item Record - Special Tooling Or Test Equipment". The main content area displays the following form:

- Special Tooling or Special Test Equipment**
- Effective Date *** [Calendar icon] (Format: MM-DD-YYYY)
- Status *** [Drop-down menu]
- * - Required
- Buttons: **Quit**, **<<Back**, **Continue**

At the bottom of the page, there is a navigation bar with the following links: [Menu](#), [Help](#), [User Manual](#), [Metrics](#), [Documents](#), and [Logout](#).

Figure 5 - 45. Special Tooling or Special Test Equipment

Select an effective date from the calendar, and then select a status from the drop-down menu. Options are Not Special Tooling or Test Equipment, Special Test Equipment (STE), and Special Tooling (ST). When satisfied with entries, click the **Continue** button.

The Compiled Add IUID: GFP Item Record Page is displayed as shown in Figure 5-46.

Add IUID

Figure 5 - 46. Compiled Add IUID: GFP Item Record Page

Review data. Use the **Update**, **Add**, and **Delete** links to make changes, to add another mark or delete a mark, add an Item Owner, add or delete Special Tooling or Test Equipment information, or Type

Add IUID

Designation. Select the **Update** link next to IUID to display the Add IUID: GFP Item Record – Pedigree Page, [Figure 5-40](#). Select the **Update** link next to Acquisition Contract to display the Add IUID: GFP Item—Acquisition Contract/CLIN Page, [Figure 5-38](#). Select the Update link next to Custody to display the Add IUID: GFP Item Record – Custody/GFP Page, [Figure 5-39](#). The [Add link](#) next to Marks is explained in the previous section, and the page is shown in [Figure 5-29](#).

To delete a Mark, click on the **Delete** link next to the Mark information. The Mark information is deleted from the Add IUID page. As at least one UII mark is required, another Mark will need to be added in order to finish the addition of the UII.

When satisfied that everything is correct and ready for submission, click on the **Finish** button at the bottom of the page. A message is displayed that the IUID record has been added as shown in [Figure 5-31](#).

Under the "IUID Added" message in [Figure 5-31](#), there are two action buttons. Click on the **Return to Main Menu** button to return to the main menu. Click on **Add another IUID to this Contract** button to add another IUID record using the same acquisition contract information.

Embedded Item

An Embedded item is a subassembly, component, or part that is contained or embedded in another item recorded in the registry.

Important: An embedded item is only used when the item is embedded in the end item at the time the government initially accepts the Parent Item.

If the item comes to the government as a part, then it is entered as its own end item, and later in its life, it is embedded into one of the end items via an update. For this situation, please use new acquisition, legacy, or GFP to add the item, and then update the item with the embedded relationship.

Select Embedded Item to add an embedded item to a record. A Parent UII field is displayed on the menu page as shown in [Figure 5-47](#).

The screenshot shows a form with four radio button options: "New Acquisition", "Legacy Item (Non GFP)", "GFP Item", and "Embedded Item". The "Embedded Item" option is selected, indicated by a green dot and a dashed box around the radio button. Below the radio buttons is a text field labeled "Parent UII *" with a cursor inside, followed by "(Case Sensitive)". A legend at the bottom left indicates "* - Required".

Figure 5 - 47. Parent UII field displayed

Add IUID

Enter the parent UII of the item that is to be embedded and click on the **Continue** button. Parent UII is required and must have been previously recorded in the registry. Note: The UII code is case sensitive. If the Parent UII is not found in the registry, an error message will be displayed as shown in Figure 5-48.

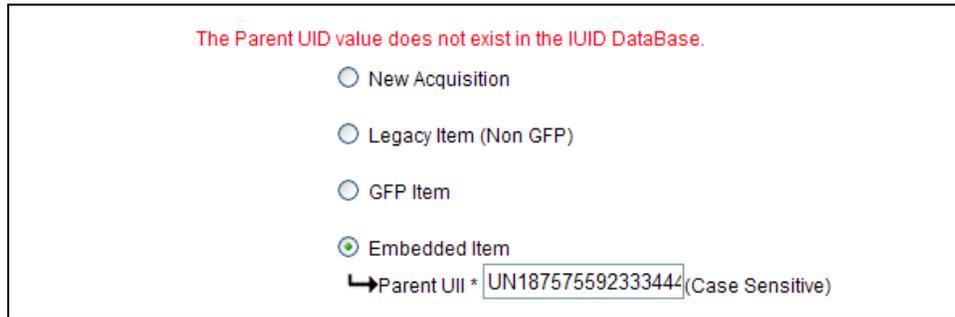

Figure 5 - 48. Error Message

If the parent UII is found, the Add IUID: Embedded Item Record – Pedigree page is displayed as shown in Figure 5-49.

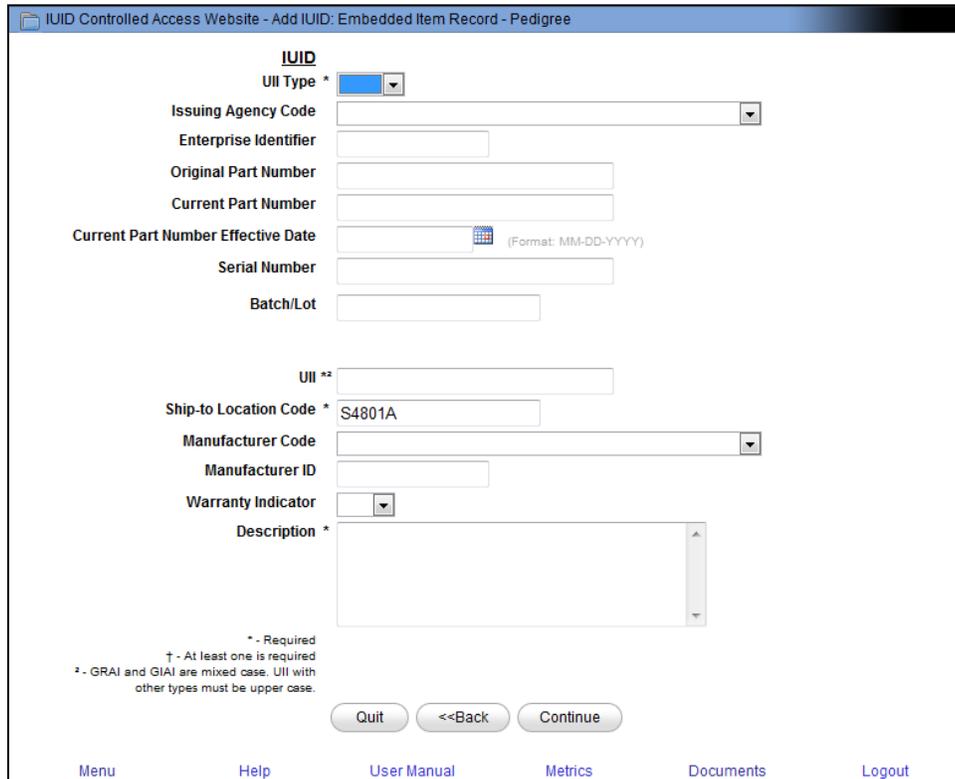

Figure 5 - 49. Add IUID: Embedded Item Record - Pedigree

Add IUID

Notice that the Acquisition Contract screen is passed because the item inherits the Acquisition Contract from its parent item.

Enter IUID data. UII Type, UII, and Description are required. Issuing Agency Code, Enterprise Identifier, Original Part Number, Serial Number, and Batch/Lot may be required depending on which UII Type is selected; however, if either Issuing Agency Code or Enterprise ID is provided, then both are required. In addition, if a current part number is entered when adding a new item, the original part number is then required.

Similar to Add New Acquisition, when **UID1** is selected for the UII Type as the above data is entered, IUID builds a suggested UII Code based on Issuing Agency Code plus Enterprise Identifier plus Serial Number. This suggestion is displayed after the Serial Number is entered as shown in [Figure 5-24](#). To accept a suggested UII value, click on it. The code is entered in the UII field. If the individual values are changed after a UII is selected, the UII value may change and need to be selected again.

Another UII value option occurs when **UID2** is selected for the UII Type. In this case the UII is built similar to UID1 plus another is built and suggested using the Issuing Agency Code plus Enterprise Identifier plus Batch/Lot Number plus Serial Number. Both suggestions are displayed as shown in [Figure 5-25](#). Click on the desired UII to enter it into the UII field.

Click on the Continue button. See [Appendix B](#) for field explanations. The next page displayed is the Marks page as shown in [Figure 5-50](#).

Figure 5 - 50. Add IUID: Embedded Item Record – Marks Page

Enter Marks information and click on the **Continue** button. Note: Rules for applying Marks to items can be found on [Page 27](#) of this SUM. If an embedded item is GFP or Legacy, Defined may be an option on the Medium drop-down menu. If you wish to add a Defined mark, see the “[Defined Marks Note](#)” section on [Page 40](#).

When all data has been entered, it is compiled and displayed similar to [Figure 5-51](#).

Add IUID

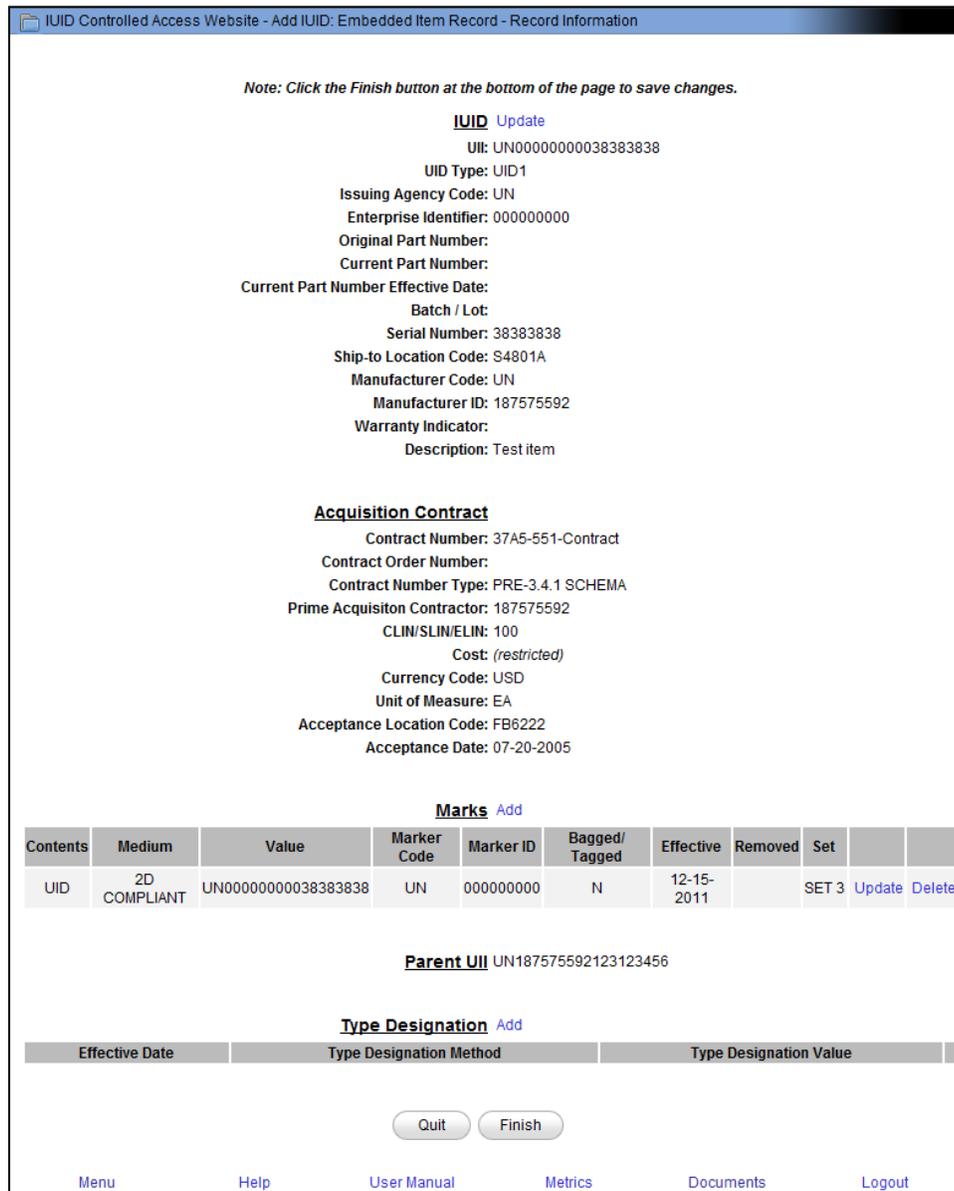

Figure 5 - 51. Compiled Add IUID: Embedded Item Record Information Page

Review data. Use the **Update**, **Add**, and **Delete** links to change any of the information shown. Select the **Update** link next to IUID to display the Add IUID: Embedded Add Record – Pedigree Page, [Figure 5-47](#). The [Add link](#) next to Marks is explained in the Add New Acquisition section. The Add Marks page is shown in [Figure 5-29](#). To delete a Mark, click on the **Delete** link next to the Mark information. The Mark information is deleted from the Add IUID page. As at least one UII mark is required, another Mark will need to be added in order to finish the addition of the UII. Marks are critical for identifying items. Please enter all physical marks.

Add IUID

When finished, click on the **Finish** button at the bottom of the Compiled Add IUID: Embedded Item Record Page, Figure 5-51. A message is displayed that the IUID record has been added as shown in Figure 5-52.

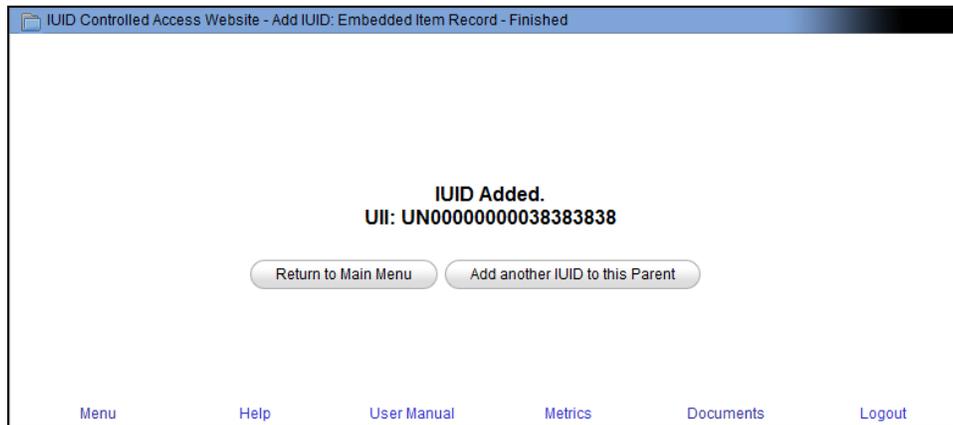

Figure 5 - 52. Embedded Item Added

Click on the **Return to Main Menu** button to return to the IUID Main Menu. Click on the **Add another IUID to this Parent** button to display a new Add IUID page and add another embedded IUID to this parent.

A Final Note about Adding Items

[Type Designation](#), Figure 5-69; [Condition](#), Figure 5-70; and [Item Owner](#), Figure 5-65, are not required at the time a UII is added to IUID. This information can be added using the [Update](#) function, [Section 5.3.3.2](#).

5.3.3.2 Update IUID

Use the Update function to record an event that happened to an item. This event could be a reported mark that has been deleted from the item or a new mark that has been placed on the item; a change in GFP contract or possession; rollovers; recording an embedded relationship— attachment to or removal from another item (e.g. an engine is removed from or added to a plane); item ownership; special tooling or test equipment information; type designation; condition; or a life cycle event such as destruction, donation, retirement, etc.

Important Note: Records are never erased from the IUID Registry database, even when items are expended. The record remains in IUID Registry after the item's life cycle has been completed.

Note: Use the Correct IUID option to modify or delete data that was entered incorrectly. The correction capability is available for 60 days from date of UII entry. Following 60 days, contact the IUID Help Desk at iuid.helpdesk@bpn.gov to initiate a correction.

In addition to recording current item events, historical data can also be added to the IUID Registry. For example, a change being entered today can be given an effective date of an earlier date if the earlier date more accurately reflects the date the change was actually made to an item.

Contractor User Update IUID Note: A Contractor user may update any UIIs that were entered by that user via user ID and any record of which they have custody through a DoDAAC related to the user's CAGE or DUNS.

To update Custody, Marks, Rollover, Embedded, Item Owner, Special Tooling or Test Equipment, Type Designation, Condition, and Life Cycle event information for an item recorded in the IUID, click on the **Update IUID** option on the IUID Main Menu. The Update IUID: Enter UII page is displayed. See Figure 5-53 for an example.

IUID Controlled Access Website - Update IUID: Enter UII

UII * (Case Sensitive)

* - Required

Cancel Continue

The Update function is used to record something new that happened to the item – an event. This could be a reported mark that has been removed from the item or a new mark that has been placed on the item; a change in GFP contract or possession; part number rollovers; life cycle events such as destruction, donation, retirement, etc.; and removal from or attachment to another item (i.e. an engine on a plane).

** Use the [Correct IUID](#) option to modify or remove data entered erroneously **

Figure 5 - 54. Update IUID: Record Information Page

The Update IUID page shown in Figure 5-54 is a compilation of current and active data only for the IUID Record—IUID, Acquisition Contract, Custody, Marks data, Rollovers, Embedded, Item Owner, Special Tooling or Test Equipment, Type Designation, Condition, and Life Cycle Event. The Action links on the Update IUID page are:

Custody.....	Add
Marks.....	Add
	Remove
Rollover.....	Add
Embedded.....	Add
	Remove
Item Owner.....	Add
Special Tooling or Test Equipment.....	Add
Type Designation.....	Add
Condition.....	Add
Life Cycle Event.....	Add

Click on the link for the section that needs to be updated.

Add Custody

When an item moves from government hands to a contractor or vice versa, a custody record is required to indicate the change. This record gives the custodian the access to see the item and perform other update events on that item—for example, part number rollovers or adding marks. When **Add Custody** is selected, the Update IUID – Custody page is displayed as shown in Figure 5-55.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Update IUID: New Acquisition Record - Custody". The main content area is titled "GFP / Custody" and contains the following form fields:

- Custodial Contract Number * (text input)
- Custodial Contract Order Number (text input)
- Custodial Contract Number Type * (dropdown menu)
- CAGE ‡ (text input)
- DoDAAC ‡ (text input)
- DUNS ‡ (text input)
- Sent Date † (calendar icon, text input, format: MM-DD-YYYY)
- Received Date † (calendar icon, text input, format: MM-DD-YYYY)
- Category Code * (dropdown menu)
- Status Code * (dropdown menu)

Legend:

- * - Required
- † - Sent or Received Date Required
- ‡ - CAGE, DODAAC or DUNS Required

Buttons: Cancel, Continue

Navigation bar: Menu, Help, User Manual, Metrics, Documents, Logout

Figure 5 - 55. Update IUID – Custody Page

Update IUID

Add GFP/Custody data. Custodial Contract Number, Custodial Contract Order Number, Custodial Contract Number Type, CAGE or DoDAAC or DUNS, Category Code, and Status Code are required. See [Appendix B](#) for data field explanations. When satisfied with entries, click on the **Continue** button. The Update IUID Record Information Page is redisplayed with the Custody information added as shown in Figure 5-56.

Custody Add										
Contract	Contract Order Number	Contract Number Type	DUNS	CAGE	DODAAC	Sent	Received	Category	Status	
NGC10001A		OTHER AGREEMENT			FB6222	12-15-2011		M	K	Update

Figure 5 - 56. Custody Added

Notice that in the above example, the Received date is missing, and there is an Update link added in the far right column. When the item has been received by the new item custodian, the information must be updated. To do this, click on the **Update** link. The IUID Update – Custody page is displayed as shown in Figure 5-57.

Figure 5 - 57. Update IUID – Custody Page

Enter the Received Date in the field provided, and click on the **Continue** button. The Update IUID Record Information Page is redisplayed. Click on the **Finish** button at the bottom of the Update IUID Record Information page, [Figure 5-52](#). An IUID Updated message is displayed as shown in Figure 5-58.

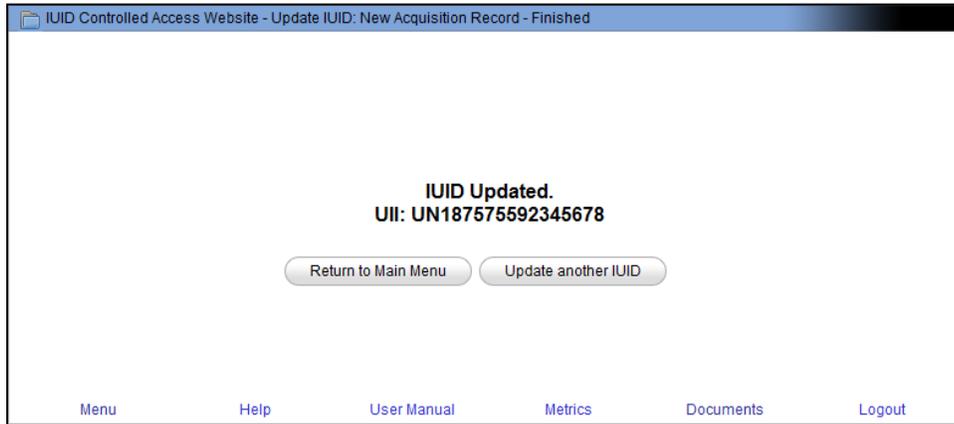

Figure 5 - 58. IUID Updated Message

Return to the menu page by clicking on the **Return to Main Menu** button, or select another IUID by clicking on the **Update another IUID** button.

Important: If a contractor is unable to access an item to record a custody change for an item of GFP, they should enter a receipt notice in Wide Area Work Flow (WAWF) via the property transfer process (<https://wawf.eb.mil>).

Add Marks

When a new physical mark is added to an item, the item's IUID registration record needs to be updated. Use the Add Marks function to add this information. When **Add Marks** is selected, the Update IUID - Marks, page is displayed as shown in Figure 5-59.

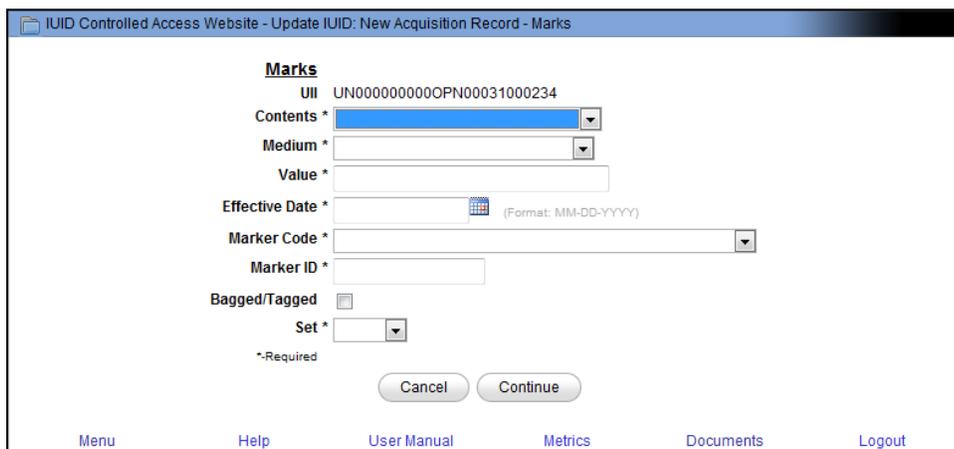

Figure 5 - 59. Update IUID – Marks Page

Add Marks data. All fields are required. See [Appendix B](#) for data field explanations. When satisfied with entries, click on the **Continue** button. The Update IUID Record Information page is displayed with the new data added as shown in Figure 5-60.

Marks Add									
Contents	Medium	Value	Marker Code	Marker ID	Bagged/ Tagged	Effective	Removed	Set	
UID	2D COMPLIANT	UN187575592345678	UN	187575592	N	03-19-2010		SET 1	Remove
CONTRACT NUMBER	2D COMPLIANT	BPN20390A	UN	187575592	Y	01-31-2011		SET 1	Remove

Figure 5 - 60. IUID Update Record Information Page—Marks

Click on the **Finish** button at the bottom of the IUID Update page, [Figure 5-52](#). An IUID Updated message is displayed as shown in [Figure 5-56](#).

Note: Marks are critical for identifying items. Please enter all physical marks.

Remove Marks

Note: IUID Registry does not allow the removal of a Mark if doing so violates the Marks rules as listed on [Page 27](#).

Marks can be removed from an item by clicking on the Remove link. However, you must first add another mark or IUID will display an error. When **Remove** is selected, the Update Marks page is displayed with a required **Removal Date** field added as shown in Figure 5-61.

Figure 5 - 61. Marks Removal

To remove the mark data, enter a date either by selecting it from the calendar or by typing it in. Click on the **Continue** button. Click the **Cancel** button to cancel the removal of the mark. When Continue is selected, the date entered is added to the Removed column as shown in Figure 5-62.

Marks Add								
Contents	Medium	Value	Marker Code	Marker ID	Bagged/Tagged	Effective	Removed	Set
CONTRACT NUMBER	HUMAN READABLE	Marksrus	UN	000000000	N	05-29-2008		SET 2
UID	DEFINED	UN0000000000PN00031000234	UN	000000000	N	05-29-2008	12-16-2011	SET 1

Figure 5 - 62. IUID Update Page—Mark Removed

Click on the **Finish** button at the bottom of the IUID Update page, [Figure 5-52](#). An IUID Updated message is displayed as shown in [Figure 5-55](#).

Add Rollover

When **Add Rollover** is selected, the Update IUID:GFP Item Record – Rollover page is displayed as shown in [Figure 5-63](#).

Figure 5 - 63. Update IUID – Rollover Page

Enter required data entry fields: Rollover Effective Date, Rollover Type (Batch or Part Number), Rollover Value, Description, Contract Number, Contract Order Number, Contract Number Type, Acquisition Value, and Currency Code. Warranty Indicator is optional. See [Appendix B](#) for data field explanations. When satisfied with entries, click on the **Continue** button. The Update IUID page is redisplayed with the Rollover information added as shown in [Figure 5-64](#).

Rollover Add									
Effective Date	Rollover Type	Rollover Value	Description	Contract Number	Contract Order Number	Contract Number Type	Acquisition Value	Currency	Warranty Indicator
12-16-2011	Part Number	ABC123	Widget part number change	NGC10001A	0001	OTHER AGREEMENT	5000	USD	Yes

Figure 5 - 64. Update IUID Page – Rollover Added

Click on the **Finish** button at the bottom of the Update IUID page, [Figure 5-52](#). An IUID Updated message is displayed as shown in [Figure 5-56](#).

Embed in or Remove from a Parent

When **Add** or **Remove** is selected from the Embed section, the Update IUID Embed Parent page is displayed similar Figure 5-65.

NOTE: All embed actions occur from the perspective of the “child item”. The update is made to the Child Item, not the Parent Item.

Figure 5 - 65. Update IUID – Embed Parent UII Selection Page

Because Add was selected for the example, Embed in Parent is shown. Page will read Remove from Parent when Remove is selected. Enter the Parent UII and the effective date of the change, and click on the **Continue** button. Note: The UII is a case-sensitive code. The Parent is added or removed, and the event is recorded on the Update IUID page as shown in Figure 5-66.

Embedded Add Remove		
Parent UII	Event	Effective Date
UN187575592123123456	Added	12-16-2011

Figure 5 - 66. Embedded Update Recorded

Click on the **Finish** button at the bottom of the Update IUID page, [Figure 5-52](#). An IUID Updated message is displayed as shown in [Figure 5-56](#).

Item Owner

As an item’s ownership is moved from one entity to another, the change is captured in the IUID registry. Click on the **Add** link next to Item Owner to enter ownership information. The Item Owner form is displayed similar to [Figure 5-67](#).

Figure 5 - 67. Item Owner Entry Form

Enter an effective date. Select DoD entity and DoD status or Federal Entity from the drop-down lists. See [Appendix B](#) for field explanations. When satisfied with entries, click the **Continue** button.

The item owner information is recorded on the Update IUID page similar to [Figure 5-68](#).

Item Owner Add		
Effective Date	DoD or Federal Entity	DoD Status
02-03-2011	DEFENSE ACQUISITION UNIVERSITY (DAU)	ACTIVE

Figure 5 - 68. Item Owner Information Displayed

Special Tooling or Test Equipment

Note that Special Tooling or Special Test Equipment information is required on update if not already recorded.

The next section displayed is the Special Tooling or Special Test Equipment page similar to Figure 5-69.

Special Tooling or Special Test Equipment

Effective Date * (Format: MM-DD-YYYY)

Status *

* - Required

Cancel Continue

Menu Help User Manual Metrics Documents Logout

Figure 5 - 69. Special Tooling or Special Test Equipment Entry Form

Select an effective date from the calendar, and then select a status from the drop-down menu. Options are Not Special Tooling or Test Equipment, Special Test Equipment (STE), and Special Tooling (ST). When satisfied with entries, click the **Continue** button.

The Special Tooling or Test Equipment information is recorded on the Update IUID page similar to Figure 5-70.

Effective Date	Status
01-21-2011	SPECIAL TEST EQUIPMENT (STE)

Figure 5 - 70. Special Tooling or Test Equipment Displayed

Type Designation

Changes to an item's type designation can be recorded in the Update function of the IUID registry. Click on the **Add** link next to Type Designation to display the Type Designation form similar to Figure 5-71.

Figure 5 - 71. Type Designation Entry Form

Enter the effective date of the designation, select the Type Designation Method from the drop-down menu, and enter the Type Designation Value. Then click **Continue**. See [Appendix B](#) for field explanations. Selections include the following:

- Aerospace Engines, Airbreathing (MIL-HDBK-1812)
- Aerospace Engines, Non-airbreathing (MIL-HDBK-1812)
- Aerospace Equipment and Support Equipment (MIL-HDBK-1812)
- Army Nomenclature System (MIL-STD-1464A)
- Groups and Units (MIL-HDBK-1812)
- Joint Electronics Type Designation System (A/N) (MIL-STD-196E)
- Naval Vessel Registration System (SECNAV INSTRUCTION 5030.8)
- Naval Vessel Registration System (SECNAV Instruction 5030.8)
- Navy Mark/Mod Nomenclature System (MIL-STD-1661)
- Photographic Equipment (MIL-HDBK-1812)
- U.S. Military Aerospace Vehicle Designation – Aircraft (DoD Directive 4120.15)
- U.S. Military Aerospace Vehicle Designation – Missiles, Rockets, Probes, and Satellites (DoD Directive 4120.15).

Condition

Changes to an item's condition are recorded in the Condition section of the record. There are two types of conditions: supply or disposal. The Condition page allows recording of the Condition type, the condition code, and the effective date of the condition code. Both a supply and a disposal code may be needed to provide the correct overall condition. The Condition Codes available on the drop-down menu will depend on the Type of Condition selected.

If an item whose condition status changes contains embedded items, the condition of each embedded item shall be updated with the same condition status.

Click **Add** next to the Condition heading. The Condition page is displayed similar to Figure 5-72.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Update IUID: New Acquisition Record - Condition". The form contains the following fields and controls:

- Condition** (Section Header)
- Effective Date ***: A text input field with a calendar icon and the text "(Format: MM-DD-YYYY)".
- Type ***: A dropdown menu with "SUPPLY" selected.
- Condition ***: A text input field with a dropdown arrow.
- ** Required**: A note indicating that the asterisked fields are required.
- Buttons**: "Cancel", "<<Back", and "Continue".
- Footer**: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout" links.

Figure 5 - 72. Update – Condition

Enter Effective Date, Type, and Condition. Then click the **Continue** button. The Condition is recorded on the Update IUID page similar to Figure 5-73.

The screenshot shows a table with the following data:

Effective Date	Type	Condition	Add	Code
12-16-2011	SUPPLY	SERVICEABLE (ISSUABLE WITHOUT QUALIFICATION)		

Figure 5 - 73. Condition Added

Life Cycle Event

When an item leaves DoD inventory, its status, or life cycle event, can be changed in IUID. To record a life cycle event to an item, click on the **Add** link next to Life Cycle Event. The Update IUID – Life Cycle Event page is displayed as shown in Figure 5-74.

Figure 5 - 74. Update IUID: Life Cycle Event Page

The following fields are mandatory: Event and Event Date. Enter necessary information in the area that is relevant to the event. Note that one of CAGE, DoDAAC/MAPAC, DUNS, or Site is required for Life Cycle Event Location. Life Cycle Event Location is used for the location that an event happened, for example, where the item was destroyed. One of CAGE, DoDAAC/MAPAC, DUNS, or Organization is required for Life Cycle Event Recipient. Life Cycle Event Recipient is used when the item has changed locations, for example, the item has been donated to an organization. Name, country, and one of city or state are required when organization is selected as the Life Cycle Event Recipient. In addition, if the Life Cycle Event is SOLD-FOREIGN GOVT, then the Recipient Organization Country is a required field. See [Appendix B](#) for more information.

Update IUID

NOTE: Life Cycle Events are not used to report custodial transfers of Government Furnished Property. The [Add Custody](#) function discussed on [page 51](#) should be used to report a UII's custodial activity.

Select an event from the Event drop-down menu. Possible events include: abandoned, consumed, destroyed by accident, destroyed by combat, donated, exchanged – repair, exchanged – sold, exchanged – warranty, expended – experimental/target, expended – normal use, leased, loaned, lost, reintroduced, retired, scrapped, sold – foreign government, sold – historic, sold – nongovernment, sold – other federal, sold – state/local, and stolen. Definitions of these events are available on the second tab of the UID Elements Structure at: http://www.acq.osd.mil/dpap/pdi/uid/attachments/IUID_elements_structure_v4_1.0.xls.

Enter all data as pertains to the life cycle event of the UII. When satisfied with entries, click on the **Continue** button. The Update IUID page is displayed with the Life Cycle Event section appearing similar to Figure 5-75.

LifeCycleEvent Add							
Event	Event Date	Recording Entity Code	Recording Entity Identifier	Source Document	System UID	Location	Recipient
RETIRED	01-31-2011	D	90536			CAGE: 90536 DoDAAC/MAPAC: DUNS: City: State: Postal Code: Country: Other:	CAGE: DoDAAC/MAPAC: DUNS: Name: City: State: Postal Code: Country:

Figure 5 - 75. Life Cycle Event Added

Note: In the event that DLA Disposition Services has possession of the item, Disposal activities may enter the Life Cycle Event update. They do not need to notify the contractor or legacy submitter.

When all sections have been updated and added to, the Update IUID Record Information Page now appears similar to Figure 5-76.

Figure 5 - 76. Updated IUID Page

Update IUID

Click on the **Finish** button at the bottom of the Update IUID Page. A message is displayed as shown in [Figure 5-56](#).

Return to the menu page by clicking on the **Return to Main Menu** button, or select another IUID by clicking on the **Update another IUID** button.

5.3.3.3 Correct IUID

Use the Correction function to modify or remove existing data, static or dynamic, that was entered in error. Static data corrections include entering data missing from the initial item entry such as Acquisition Cost or Acceptance Date or changing existing values. Corrections can be made to an IUID record for 60 days after it is initiated.

The Correction function is the only place where the item's entire record or one or more events can be deleted. This action permanently removes the record as if it was never entered. Note that a record that has ever had an embedded record may not be deleted or corrected by the user. Contact the Help Desk for assistance with items that have had embedded records associated with them.

Important: Deletions can be made only if the item has no embedded items or has had no updates or corrections.

Note: Use the Update IUID option to enter new Life Cycle Events.

Legacy User Correct IUID Note: A Legacy user may correct any UIIs that were entered by a user that is related to the same organization; that is, the users signed up for one or more of the same DoDAACs in BRS.

Contractor User Correct IUID Note: A Contractor user may correct any UIIs that were entered by that user via user ID.

To make corrections to an IUID record in the IUID, Acquisition Contract, and CLIN pages, click on the **Correct IUID** option on the IUID Menu. The Correct IUID: Enter UII page is displayed as shown in [Figure 5-77](#).

Figure 5 - 77. Correct IUID: Enter UII Page

Enter the UII of the item to be corrected and click on the **Continue** button. Note: The UII is a case-sensitive code. The Correct IUID - Record Information page is displayed as shown in [Figure 5-78](#).

Figure 5 - 78. Correct IUID – Record Information Page

Click on the **Correct** button for the area of the page to be corrected. The editable Correct IUID page for that section is displayed.

Correct IUID Section

When **Correct** next to IUID is selected, the Correct IUID page is shown in Figure 5-79.

Figure 5 - 79. Correct IUID Page – IUID Section

Make corrections as necessary. Remember that if the Enterprise Identifier or Serial Number or possibly Batch/Lot number is changed, the suggested UUI will also change. Be sure to click on the new suggested UUI to change it also. Enter a Correction Reason and click **Continue**. The Correct IUID record information page is displayed.

Two notes about Corrections:

1. Any UUI change should necessitate making a Mark correction and a physical Mark fix at the user's end.
2. Part Number Rollovers do not justify a Correction to change a UUI. Rollovers are Updates not Corrections.

Correct Acquisition Contract Section

The Correct IUID:Acquisition Contract page is shown in Figure 5-80.

The screenshot shows a web form titled "IUID Controlled Access Website - Correct IUID: Legacy Record - Acquisition Contract". The form is organized into sections. The "Acquisition Contract" section includes fields for "Acquisition Contract Number" (NGC10001A), "Acquisition Contract Order Number", "Acquisition Contract Number Type" (OTHER AGREEMENT), and "Prime Contractor Identifier" (000000000). The "CLIN" section includes "CLIN/SLIN/ELIN" (0005), "Acceptance Date" (12-15-2011), "Acceptance Location Code" (FB6222), "Acquisition Cost" (50000), "Currency Code" (United States of America dollar (\$) (USD 840)), and "Unit of Measure" (EA). There is a "Correction Reason" field with an asterisk indicating it is required. At the bottom of the form are "Cancel" and "Continue" buttons. A footer contains links for "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 80. Correct IUID Page – Acquisition Contract Page

Note: Embedded items inherit their parent’s Acquisition Contract information at the time of acceptance; therefore, if you want to correct Acquisition Contract information on an embedded item, you must go to the parent item first and correct the information there. Corrections made to the parent item’s Acquisition Contract information are automatically changed in the embedded item. Corrections cannot be made to the child Acquisition Contract information for items entered as New:Embedded. Embedded end items do not inherit ACQ info and, therefore, can be corrected.

The Custody, Marks, Rollover, Embedded, and Lifecycle Event sections are displayed at the bottom of the Correct IUID page. These sections will be editable according to the access of the contractor and the status of the item. A correct link or delete link will be displayed in each section that may be corrected. The Marks section will be used as an example of the correction process.

Correct Marks Section

Select the **Correct** link in the Marks section to display the Correct IUID page – Marks page as shown in Figure 5-81.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Correct IUID: Legacy Record - Marks". The form contains the following fields and controls:

- Marks** (Section Header)
- UII**: UN000000000123444
- Contents ***: A dropdown menu with "IUID" selected.
- Medium ***: A dropdown menu with "HUMAN READABLE" selected.
- Value**: UN000000000123444
- Effective Date ***: 12-15-2011 (with a calendar icon and "(Format: MM-DD-YYYY)")
- Removal Date ***: (with a calendar icon and "(Format: MM-DD-YYYY)")
- Marker Code ***: A dropdown menu with "UN - DUNS" selected.
- Marker ID ***: 000000000
- Bagged/Tagged**: An unchecked checkbox.
- Set ***: A dropdown menu with "SET 3" selected.
- Correction Reason ***: A large text area for entering the reason.
- *-Required**: A note indicating which fields are mandatory.
- Buttons**: "Cancel" and "Continue" buttons.
- Footer**: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout" links.

Figure 5 - 81. IUID Correction Page – Marks

Make corrections, enter correction reason, and click on the **Continue** button.

Use the **Delete** link to remove a Mark from an item. Note: IUID Registry does not allow the removal of a Mark if doing so violates the Marks rules as listed on [Page 27](#). Error messages will be displayed as described in [Section 5.7](#) of this SUM.

If a mark is changed to Medium "Defined", a physical mark is required. The Marks Correction page is redisplayed with a message at the top, "DEFINED IUID Mark recorded. Physical Mark required" similar to [Figure 5-42](#). Enter a physical mark and correction reason, and click the **Continue** button.

Correct Embedded

To make a correction to the Embedded Parent, click on the **Correct** link in the Embedded section of the Child Items' Record Information page. The Correct Embedded Parent form is displayed similar to Figure 5-82.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Correct IUID: Legacy Record - Embed Parent". The form contains the following fields and controls:

- Correct Embedded Parent** (Section Header)
- UII**: UN000000000123444
- Parent UII**: JN0000000000456456
- Effective Date**: 12-16-2011 (with a calendar icon and "(Format: MM-DD-YYYY)")
- Correction Reason ***: A large text area for entering the reason.
- *- Required**: A note indicating which fields are mandatory.
- Buttons**: "Cancel" and "Continue" buttons.
- Footer**: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout" links.

Figure 5 - 82. Correct Embedded Parent Entry Form

Make the necessary corrections and enter a Correction Reason. Click on the **Continue** button when finished. The Record Information page is displayed.

Correct Special Tooling or Special Test Equipment

To make a correction to the Special Tooling or Special Test Equipment section, click on the **Correct** link in that section. The Correct Special Tooling or Special Test Equipment form is displayed similar to Figure 5-83.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Correct IUID: Legacy Record - Special Tooling Or Test Equipment". The main content area is titled "Special Tooling or Special Test Equipment". It contains the following fields:

- Effective Date ***: A date input field with a calendar icon, containing "12-15-2011" and a format hint "(Format: MM-DD-YYYY)".
- Status ***: A dropdown menu with the selected option "NOT SPECIAL TOOLING OR TEST EQUIPMENT".
- Correction Reason ***: A large text area for entering the reason for the correction.

Below the fields is a note "* - Required". At the bottom of the form are two buttons: "Cancel" and "Continue". The footer of the page contains several links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 83. Special Tooling or Special Test Equipment Entry Form

Select an effective date from the calendar, and then select a status from the drop-down menu. Options are Not Special Tooling or Test Equipment, Special Test Equipment (STE), and Special Tooling (ST). When satisfied with entries, click the **Continue** button. The Record Information page is displayed.

Correct Condition

To make a correction to the Condition section, click on the **Correct** link in that section. The Correction IUID Condition form is displayed similar to Figure 5-84.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Correct IUID: Legacy Record - Condition". The main content area is titled "Condition". It contains the following fields:

- Effective Date ***: A date input field with a calendar icon, containing "12-16-2011" and a format hint "(Format: MM-DD-YYYY)".
- Type ***: A dropdown menu with the selected option "SUPPLY".
- Condition ***: A dropdown menu with the selected option "SERVICEABLE (ISSUABLE WITHOUT QUALIFICATION)".
- Correction Reason ***: A large text area for entering the reason for the correction.

Below the fields is a note "* - Required". At the bottom of the form are two buttons: "Cancel" and "Continue". The footer of the page contains several links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 84. Correct Condition Form

Correct IUID

Select an effective date from the calendar, and then select a type and a condition from the drop-down menus. Type options are Supply and Disposal. Conditions will vary according to the Type selected. Each record can have one of each of the types. Enter a Correction Reason. Click **Continue** when entry is complete.

Corrections Completed

After corrections are made, the Correct IUID Record Information page is displayed again showing the new data as shown in Figure 5-85.

Figure 5 - 85. Correct IUID Page – Changes Made

Click on the **Finish** button to complete the correction. The IUID Corrected message is displayed as shown in Figure 5-86.

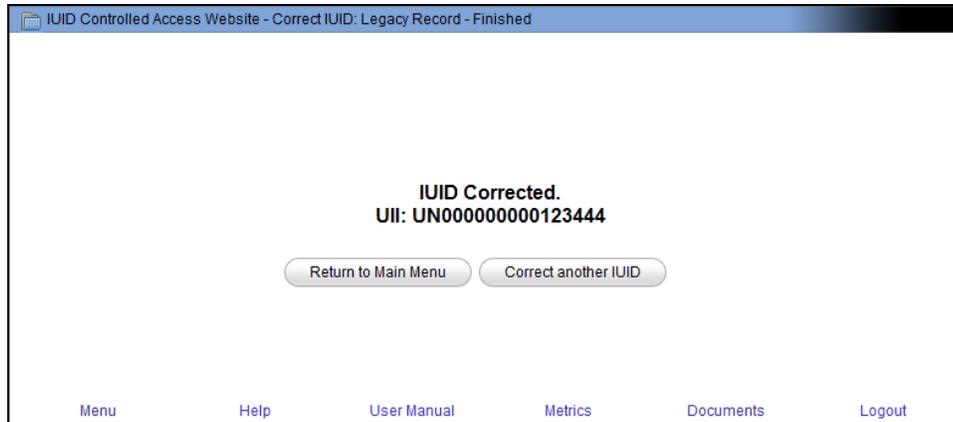

Figure 5 - 86. IUID Corrected Message

Click on the **Return to Main Menu** button to return to the IUID Menu, or click on the **Correct another IUID** button to correct another IUID.

Delete this UII

Click on the **Delete this UII** button at the bottom of the Correct IUID page, [Figure 5-83](#), to delete the record. A confirmation message is displayed similar to Figure 5-87.

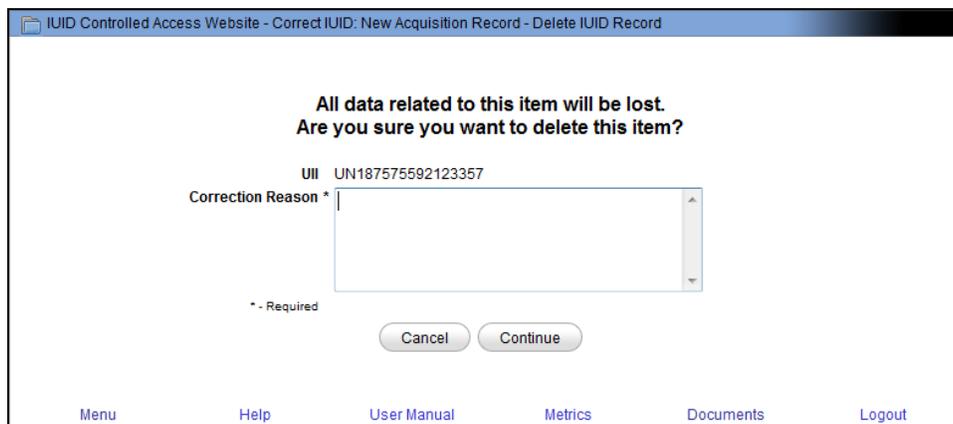

Figure 5 - 87. Delete UII Record

The Correction Reason is required. Enter a Correction Reason in the field provided and click on the **Continue** button. The IUID Main Menu is displayed. Note that a record that currently has or did have an embedded record may not be deleted. In addition, a UII that has been updated or corrected may not be deleted, even within the 60-day window.

5.3.3.4 Update Non-UII GFP

Non UII GFP data is entered into the IUID system through a feed of either Non UII by Document or Non UII by Contract sections of the feed. Non UII data can be anything from information to a bucket of bolts. In the Update Non-UII GFP menu option, the only changes that can be made are to an item's condition. The condition code designations available are supply or disposal. Both a supply and a disposal code may be needed to provide the correct overall condition.

If an item whose condition status changes contains embedded items, the condition of each embedded item needs to be updated with the same condition status.

Select the **Update Non UII GFP** link from the menu. The Update Non-UII GFP – Search screen is displayed similar to Figure 5-88.

Figure 5 - 88. Update Non-UII GFP – Search Screen

Enter a Contract Number for a known Non UII GFP record. Click the **Continue** button. Results are displayed similar to Figure 5-89.

Contract Number	Contract Order Number	Contract Number Type	Attachment Number	Document Number	Transmission Date	Transmission Time	Purchase Card Account Number	Shipment Number	Transfer Document Number	Details

Note that there are only two conditions, Supply and Disposal, and both can be used on the same record. Once both conditions are used, the Add link is no longer available. When satisfied with entries, click on the **Finish** button at the bottom of the page.

5.3.3.5 Queries

The IUID Registry maintains the history of each reported item, and this history is accessible for online queries. Online queries can be made for data from a specified date. That is, if the current date is 02-05-2010 and the request for data is run with an “as of” date 12-31-2009, the data will be provided as of the requested date based on stored effective dates when available and update dates when an effective date is not available. The resulting data returned from a query is determined by the user’s access level.

Queries

Contractor User Query Note: Contractor users may view query results for records that were entered via their user ID or to which their user ID is related via Prime Contract identifier.

About dates: If no date is entered, the system default date for queries will include "tomorrow" to ensure the return data set allows for any time zone shifts. When returning to the input screen a second time, that date will be visible in the field. Also, future dates beyond "tomorrow" may not be used in a query.

The Queries menu page is displayed when **Queries** is selected from the IUID Main Menu as shown in Figure 5-93.

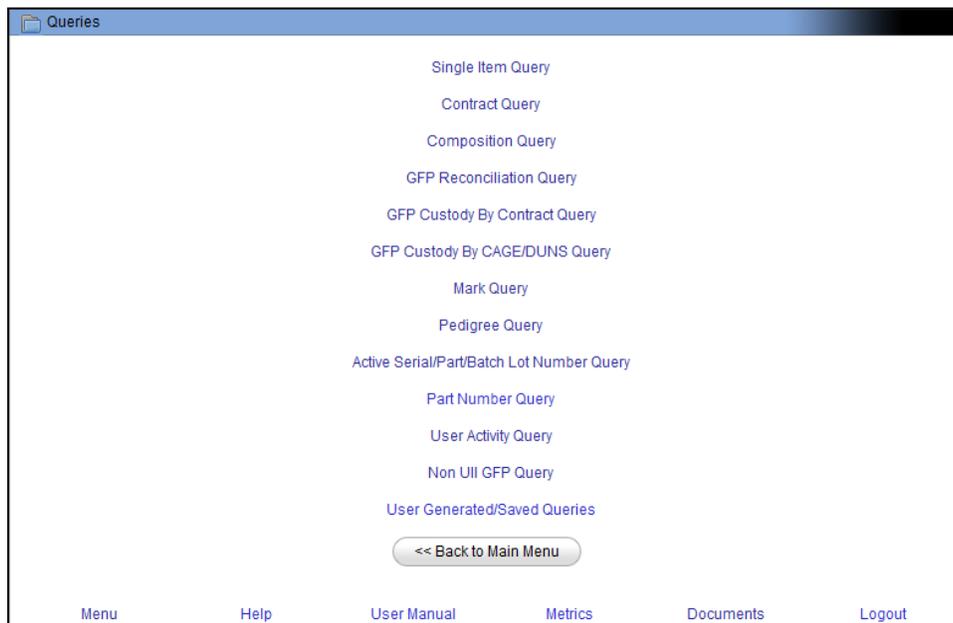

Figure 5 - 93. Queries Menu

The Queries menu contains eleven different query options: Single Item Query, Contract Query, Composition Query, GFP Reconciliation Query, GFP Custody Query by Contract, GFP Custody Query by CAGE/DUNS, Mark Query, Pedigree Query, Active Serial/Part/Batch Lot Number Query, Part Number Query, User Activity Query, Non UII GFP Query, and User Generated/Saved Queries. Clicking the <<**Back to Main Menu** button returns to the Main Menu page.

The following characteristics are common to most queries and result pages*:

1. Each query result page contains Save () and Print () icons in the upper right-hand corner of the screen. Print and Save will only capture what is displayed on the screen.
2. "Loading, please wait." is displayed when a query is submitted.
3. All result screens show type of query and run date and time.
4. All result screens have the option to expand or collapse all data.

Queries

5. The Global Data Toggle plus sign (+) can be used to expand or collapse all the data sections on a page in one click.
6. An option to [Generate the Query offline](#) is available for retrieval of query results at a later time.

* User Activity Query and User Generated Saved Queries are the exceptions to these characteristics.

Save Query Result

Click on the **Save** icon to save the query result as an Excel Spreadsheet to a file on your computer. A File Download dialog box is displayed as shown in Figure 5-94.

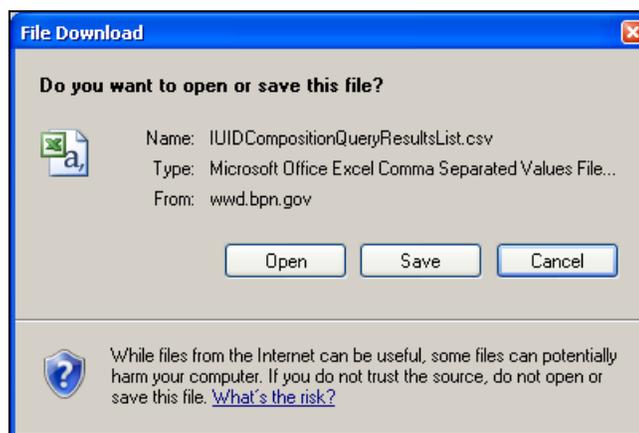

Figure 5 - 94. File Download Dialog Box

Click on the **Save** button to save the file. The data is downloaded and the Save As window is displayed as shown in Figure 5-95.

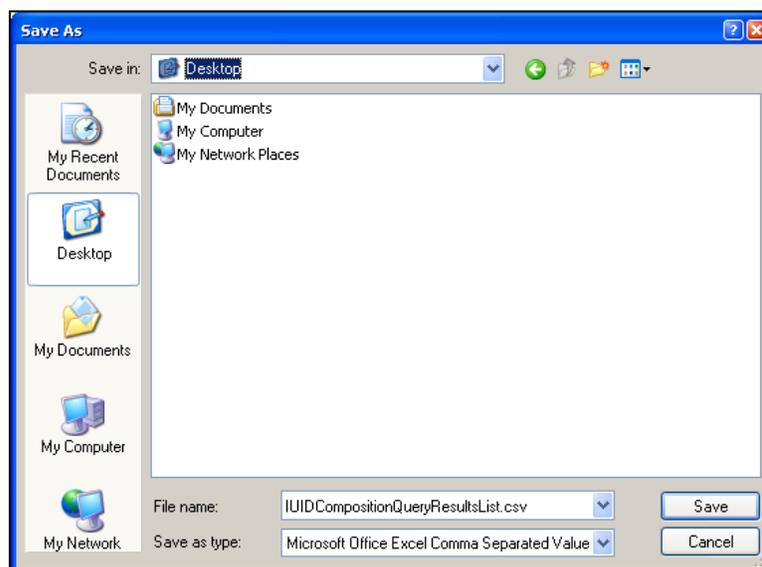

Figure 5 - 95. Save As Window

Select a location to save the file, and enter a file name. Click on the **Save** button. A Download complete dialog box is displayed as shown in Figure 5-96.

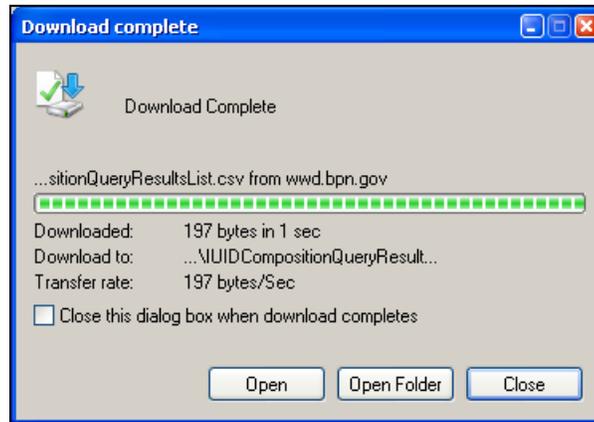

Figure 5 - 96. Download Complete

The file has been saved to the location you specified in the Save As window.

Print Query Result

Click on the Print icon to print the query results. Your system Print dialog box is displayed. Set preferences and select the **Print** button.

Query Result Too Long?

To eliminate the need to visit many pages to save large amounts of data, users now have the ability to download a file in its entirety. Offline queries are retrievable via a link in the user's menu. Based on performance settings, the file may be produced overnight for retrieval the next day. When a query can be performed offline, a **Generate Offline Query** button is displayed on the screen similar to Figure 5-97.

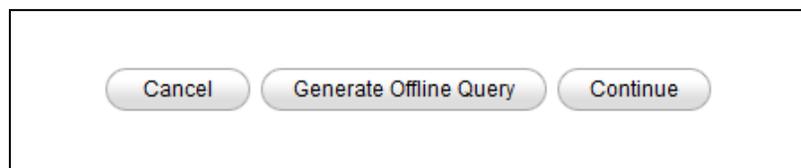

Figure 5 - 97. Generate Offline Query Button

Enter search criteria, and then select the **Generate Offline Query** button. The search screen is redisplayed with a confirmation message at the top, "Offline Query Submitted. Please return to queries menu and then User Generated/Saved Queries once it is finished." To verify the query is being performed, click on the **Cancel** button to return to the Query Menu. Select **User Generated/Saved Queries**. The User Reports page is displayed similar to Figure 5-98 and shows what query was submitted, the current status, date requested, and the date finished.

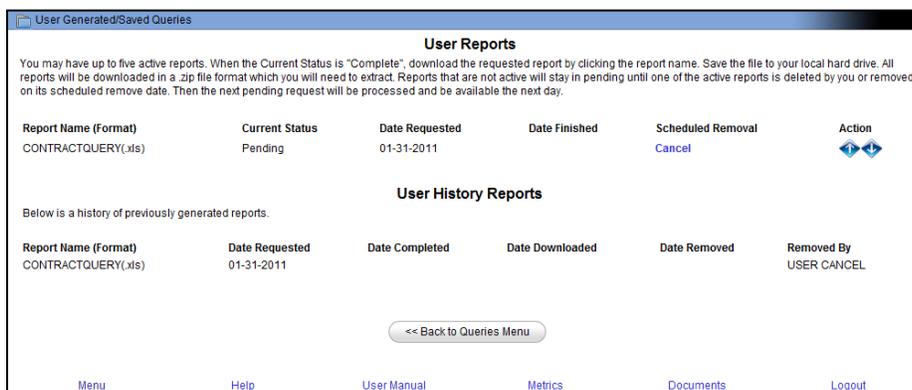

Figure 5 - 98. User Reports

Users may have a maximum of five active reports. Use the Action move up and move down button to move reports up and down on the report list. To download a requested report, click the report name if the Current Status is "Complete" and save the file to your local hard drive. All reports are downloaded in a .zip file format. Extract to view.

Note: Users may have five generated reports sitting on the server for up to seven days. Once a report is seven days old, it is removed from the system. However, a user can have an unlimited number of queued up reports pending processing. As processed reports are removed from the system, the next ones in the queue are processed during the next nightly run.

A report can also be canceled on the User Reports page. A history of previously generated reports is displayed at the bottom of the page.

Single Item Query

The IUID Registry allows a user to search by the UII. A successful query displays all viewable active data for the UII in a tiered manner such that the user can toggle from summaries to detailed information. A successful query shall also display the item's state – New or Legacy, End or Embedded – when it was first loaded into the IUID Registry as well as the most current information for description, part number, and batch/lot number.

The Single Item Query – Search Screen is displayed similar to Figure 5-99 when the **Single Item Query** option is selected from the IUID Queries Menu.

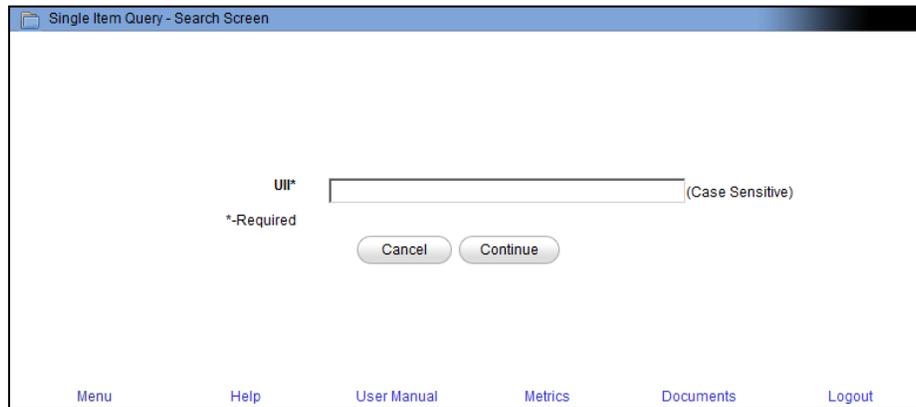

Figure 5 - 99. Single Item Query – Search Screen

To perform a query, enter search criteria UII value. Note: The UII is a case-sensitive code. Search results are displayed on the Single Item Query – Record Information page as shown in Figure 5-100.

Figure 5 - 100. Single Item Query - Record Information Page

Queries

Initial load information, UII, Pedigree, and Contract data pertaining to the UII record are displayed. By default, the expandable sections of the page —Custody, Marks, Rollover, Embedded, Item Owner, Special Tooling or Test Equipment, Condition, and Life Cycle Event—are expanded. Click on the (▣) to collapse that section as shown in the Custody sample in Figure 5-101.

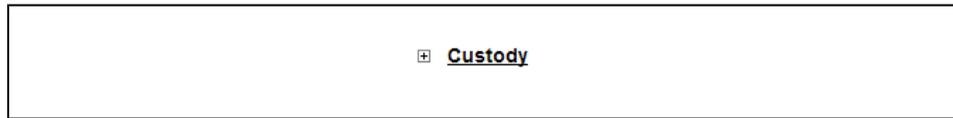

Figure 5 - 101. Custody Section Collapsed

Note that if the item has a National Stock Number (NSN), this number is displayed in the Pedigree section of the Record Information page. An example of this result is shown in Figure 5-102.

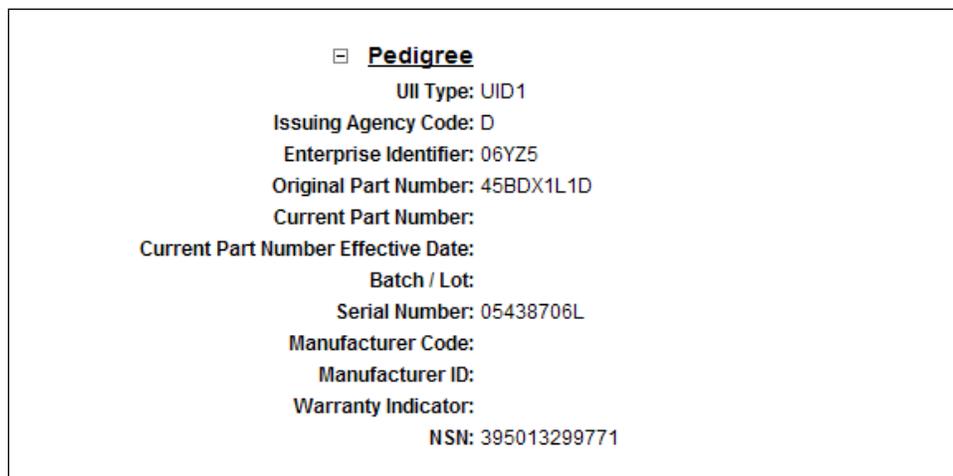

Figure 5 - 102. Record Containing NSN

NSNs are not entered or altered in IUID, nor are they available for all UIIs.

Use the <<**Back** button to return to the previous page. Use the **Save** link to save the record to a file on your computer. Use the **Print** link to print a copy of the record.

If the queried UII is not in the IUID registry, a message is displayed as shown in Figure 5-103.

Figure 5 - 103. UII not in registry Message

Queries

Note: The sample record has children items; therefore, there is a Composition Query – Children link next to the Embedded section heading. A query can be performed by selecting this link. The [Composition Query Result page](#) is displayed as shown in [Figure 5-110](#).

If the queried UII is in the IUID registry but the user does not have a Custodial or Prime Acquisition relationship with the particular record, a Single Item Query – Public View Mode result is displayed similar to Figure 5-104.

Figure 5 - 104. Single Item Query – Public View Mode

Contract Query

The IUID Registry allows a user to ask for a list of all items delivered under a specific contract and for a specific Acquisition Contract Order Number, CLIN/SLIN/ELIN and/or date if provided. If no Acquisition Contract Order Number or CLIN/SLIN/ELIN is provided, then all CLIN/SLIN/ELINS for that contract are listed. The date shall be either an effective date or an activity from date. That is, only one can be provided for a query. The effective date provides all UIIs delivered up to and including the provided date. The activity date shall provide all UIIs that were delivered on and after that date. If no date is provided, then the current date will populate the effective date field. Future dates cannot be used in a query except for the current date plus one.

The result lists each CLIN with the number of items delivered for each. The information displayed for the CLIN includes the number of items, acceptance date, the UII for the item, Type, Description, and Mark Category are displayed. If a CLIN has more than one item, it can be toggled to list the UIIs with their information.

IUID Contract Query allows selection of end items or end items and embedded items. When Yes is selected for End Items Only, only end items are displayed. When No is selected, end items and embedded items are returned on the result list.

The Contract Query – Search Screen is displayed similar to Figure 5-105 when the **Contract Query** option is selected from the IUID Queries Menu.

Figure 5 - 105. Contract Query – Search Screen

When only a Contract Number is entered as search criteria, all CLIN data associated with that contract is returned in the query result similar to Figure 5-106.

CLIN	Items	Acceptance Date	UUI	Type	Description	Mark Category
000123	1	01-15-2009	UN000000000123123321	End	My test item.	2D
0002	1	01-16-2009	UN000000000ABC135	End	Another test item	2D
0004	1	01-22-2009	UN00000000000456789	End	Test item	Defined
0005	1	02-04-2009	UN000000000123321123	End	test	2D
1234	2

Figure 5 - 106. Contract Query – Results List

When CLIN/SLIN/ELIN data is included as search criteria, only that CLIN is included in the Query result as shown in Figure 5-107.

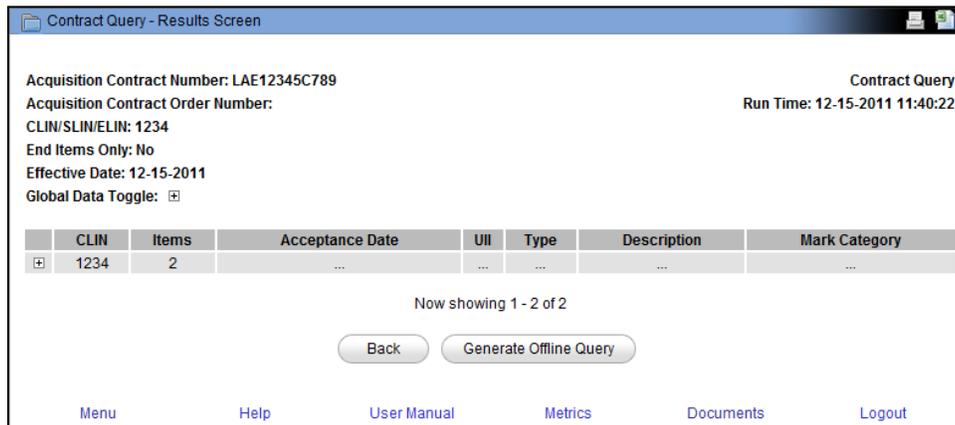

Figure 5 - 107. Contract Number and CLIN Search Result

Click on the **plus sign** next to the CLIN column to display the UIIs associated with the CLIN as shown in Figure 5-108. You can also toggle all records by selecting the **Global Data Toggle button** at the top of the screen under the Effective Date on the left.

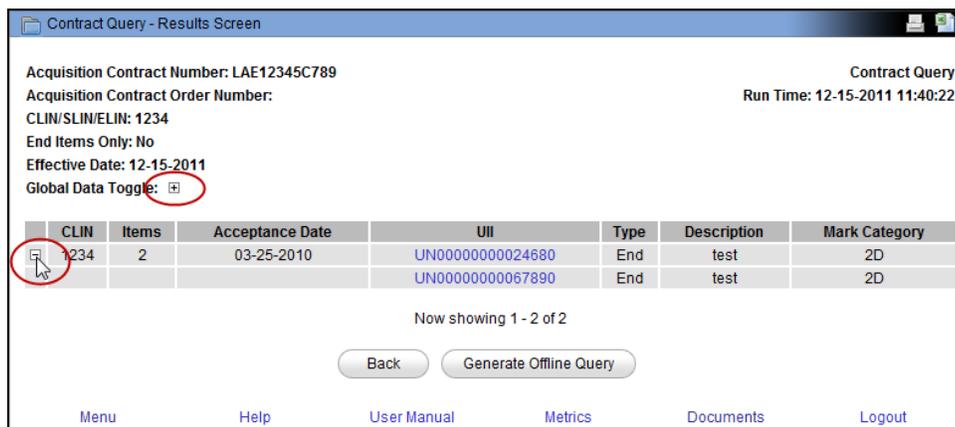

Figure 5 - 108. UIIs Displayed

Click on the UII to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#).

Note: Search results contain only the IUID information that the user has a custodial or prime acquisition relationship with or any record of which the user has custody through a DoDAAC related to the user's CAGE or DUNS or have entered under that user ID.

An unsuccessful search displays a message similar to Figure 5-109.

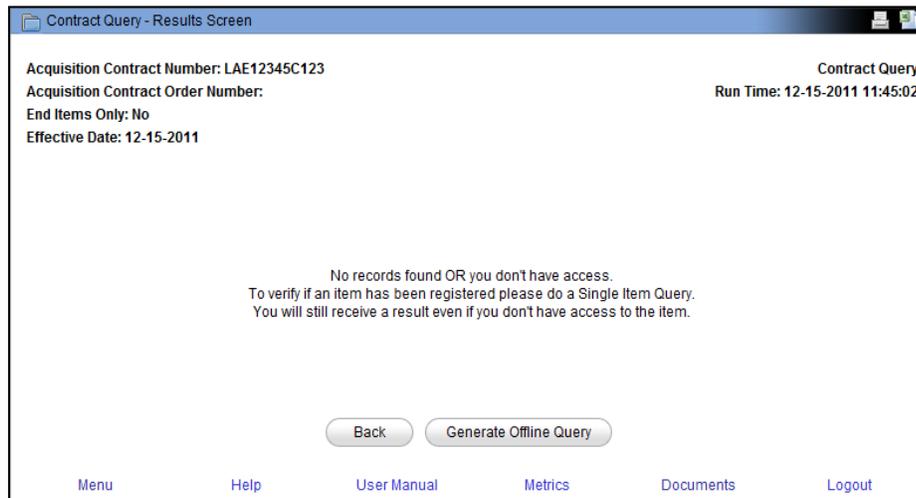

Figure 5 - 109. No Records Found Message

Either there are no records containing your search criteria, or you do not have the needed access. To verify that an item has been registered, please do a Single Item Query. You will still receive a result even if you do not have access to the item.

Composition Query

The IUID Registry provides the capability to show all items embedded within the provided item along with the items embedded in those items. The initial return of a query for children displays the first two embedded levels under the provided UII. If there are additional embedded levels, the query has a toggle capability to show those levels.

The Composition Query – Search Screen is displayed similar to Figure 5-110 when the **Composition Query** option is selected from the IUID Queries Menu.

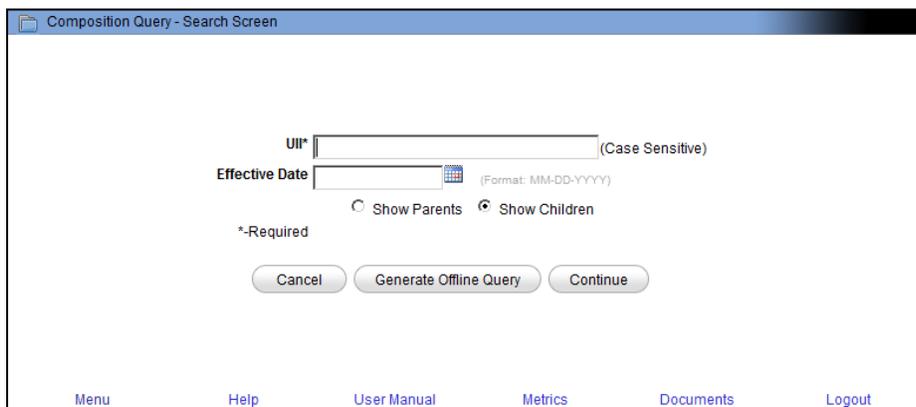

Figure 5 - 110. Composition Query – Search Screen

Queries

Enter a UII and a date as well as select whether you want parents or children shown in the results. Remember that the UII is a case-sensitive code. If no date is provided, the IUID Registry will default to the current system date. The IUID Registry will provide the composition that was in place on that date. Future dates cannot be used in a query except for the current date plus one. Click on **Continue** to perform the query.

The query displays the UII and the first line of the description of each item in the structure and depicts the relationship of each item to any parent and/or children in parent to child order. Thus, if the query was looking for the parents of a UII, the UII would be at the bottom of the query results as shown in Figure 5-111.

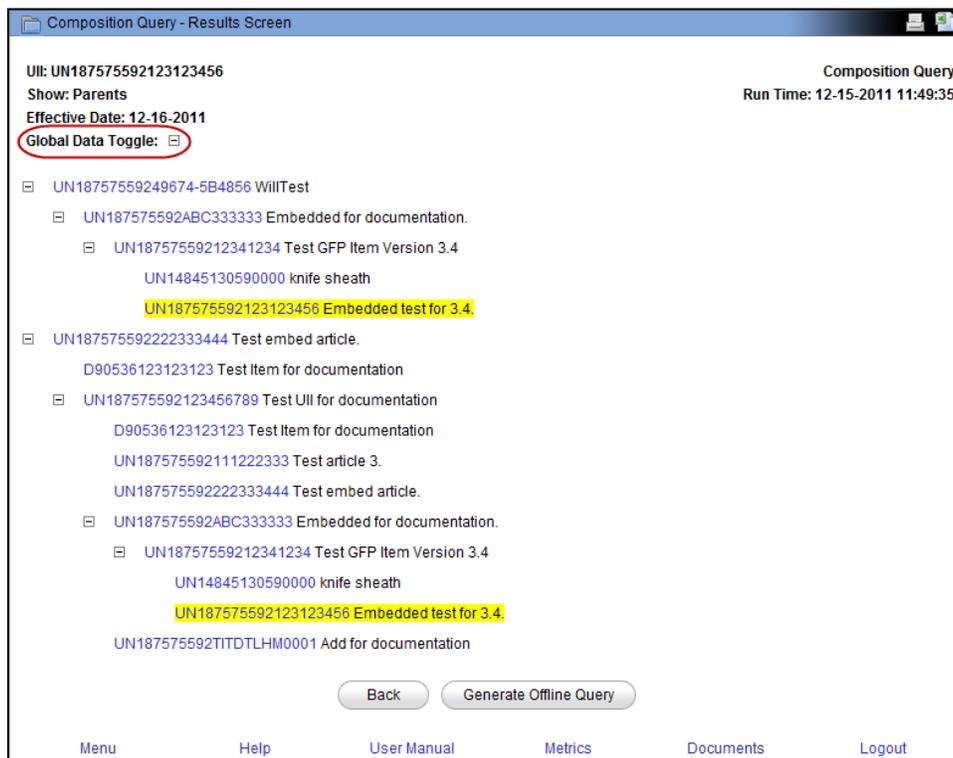

Figure 5 - 111. Composition Query Results for Parents of UII

The IUID Registry shows all parents of the provided item in response to a query for an item's parents.

If the query is looking for the children, the UII is at the top of the query results as shown in Figure 5-112. Note that only the first two levels of children are displayed. After that, levels are minimized. Click the **Plus** button to expand further child levels. You can also toggle all records by selecting the **Global Data Toggle button** at the top of the screen under the Effective Date on the left.

Figure 5 - 112. Composition Query Results for Children of UUI

The UUI provided for the query, whether the search was for parents or children, effective date and run time including the date are displayed at the top of the Query page.

Click on the UUI to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#). If the user does not have access to those UUIs, they will be grayed out and inactive.

An unsuccessful search displays a message similar to [Figure 5-107](#). Perform a Single Item Query to verify the item is registered.

GFP Reconciliation Query

The GFP Reconciliation Query provides information on current custodial status for all items in the IUID registry under a given contract.

Select the **GFP Reconciliation Query** option from the Query menu. The GFP Reconciliation Query screen is displayed similar to Figure 5-113.

Figure 5 - 113. GFP Reconciliation Query - Search Screen

Enter a Custodial Prime Contractor ID. Enter a CAGE or DUNS for a list of all associated contracts and items. Enter a CAGE or DUNS with a Contract Number and/or Custodial Contract Order Number for a list of items on that contract or order. Result Type is an optional selection: Items with UIIs or Items without UIIs. Click on the **Continue** button. The GFP Reconciliation Query – Results Screen is displayed as shown in Figure 5-114.

Contract Number	Contract Order Number	UII	Description	Status	Effective Date
BPN20390A		D0AKW0123654456	Test item 3	At Government	05-29-2008
		UN000000000123456	test article	At Government	05-29-2008
		UN000000000123654	Test embedded item	At Government	05-29-2008
		UN000000000234789	Test item.	At Government	05-29-2008

Figure 5 - 114. GFP Reconciliation Query – Results List

This result shows a list of contract numbers. If a contract number had been included in the search, only items under that contract number would be listed in the contract number column.

Click on the UII to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#). If the user does not have access to those UIIs, they will be grayed out and inactive.

Status Column Explanation

At Contractor means that the item is currently in the contractor’s custody under that contract. Note: An item may appear under more than one contract, but it won’t show “At Contractor” for more than one contract at a given time.

At Government means that the contractor is not currently responsible for the item under that contract. It has been returned to the government or transferred to another contract or contractor.

A **Life-Cycle Event** (ex. SCRAPPED) will show in the status column if the item experienced the event while in contractor custody, and the Life-Cycle Event terminated the custody.

If the contractor submitted Non-UII data, that information will be available on the Non-UII Results tab. Click on the **Non-UII Results** tab to view this screen similar to Figure 5-115.

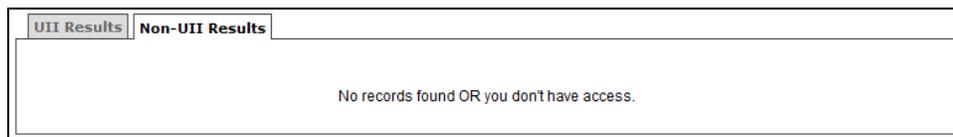

Figure 5 - 115. Non-UII Results GFP Reconciliation Query

If records are found on the Non-UII Results tab, they will include quantity, unit of measure, status, and effective date.

An unsuccessful search displays a message similar to [Figure 5-107](#).

GFP Custody Query by Contract

The IUID Registry allows the user to enter a contract number under which items have been furnished as GFP, a custodial contract order number, and an effective date and display all UIIs and their descriptions, the GFP prime contractor, and the sent and received dates. The GFP Custody query provides the same information as that provided under the Composition Query for children. Children can be viewed using the “View Children” link on the query results page. In addition, non-UII GFP data can also be viewed in the GFP Custody Query – Contract.

The GFP Custody Query by Contract – Search Screen is displayed similar to Figure 5-116 when the **GFP Custody Query by Contract** option is selected from the IUID Queries Menu.

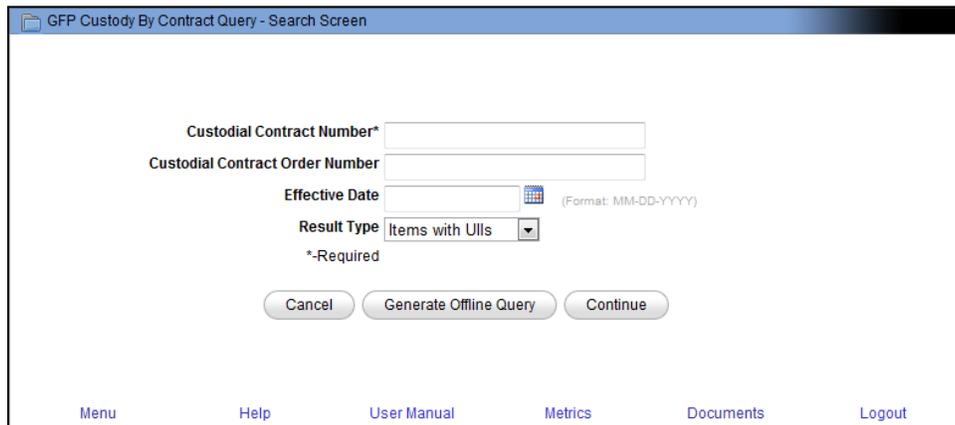

Figure 5 - 116. GFP Custody by Contract Query – Search Screen

Enter Custodial Contract Number. Entering the Custodial Contract Order Number and Effective Date is optional. If no date is entered, the system default date for queries will include "tomorrow" to ensure the return data set allows for any time zone shifts. Future dates beyond “tomorrow” may not be used in a query. Click on the **Continue** button. Query results are displayed as shown in Figure 5-117.

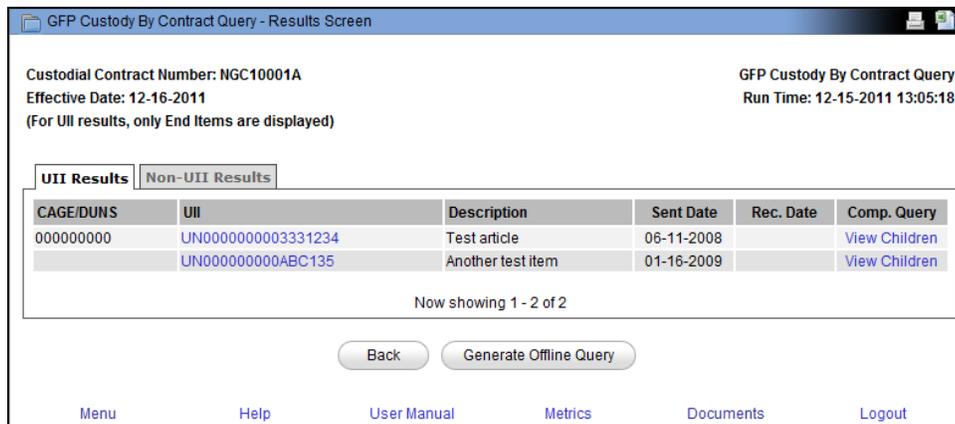

Figure 5 - 117. GFP Custody by Contract Query Result

The initial query returns only the applicable end items, not embedded items. For users with Contractor Access, only items that are in the custody of the contractor as of the date entered and items the user originally entered via user ID are provided.

The Ull and Comp. Query columns contain links on the GFP Custody by Contract Query result screen. Click on the Ull to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#). Select the View Children link in the Comp. Query column to display the same information provided under the Composition Query for children as of the report date similar to [Figure 5-110](#).

Queries

If the contractor submitted Non-UII data, that information will be available on the Non-UII Results tab. Click on the **Non-UII Results** tab to view this screen similar to [Figure 5-113](#). When results are displayed, they include sent date, received date, quantity, unit of measure, NSN, part number, and serial number.

An unsuccessful search displays a message similar to [Figure 5-107](#).

GFP Custody Query by CAGE/DUNS

The IUID Registry allows the user to enter a date and a CAGE or DUNS and display all UIIs provided as GFP along with the GFP Contract Number, Contract Order Number, the UII's description, the sent date, and received date. The results are sorted by CAGE/DUNS then by the GFP Contract Number, then by UII. For those with Contractor Access, only items that are in the custody of the contractor as of the date entered are provided. The GFP Custody Query – CAGE/DUNS initial query returns only the applicable end items, not embedded items. Results include any items in the custody of a DoDAAC associated with the CAGE or DUNS entered. In addition, this query provides the same information as that provided under the Composition Query for children.

The GFP Custody by CAGE/DUNS Query – Search Screen is displayed similar to [Figure 5-118](#) when the **GFP Custody Query by CAGE/DUNS** option is selected from the IUID Queries Menu.

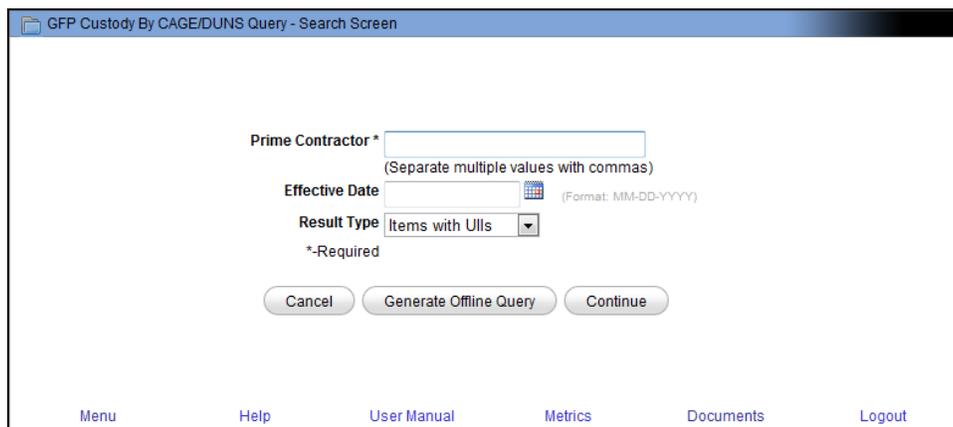

Figure 5 - 118. GFP Custody by CAGE/DUNS Query - Search Screen Page

Enter a CAGE or DUNS in the **Prime Contractor** field. Multiple values can be added; separate with commas. Type a date in the Effective Date field or select a date from the calendar. If no date is provided, the current date is used. Future dates cannot be used in a query except for the current date plus one. Result Type is an optional selection: Items with UIIs or Items without UIIs. Click on the **Continue** button. Query results are displayed as shown in [Figure 5-119](#).

Prime Contractor: 000000000
Effective Date: 12-16-2011
(For UII results, only End Items are displayed)

GFP Custody By Contractor Query

Figure 5 - 119. GFP Custody by DUNS/CAGE Query Results

The results are sorted by the CAGE/DUNS then by the GFP contract number then by UII. For users with Contractor Access, only items that are in the custody of the contractor as of the date entered and items the user originally entered via user ID are provided.

UII and Comp. Query are links on the GFP custody by DUNS/CAGE Query result screen. Click on the UII to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#). Select the View Children link in the Comp. Query column to display the same information provided under the Composition Query for children as of the report date similar to [Figure 5-110](#).

If the contractor submitted Non-UII data, that information will be available on the Non-UII Results tab. Click on the **Non-UII Results** tab to view this screen similar to [Figure 5-113](#). When results are displayed, they include sent date, received date, quantity, unit of measure, NSN, part number, and serial number.

An unsuccessful search displays a message similar to [Figure 5-107](#).

Mark Query

The IUID Registry provides the capability to search all active marks by one or more mark contents/mark value pairs and return all matching UII items with their descriptions and active marks. If multiple pairs are provided, all returned items must have an active mark for each of the provided mark contents/mark value pairs.

The Mark Query – Search Screen is displayed similar to Figure 5-120 when the **Mark Query** option is selected from the IUID Queries Menu.

Figure 5 - 120. Mark Query Page

For single Mark entries, enter single Mark Contents and Mark Value pair and click on the **Continue** button. The search result is displayed on the Mark Query results page as shown in Figure 5-121.

UUI	Description	Contents	Medium	Value	Eff. Date
UN000000000234789	Test item.	CONTRACT NUMBER	2D COMPLIANT	NGC10001A	05-29-2008
	Test item.	UID	DEFINED	UN000000000234789	05-29-2008

Figure 5 - 121. Mark Query Result

The multiple entry fields are used to help find the item you are looking for. For example, you want to find an item marked with a Serial Number and Part Number. Use both of these marks for the query to narrow down the search for the one item you are looking for.

The Mark Query screen allows for four Mark Content and Mark Value pairs initially. If the item has more than four multiple marks, enter Mark Contents and Mark Value in the Mark Query page and click on the **Show Additional Criteria** link. Another set of text-entry fields is displayed as shown in Figure 5-122.

Mark Contents *	Mark Value *	
UID	UN969378629333333	and
DATE OF MANUFACTURE	12312007	and
MANUFACTURER NAME	Government Sponsored Test Articles	and
CONTRACT NUMBER	ABC12345XYZ	and

* - Required [Hide additional criteria](#)

Figure 5 - 122. Add More Criteria Selected

Enter other Contents and Value pairs as many times as necessary. Use the **Hide additional criteria** link to hide the extra the Marks Contents/Mark Value pair fields. When satisfied with entries, click on the **Continue** button. The query result is displayed similar to Figure 5-123.

Figure 5 - 123. Multiple Marks Query Result

Click on the **UUI** to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#).

An unsuccessful search displays a message similar to [Figure 5-107](#).

Pedigree Query

The IUID Registry provides the capability to search all items by any combination of Enterprise Identifier, Part Number, Serial Number, and Batch/Lot from an item's pedigree data. If the user has contractor access and the search criteria contain a part number or batch/lot with no serial number, the returned data is limited to those items which the querying contractor agency recorded in the registry.

Queries

The Pedigree Query – Search Screen is displayed similar to Figure 5-124 when the **Pedigree Query** option is selected from the IUID Queries Menu.

Figure 5 - 124. Pedigree Query - Search Screen

Enter one or any combination of Enterprise Identifier, Serial Number, Part Number, and Batch/Lot from an item's pedigree data.

When the query result returns multiple UIIs, the Pedigree Query result page is displayed similar to Figure 5-125.

UII	Description	Mark Category
UN861017291001-007915A03010979979	CO-0190-09 TEST	2D
UN861017291001-007915A03010979980	CO-0190-09 TEST	2D
UN861017291001-007915A03010979981	CO-0190-09 TEST	2D

Figure 5 - 125. Pedigree Query Multiple Results

The Pedigree Query Results List page includes the UIIs returned with their description and mark category data.

Note: Only the IUID information that you have a Custodial or Prime Acquisition relationship with is displayed.

Click on the **UII** to display the same information as that provided under the [Single Item Query](#) as of the report date as shown in [Figure 5-98](#).

An unsuccessful search displays a message similar to [Figure 5-107](#). Perform a Single Item Query to verify the item is registered.

Active Serial/Part/Batch Lot Number Query

The Active Serial/Part/Batch Lot Number Query option is only available to users with government access. IUID provides the capability to search all items by UII, Serial Number, Part Number or Batch/Lot. Based on the category and corresponding part number effective dates, the provided part number is checked against the Current Part Number from the pedigree section, and/or Marks identified as part numbers.

The Active Serial/Part/Batch Lot Number Query – Search Screen is displayed when **Active Serial/Part/Batch Lot Number Query** is selected from the Queries Menu as shown in Figure 5-126.

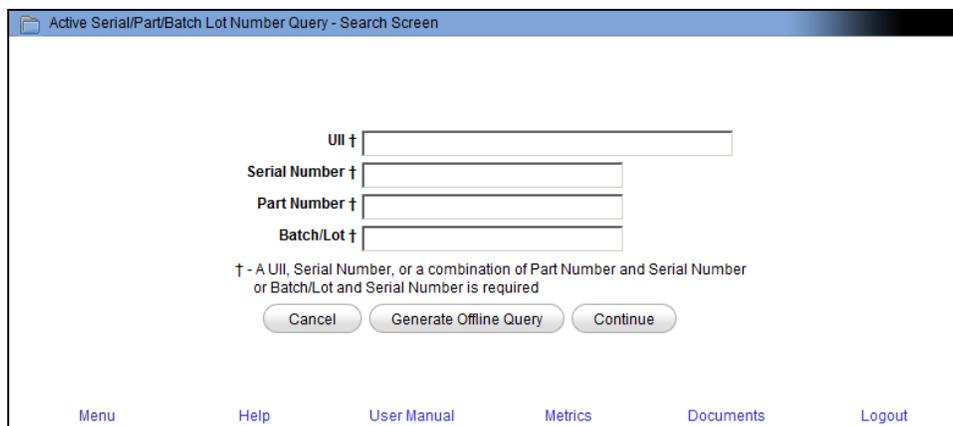

Figure 5 - 126. Active Serial/Part/Batch Lot Number Query – Search Screen

Enter a UII, Serial Number, or a combination of Part Number and Serial Number or Batch/Lot and Serial Number for query. Click on the **Continue** button.

If a serial number, a part number/serial number combination, or a batch/lot/serial number combination is provided, the IUID Registry shall return all UIIs that match the criteria. Serial numbers are checked against the pedigree Serial Number and against marks identified as serial numbers. Part numbers are checked against the Current Part Number and Original Part Number from the pedigree section, part number rollovers, and marks identified as part numbers. Batch/lot is checked against the pedigree batch/lot, batch/lot rollovers, and marks identified as batch/lot numbers. Both active and inactive data is checked.

If a single UII that matches the search criteria is found in the IUID Registry, the IUID Registry determines which part number, serial number, batch/lot, and description is the most current and active. The IUID Registry displays the current part number, serial number, batch/lot, and description as well as a label stating where it is located on the item’s record. The IUID Registry displays the part number, serial number, and batch lot number data in separate sections on the results page similar to Figure 5-127.

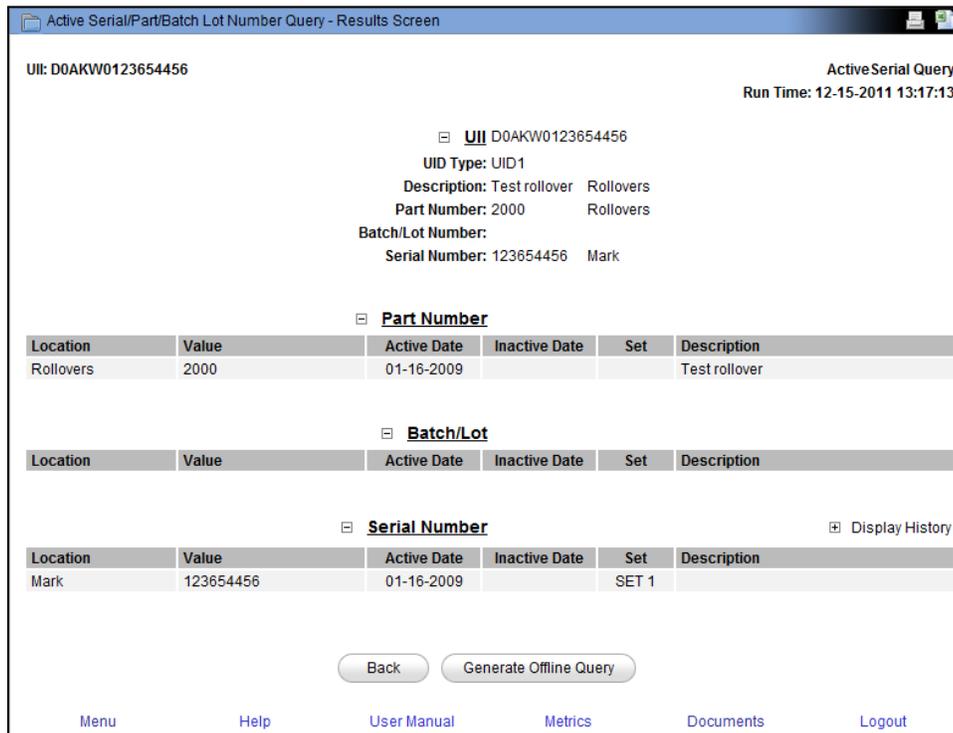

Figure 5 - 127. Active Serial/Part/Batch Lot Number Query Results List Page

The Results List page provides descriptive information about the UII and lists also Part Number, Batch/Lot, and Serial Number information. Note that the search criteria are displayed on the results page in the upper left corner.

History data, if viewable, is not displayed with the initial results but is available when toggled.

If more than one UII satisfies the search criteria, the UIIs and their most current, active description are provided. The IUID Registry provides the capability to click on an individual UII and provide the same information that would have been provided if a single UII satisfied the search criteria. Close the detailed screen to return to the same screen position that you clicked from.

When the print or file option is selected, only what is displayed on the screen is printed or saved.

An unsuccessful search displays a message similar to [Figure 5-107](#).

User Activity Query

The IUID Registry allows a user to retrieve a list of all entries made by that user. The user may sort the updates by entry date or by UII. If sorting by entry date, all updates are provided in chronological order then by UII. If sorting by UII, all updates are provided per UII in chronological order. Select **User Activity Query** from the Queries menu. The User Activity Query – Search Screen is displayed similar to Figure 5-128.

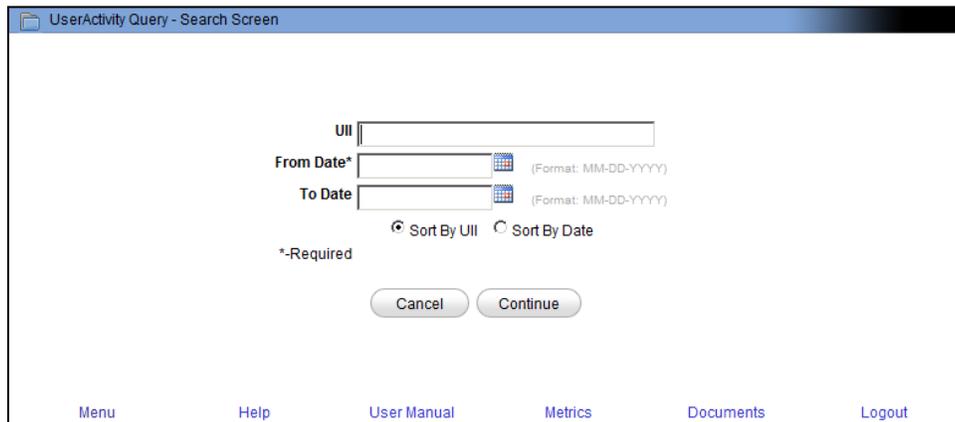

Figure 5 - 128. User Activity Query – Search Screen

Enter a From Date. UII and To Date are optional. If no To Date is provided, the To Date is the same as the From Date. Future dates cannot be used in a query except for the current date plus one. Select a **Sort By** radio button, and click on the **Continue** button. When the Continue button is clicked, the system looks up the relative information for the logged on user. The data is formatted into an Excel file, and a File Download dialog box is displayed similar to Figure 5-129.

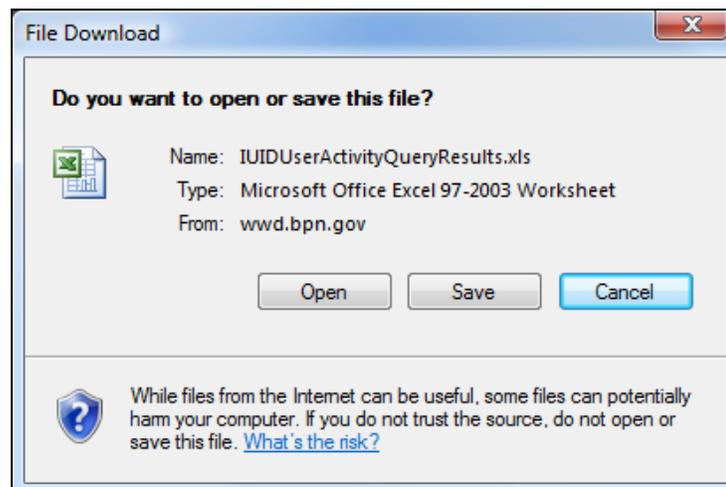

Figure 5 - 129. File Download Dialog Box

Select Open or **Save**. Save opens a Save As dialog box. Select a location to save the file, and click the Save button. When **Open** is selected, the IUID User Activity Query is opened in a Microsoft Excel spreadsheet similar to Figure 5-130.

Figure 5 - 130. IUID Registry User Activity Report

Each entry is identified as a correction, deletion, or an addition. For data areas that can only have one record, if it was a modification to an existing value via a correction, only the individual elements with corrections are listed, sorted alphabetically. If the correction was a deletion or the removal of an element's value with no replacement value, the element is provided with its value at the time of the deletion or removal. If it was an addition, the entire record for the data area is displayed.

For data areas where one or more records may be provided, if it was a modification to an existing record, each modified record is provided separately. Within each record, the elements are listed alphabetically even if it was not modified. If a record is deleted, each element is provided with its value at the time of deletion. If a record was added, the entire record is displayed.

Non UUI GFP Query

To query a list of all non-UUI GFP by one or more criteria, click on Non UUI GFP Query. The GFP Without UUI Query – Search Screen is displayed similar to Figure 5-131.

The screenshot shows a web application window titled "GFP Without UII Query - Search Screen". At the top, there is a "Search By" dropdown menu currently set to "By Contract". Below this are several text input fields: "GFP Prime Contractor *" (with an asterisk indicating it is required), "Contract Number", "Contract Order Number", "National Stock Number", "Part Number", and "Ship-To Date" (with a calendar icon and the text "(Format: MM-DD-YYYY)"). A link "View Additional Criteria" is present, followed by the note "* - Required". At the bottom of the form area are "Cancel" and "Continue" buttons. The footer of the window contains navigation links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 131. GFP Without UII Query – Search Screen

Select criteria to search by from the Search By drop-down menu. Options are By Contract or By Document. Text entry fields displayed will depend on the Search By option selected. When By Document is selected to Search by, the Search Screen is displayed similar to Figure 5-132.

The screenshot shows the same "GFP Without UII Query - Search Screen" window, but the "Search By" dropdown menu is now set to "By Document". The text input fields are: "GFP Prime Contractor", "Contract Number", "Contract Order Number", "National Stock Number †", "Part Number †", "Ship-To Date" (with a calendar icon and the text "(Format: MM-DD-YYYY)"), and "Ship-To Address". A link "View Additional Criteria" is present, followed by the note "† - One of these is required". At the bottom of the form area are "Cancel" and "Continue" buttons. The footer of the window contains navigation links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 132. Search by Document

Enter search criteria. Click **Continue**. Figure 5-133 shows a search by National Stock Number result.

Queries

Click on the **Back** button to return to the query results screen.

User Generated/Saved Queries

See [Query Results Too Long?](#) (Generate Offline Query Button) on [page 79](#) for information about the User Generated/Saved Queries.

5.3.4 Legacy User

The Legacy submitter can read all data including acquisition cost or acquisition value regardless of who entered it.

The Legacy User’s Main Menu contains the same options as the Contractor user plus an option for Reports as shown in Figure 5-136.

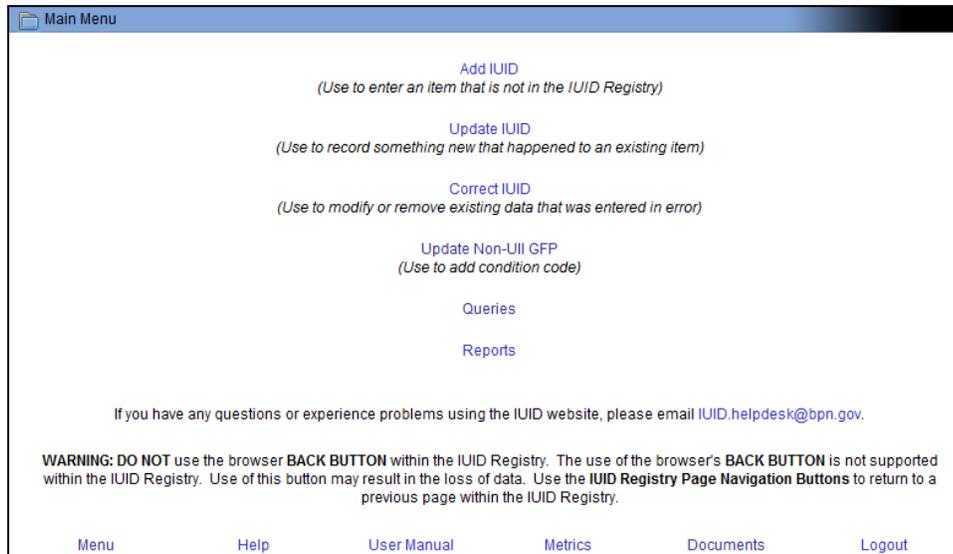

Figure 5 - 136. Main Menu – Legacy User

5.3.4.1 Add IUID—Legacy

The Legacy User’s Add IUID is different from the Contractor’s in that it contains only three options—Legacy Item (Non GFP), GFP Item, and Embedded Item as shown in Figure 5-137.

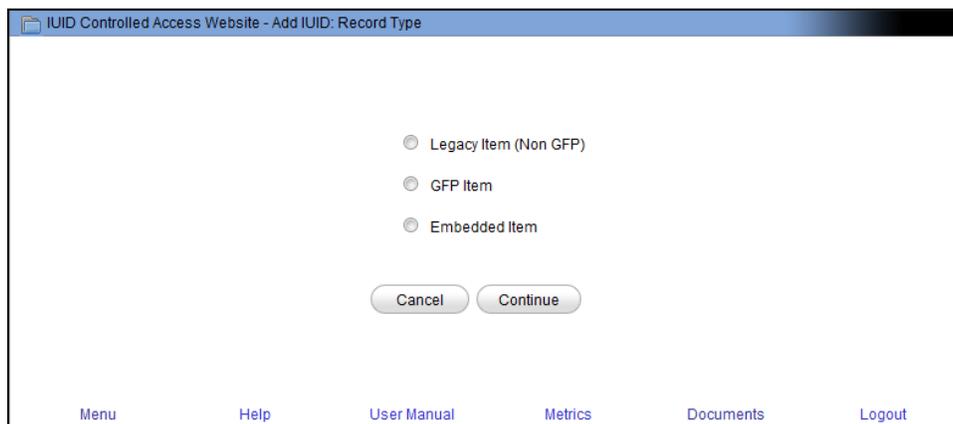

Figure 5 - 137. Legacy User Add IUID Menu

Legacy Item (Non GFP)

When **Legacy Item (Non GFP)** is selected from the Add IUID menu, an Organizational Source data entry field is displayed on the menu page as shown in Figure 5-138.

Figure 5 - 138. Organizational Source

The Organizational Source field is not a required field. If known, enter the **CAGE, DUNS or DoDAAC** of the organization that is the source of the data. Click on the **Continue** button. The Add IUID: Legacy Record – Acquisition Contract page is displayed as shown in Figure 5-139.

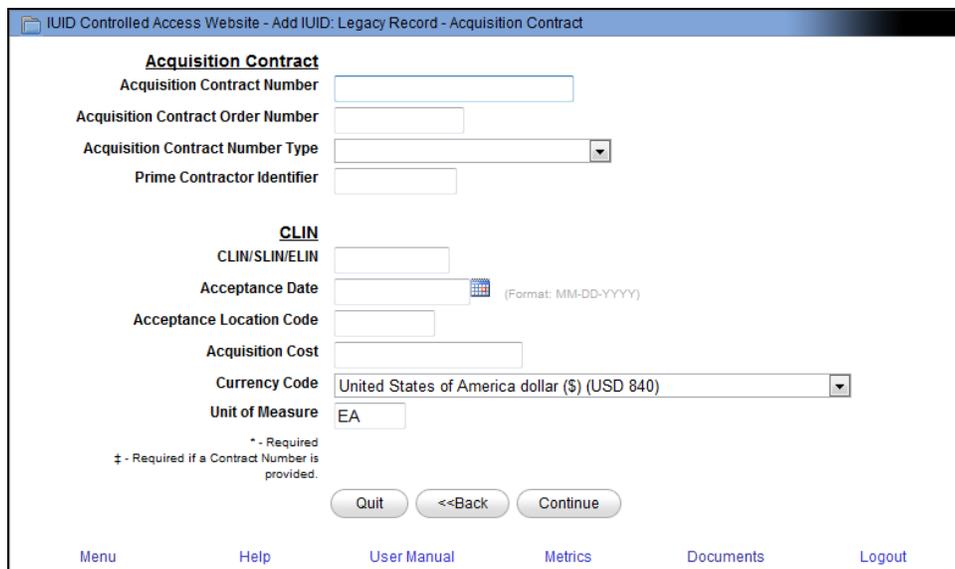

Figure 5 - 139. Add IUID: Legacy Record – Acquisition Contract Page

Notice that there are no required fields on this page. However, please enter as much information as possible for the legacy item as doing so helps with the item's life later. When satisfied with entries, click the **Continue** button. The Add IUID: Legacy Record – Pedigree page is displayed as shown in Figure 5-140.

The screenshot shows a web browser window titled "IUID Controlled Access Website - Add IUID: Legacy Record - Pedigree". The form contains the following fields and controls:

- IUID** section:
 - Uii Type * (dropdown menu)
 - Issuing Agency Code (dropdown menu)
 - Enterprise Identifier (text input)
 - Original Part Number (text input)
 - Current Part Number (text input)
 - Current Part Number Effective Date (text input with a calendar icon and "(Format: MM-DD-YYYY)" label)
 - Serial Number (text input)
 - Batch/Lot (text input)
- Uii **** section:
 - Uii ** (text input)
 - Ship-to Location Code (text input)
 - Manufacturer Code (dropdown menu)
 - Manufacturer ID (text input)
 - Warranty Indicator (dropdown menu)
 - Description * (text area)

At the bottom of the form, there are three buttons: "Quit", "<<Back", and "Continue". Below the buttons, there are footnotes:

- * - Required
- † - At least one is required
- ** - GRAI and GIAI are mixed case. Uii with other types must be upper case.

The footer of the page contains links: "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 140. Add IUID: Legacy Record – Pedigree Page

Enter IUID data. Uii Type, Uii, and Description are required. Issuing Agency Code, Enterprise Identifier, Original Part Number, Serial Number, and Batch/Lot may be required depending on which Uii Type is selected; however, if either Issuing Agency Code or Enterprise ID is provided, then both are required. In addition, if a current part number is entered when adding an item, the original part number is then required.

Similar to Add New Acquisition, when **UID1** is selected for the Uii Type as the above data is entered, IUID builds a suggested Uii Code based on Issuing Agency Code plus Enterprise Identifier plus Serial Number. This suggestion is displayed after the Serial Number is entered as shown in [Figure 5-26](#). To accept a suggested Uii value, click on it. The code is entered in the Uii field. If the individual values are changed after a Uii is selected, the Uii value may change and need to be selected again.

Another Uii value option occurs when **UID2** is selected for the Uii Type. In this case the Uii is built similar to UID1 plus another is built and suggested using the Issuing Agency Code plus Enterprise Identifier plus Batch/Lot Number plus Serial Number. Both suggestions are displayed as shown in [Figure 5-27](#). Click on the desired Uii to enter it into the Uii field.

Click on the **Continue** button. See [Appendix B](#) for field explanations. The next page displayed is the Marks page as shown in Figure 5-141.

Figure 5 - 143. Compiled Add IUID: Legacy Page

Review data. Use the Update, Add, and Delete links to change any of the information shown. Select the **Update** link next to IUID to display the Add IUID: Legacy Record – Pedigree Page, [Figure 5-140](#). The [Add link](#) next to Marks is explained in the Add New Acquisition section. The Add Marks page is shown in [Figure 5-141](#). To remove a Mark, click on the **Delete** link next to the Mark information. The Mark information is removed from the Add IUID page. As UID Mark and

Legacy User

Physical Mark are required, another Mark will need to be added in order to finish the addition of the UII. See Mark rules on [Page 29](#).

When satisfied that data is correct and ready to submit, click on the Finish button at the bottom of the page. A message is displayed that the IUID record has been added as shown in [Figure 5-33](#).

A Final Note about Adding Items

[Type Designation, Figure 5-71](#); [Condition, Figure 5-72](#); and [Item Owner, Figure 5-67](#), are not required at the time a UII is added to IUID. This information can be added using the [Update](#) function. Note: If the UII was entered before ST/STE was required, IUID will prompt you to add it the next time you update.

GFP Item

When **GFP Item** is selected, the Add IUID: GFP Item—Acquisition Contract/CLIN Page is displayed similar to [Figure 5-40](#). Continue to process as previously described in [Section 5.3.3.1 Add IUID, GFP](#).

Embedded Item

When **Embedded Item** is selected, the [Add IUID: Embedded Item Record - Pedigree page](#) is displayed similar to [Figure 5-49](#). Continue to process as previously described in [Section 5.3.3.1 Add IUID, Embedded Item](#).

The Legacy users' [Update IUID](#), [Correct IUID](#), [Update Non-UII GFP](#), and [Queries](#) are the same as previously described for the contractor user. See [Section 5.3.3.2 for Update IUID](#), [Section 5.3.3.3 for Correct IUID](#), [Section 5.3.3.4 for Update Non-UII GFP](#), and [Section 5.3.3.5 for Queries](#).

Legacy User Correct IUID Note: A Legacy user may correct any UIIs that were entered by a user that is related to the same organization; that is, the users signed up for one or more of the same DoDAACs in BRS.

5.3.4.2 Reports

By design, the GFP Reports will only work if the contract is for an end item (not an embedded item) containing a part number with a value on it. Select the **Reports** option on the Main Menu to display the IUID Reports page as shown in [Figure 5-144](#).

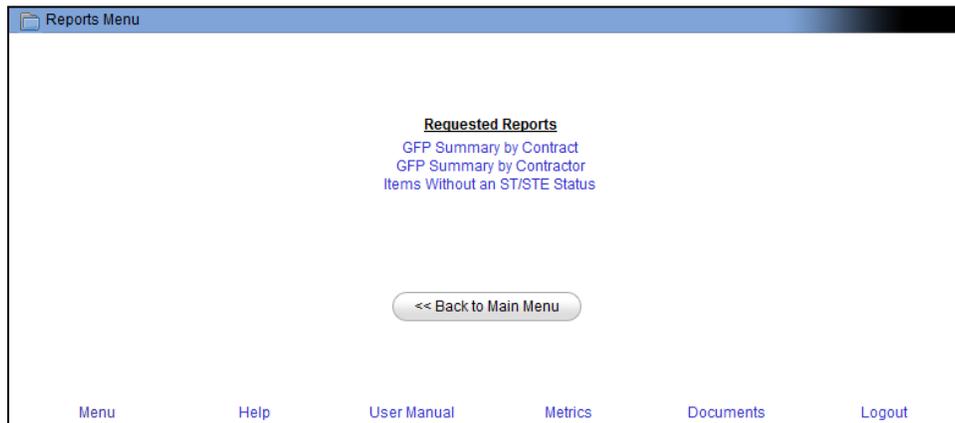

Figure 5 - 144. Legacy User Reports Menu

The IUID Registry GFP Summary produces reports that can be requested. The ability to run a report is determined by the user's level and type of access. Also, if a user is allowed to run a report, the data appearing on the report is determined by the user's access. Possible reports include GFP Summary by Contract, GFP Summary by Contractor, and Items Without an ST/STE Status.

Requested Reports: GFP Summary by Contract

When **GFP Summary by Contract** is selected from the Reports page, the GFP Summary by Contract Report Search screen is displayed as shown in Figure 5-145.

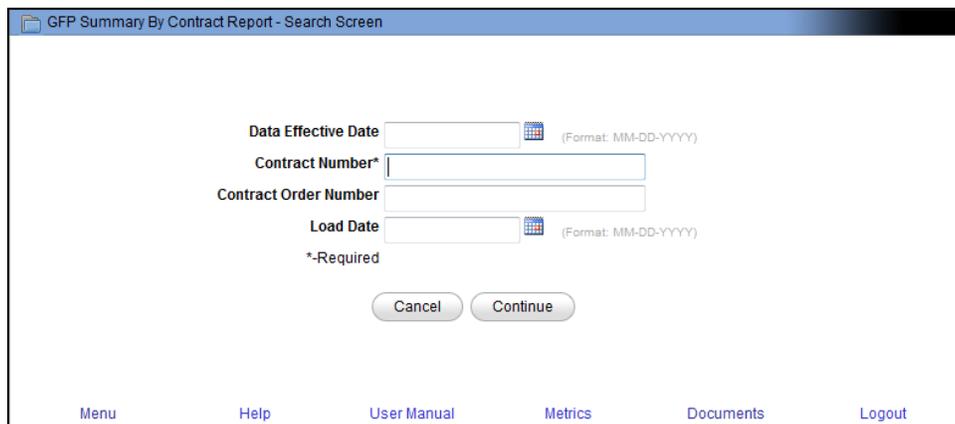

Figure 5 - 145. GFP Summary By Contract Report Search Screen

Enter the Contract Number. The Data Effective Date, Contract Order Number, and the Load Date are optional. The "Data Effective Date" is the date to show all the data that was effective on a particular date. The "Load Date" is the date the data was entered. Click the **Continue** button. If the

Contract Number is found, the GFP Summary By Contract Report is displayed as shown in Figure 5-146.

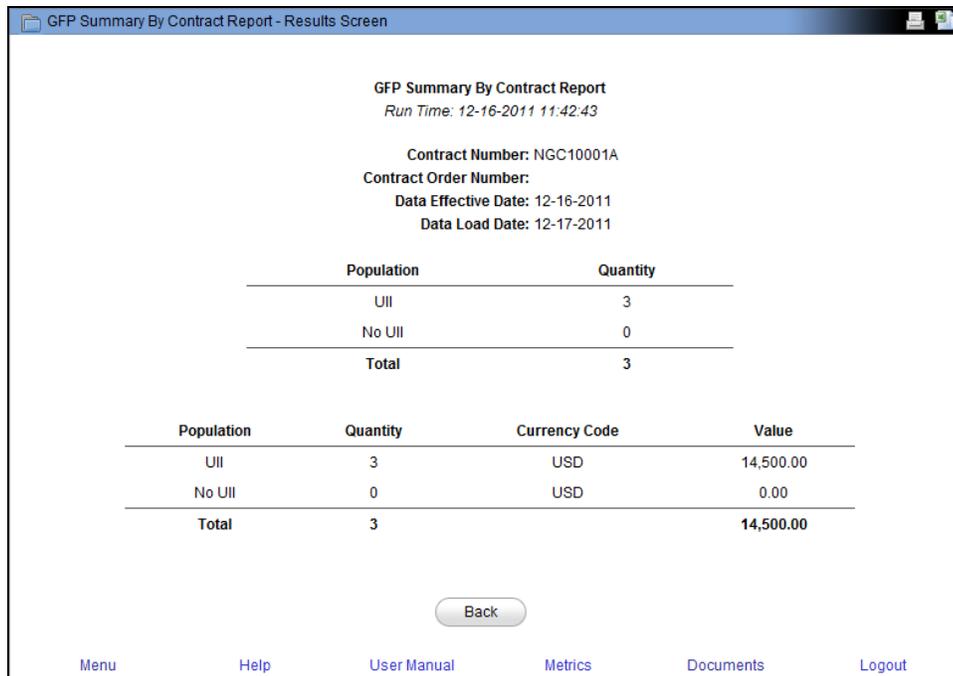

Figure 5 - 146. GFP Summary By Contract Report

The GFP Summary by Contract Report shows the total number of items and their total value by category. Only those items that are actively GFP on the entered date appear on the report. If no date is provided, the current date is used. The report provides a total for the number of items and their values. The report shows the selection criteria as well as the date and time the report was run.

If none is found, a message is displayed as shown in Figure 5-147.

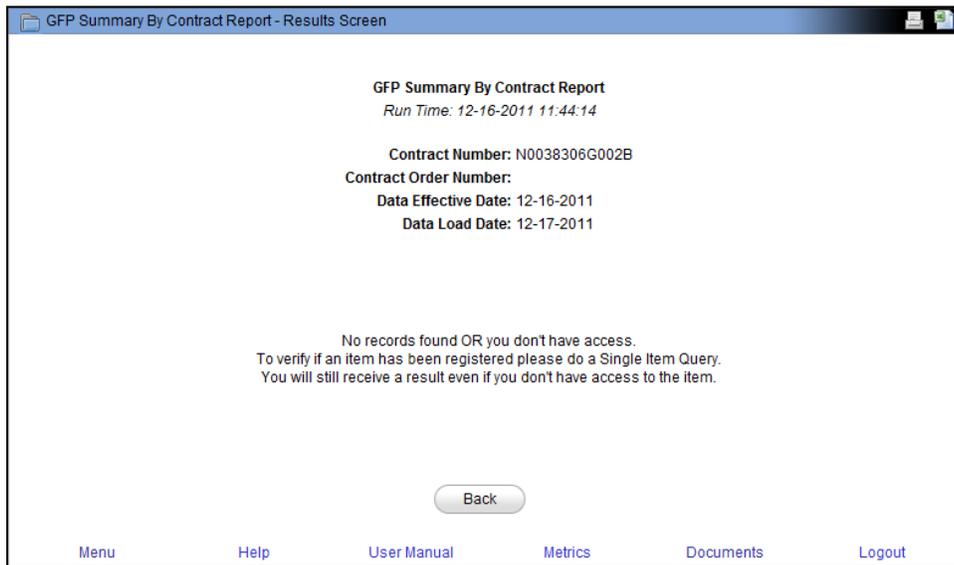

Figure 5 - 147. GFP Summary Report – No Records Found

If no record is displayed, you may not have access to the record. To verify that an item has been registered, perform a Single Item Query. You will still receive a result even if you don't have access to the item.

Click on the **Back** button to return to the Reports Menu screen.

Requested Reports: GFP Summary by Contractor

When GFP Summary by Contractor is selected from the Reports page, the GFP Summary by Contractor Report page is displayed as shown in Figure 5-148.

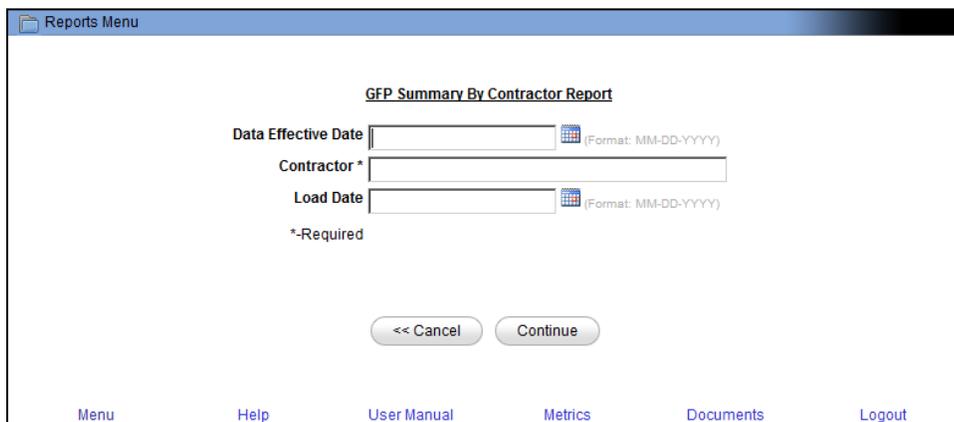

Figure 5 - 148. GFP Summary By Contractor Report

Legacy User

Enter the Effective Date and Contractor Identifier—for example a DUNS Number or CAGE Code. The “Effective Date” is the date to show all the data that was effective on a particular date. The “Load” date is the date the data was entered. Click **Continue**. The GFP Summary By Contractor Report is displayed as shown in Figure 5-149.

GFP Summary By Contractor Report
Run Time: 12-16-2011 11:45:33

Contractor: 000000000

Data Load Date: 12-17-2011

Population	Quantity
UII	12
No UII	0
Total	12

Population	Quantity	Currency Code	Value
UII	12	USD	151,439.36
No UII	0	USD	0.00
Total	12		151,439.36

Back

Menu Help User Manual Metrics Documents Logout

Figure 5 - 149. GFP Summary By Contractor Report

For an entered GFP Prime Contractor and date, the IUID Registry produces a report that shows the total number of items and their total value by population then by quantity. Only those items that are actively GFP on the entered date under the entered GFP Prime Contractor appear on the report. If no date is provided, the current date is used. The report provides a total for the number of items and their values. The report shows the selection criteria as well as the date the report was run.

A contractor may access GFPs without UIIs where their CAGE, DUNS, and DoDAAC matches the GFP Prime Contractor Identifier of the custody contract associated with the GFP. For updates, they may access only when adding a UII or a condition code to a non-UIIed GFP item.

Note: If no records are found, a message is displayed similar to [Figure 5-147](#).

Requested Reports: Items Without an ST/STE Status

To request a report of all items without a Special Tooling or Test Equipment Status, click on the **Items Without an ST/STE Status** link on the Reports Menu page. The Previously Embedded Items Without a Required ST/STE Status form is displayed as shown in Figure 5-150.

The screenshot shows a web application window titled "Previously Embedded Items Without a Required ST/STE Status". It contains three main sections for selection:

- DoD Entities:** A list box containing "AIR FORCE", "AMERICAN FORCES INFORMATION SERVICES (AFIS)", "ARMY", and "COUNTERINTELLIGENCE FIELD ACTIVITY (CIFA)". Below it is a checkbox labeled "Select All DoD Entities".
- DoD Status:** A list box containing "ACTIVE", "GUARD", and "RESERVE". Below it is a checkbox labeled "Select All DoD Status".
- Federal Entities:** A list box containing "ADMINISTRATIVE CONFERENCE OF THE U. S.", "AGENCY FOR INTERNATIONAL DEVELOPMENT", "AMERICAN BATTLE MONUMENTS COMMISSION", and "ARMED FORCES RETIREMENT HOME". Below it is a checkbox labeled "Select All Federal Entities".

At the bottom of the form are two buttons: "<< Cancel" and "Continue". A navigation bar at the very bottom includes links for "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 150. Items Without an ST/STE Status Selection Form

Select the desired elements of the report by selecting one or multiple DoD Entities, DoD Status, or Federal Entities. Use the check boxes to select all of each category. Selecting “Select All...” for each element, an ST/STE Report Results page is displayed similar to Figure 5-151.

The screenshot shows a web application window titled "ST/STE Report Results". At the top, it displays the following text:

NOT SPECIAL TOOLING OR TEST EQUIPMENT
Items removed from Parent marked as ST/STE
Run Date: 2-3-2011 10:13:07 AM

Item Owner	UII
ARMY (ACTIVE)	1CST7XX015GOOD212345JLD D05QX1DMD2050082398732
ARMY	1CST7XX015GOOD212345JLC
FEDERAL COMMUNICATIONS COMMISSION	LD123412ASDLJASDFLKJQWER907QWE-R0970010110101011
NOT DESIGNATED	UN0000000051234563 UN0000000051234564 UN0000000051234567

At the bottom of the report is a button labeled "<< Back". A navigation bar at the very bottom includes links for "Menu", "Help", "User Manual", "Metrics", "Documents", and "Logout".

Figure 5 - 151. ST/STE Report Results

Item Owners and UII for the items are listed on the report results page. Use the **Back** button to return to the report selection page.

5.3.5 DCMA User

When a DCMA user logs on to IUID, the DCMA Main Menu is displayed as shown in Figure 5-152.

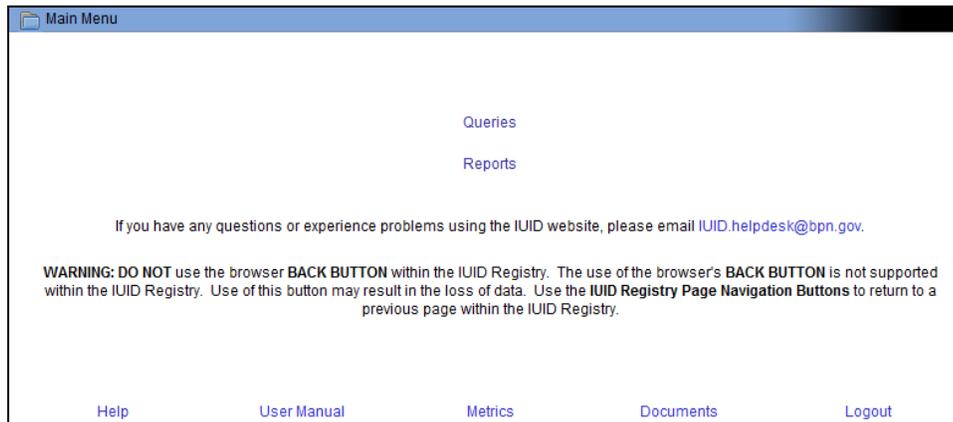

Figure 5 - 152. DCMA User Main Menu

DCMA users have two options on the menu: Queries and Reports.

Queries

Select the **Queries** option to display the IUID Queries Menu page as shown in [Figure 5-93](#). See [Section 5.3.3.5, Queries](#), for more information about queries.

Reports

Select the **Reports** option to display the IUID Reports Menu page as shown in [Figure 5-144](#). See [Section 5.3.4.2, Reports](#), for more information about reports.

Inquiry User

5.3.6 Inquiry User

When a Controlled Access Inquiry user logs in to IUID, the IUID Main Menu page is displayed as shown in Figure 5-153.

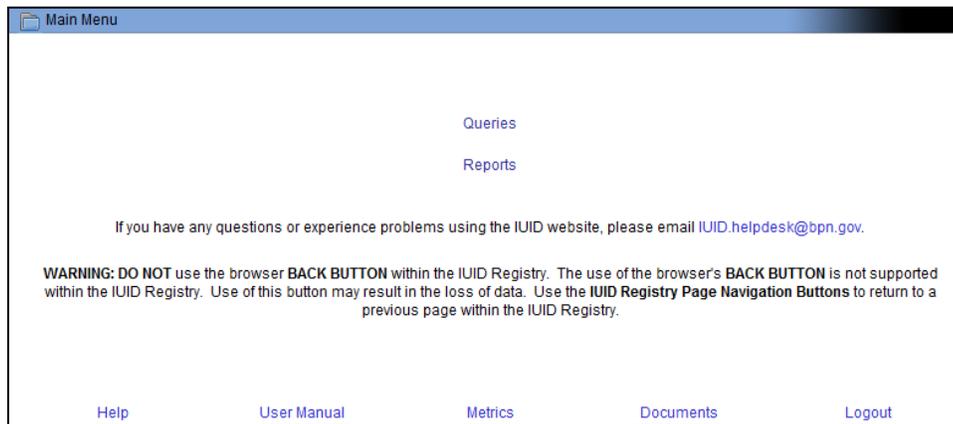

Figure 5 - 153. Inquiry User Main Menu Page

The Inquiry user has two options on the menu: Queries and Reports.

Queries

Select the **Queries** option to display the IUID Queries Menu page as shown in [Figure 5-93](#). See [Section 5.3.3.5, Queries](#), for more information about queries.

Reports

Select the **Reports** option to display the IUID Reports Menu page as shown in [Figure 5-144](#). See [Section 5.3.4.2, Reports](#), for more information about reports.

5.3.7 Application Program Interface (API)

The IUID Application Program Interface (API) is a set of Web services provided for building software applications that interface with the IUID registry. There is no authentication required to use these Web services.

There are multiple Web-service Application Program Interfaces (APIs) developed that can be used to query the IUID Registry:

- UII Verification – This API takes in one or more UII and checks to see if each is currently in the IUID Registry.

API

- Element Retrieval – This API returns the Enterprise Identifier, Serial Number, Part Number and Batch/Lot Number from an item's pedigree for each UII provided.
- UII Retrieval – In this API, the matching UII is returned - if found - for each set of pedigree data provided. A set of pedigree data requires the Enterprise Identifier and Serial Number and may include the Part Number and/or Batch/Lot Number.
- UII Validation – This API is used to validate the UII construction from its parts and to determine whether or not a UII resides in the Registry. One or more UIIs may be provided in a single query.
- UII Retrieval from Marks – This API allows receipt by the IUID Registry of one or more queries each comprised of one or more groups of Mark Contents and Mark Value. One of the groups has a Mark Content value from the following list:
 - HULL NUMBER
 - INTERNAL ASSET NUMBER
 - PROPERTY CONTROL NUMBER
 - SERIAL NUMBER
 - TAIL NUMBER
 - USA NUMBER
 - USAF NUMBER
 - USN NUMBER

The API checks against active marks only. For each query, the API responds with one or more UIIs matching the mark criteria or “none” if there is no match. Each query shall be identified in the response by returning the query values followed by that particular query’s results.

- Warranty API – This API allows retrieval of UII warranty information including Warranty Indicators and their associated Warranty Indicator Date, Award Instrument (Contract), and Warranty Event. One or more UIIs may be provided in a single query.

The API Software Users Manual at http://www.bpn.gov/iuidapi2/IUID_Reg_API_Guide_SUM.doc provides guidance and examples for these web services.

General Purpose API

Beyond these web services, there is also an additional web service available to contractors and government personnel that requires logon credentials to be passed in. The General Purpose API allows an authorized user to pass in a UII value and receive back up to all information for that UII. For more information, please refer to the General Purpose API User Guide located at http://www.bpn.gov/iuidapi2/IUID_Reg_General_Purpose_API_Guide_SUM.doc.

Procurement API

Another API available to government personnel that requires log on credentials to be passed in is the Procurement API. This allows users to enter in DoDAACs and retrieve all contracts associated with those DoDAACs. For more information, please refer to the Procurement API User Guide located at http://www.bpn.gov/iuidapi2/IUID_Reg_Procurement_API_Guide_SUM.doc.

5.4 Related Processing

None.

5.5 User Data Backup

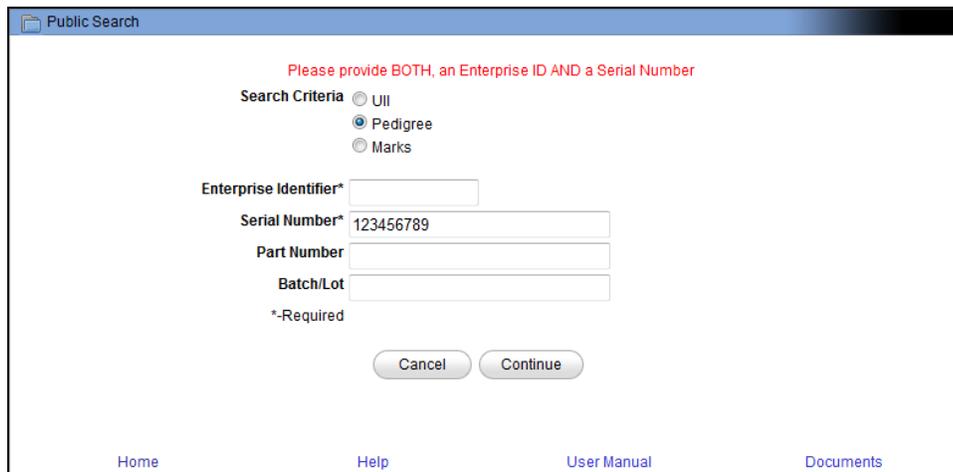

User Data backup is not applicable to the end user since the database tables do not reside on the user's workstation.

5.6 Recovery from Errors, Malfunctions, and Emergencies

If the user's workstation or software used to access IUID experiences an error or malfunction, consult the applicable customer service or documentation. In general if an issue occurs, try closing the browser and reopening it. If problems persist, try shutting down your computer and restarting it.

5.7 Error Messages

Error messages are displayed on the IUID pages when the page cannot be processed. The action to take is self-explanatory and depends on what the error is. Figure 5-154 is an example of how error messages are displayed.

In Figure 5-154 the search cannot be completed because the Enterprise ID and Serial Number are both required when one is provided. To complete the search, add the Enterprise Identifier along with the Serial Number.

5.8 Known Issues

There are no known issues with the 5.1 release of the IUID Registry.

6. Notes

See [Appendix A](#) for acronyms and definitions and [Appendix B](#) for data field explanations. [Appendix C](#) contains an index of terms.

Appendix B

IUID and Acquisition Contract Sections															
Field	Explanation														
Acquisition Contract Number	<p>The number referring to the agreement between the government and an enterprise under which the items were procured.</p> <p>All punctuation and spaces are removed before loading into IUID Registry. After all punctuation and spaces are removed, must meet all of the following conditions:</p> <ul style="list-style-type: none"> • Up to 25 alphanumeric characters • Cannot contain the letters “I” and “O” • Position 7-8 must be numeric • Position 9 must be alpha 														
Acquisition Contract Order Number	<p>Must be alphanumeric. Cannot contain the letters “I” and “O”. Position 1 cannot contain the letters “A” and “P”.</p> <p>If provided, <ContractNumber> must be provided.</p>														
Acquisition Contract Number Type	<p>Refers to the type of contract agreement between the government and the enterprise under which the items were procured. Select one from the drop-down menu:</p> <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">Cooperative Agreement</td> <td style="width: 50%;">Intragovernmental</td> </tr> <tr> <td>DoD Contract (Far)</td> <td>No Contract Provided</td> </tr> <tr> <td>DoD Contract (Non-Far)</td> <td>Non-DoD Contract (Far)</td> </tr> <tr> <td>Grant</td> <td>Non-DoD Contract (Non-Far)</td> </tr> <tr> <td>Intergovernmental Federal</td> <td>Other Agreement</td> </tr> <tr> <td>Intergovernmental Non-Federal</td> <td>Purchase Card</td> </tr> <tr> <td>International Agreement</td> <td></td> </tr> </table>	Cooperative Agreement	Intragovernmental	DoD Contract (Far)	No Contract Provided	DoD Contract (Non-Far)	Non-DoD Contract (Far)	Grant	Non-DoD Contract (Non-Far)	Intergovernmental Federal	Other Agreement	Intergovernmental Non-Federal	Purchase Card	International Agreement	
Cooperative Agreement	Intragovernmental														
DoD Contract (Far)	No Contract Provided														
DoD Contract (Non-Far)	Non-DoD Contract (Far)														
Grant	Non-DoD Contract (Non-Far)														
Intergovernmental Federal	Other Agreement														
Intergovernmental Non-Federal	Purchase Card														
International Agreement															
Prime Contractor Identifier	<p>Identifies the agency that holds the contract for the UII; this can be a DUNS No. or a CAGE Code. Must meet one of the following conditions and validate against CCR:</p> <ul style="list-style-type: none"> • Must be 5 digits and alphanumeric • Must be 9 digits and numeric 														
CLIN/SLIN/ELIN	<p>Contract Line Item Number/ Standard Line Item Number/ Equipment Line Item Number for the UII, must be alphanumeric, and cannot contain the letters “I” and “O”. May be entered as entirely alpha, entirely numeric, or alphanumeric</p>														
Acceptance Date	<p>The date the UII item was accepted by the ship-to code location</p>														
Acceptance Location Code	<p>A valid six-character DoDAAC--must be valid per the DAASC Inquiry system</p>														
Acquisition Cost	<p>Applies to a contract, the Cost associated with an item at the time of acquisition. A floating decimal format, up to 18 characters. Enter cost per unit of measure. This is a numeric value without the currency symbol. Decimal place should be appropriate for selected currency. For example "5001.25" means "\$5,001.25 per each" when United States of America Dollar is selected for currency code, and each is the unit of measure.</p> <p>Note: If a Custody record is provided, the item is considered GFP and Acquisition Cost must be provided.</p>														
Acquisition Value	<p>The cost incurred by the DoD when there is a Rollover, the value added to an item when it is updated. Provide only when Current Part Number is provided.</p>														

IUID and Acquisition Contract Sections																	
Field	Explanation																
Currency Code	Currency Code is required when you enter either Acquisition Value or Acquisition Cost. When provided, value must be from the International Standard Organization (ISO) 4217 standard. Select from drop-down menu.																
Unit of Measure	Must be from the ANSI ASC X12 Data Element Dictionary, Data Element 355. Default value is EA.																
UUI Type	Designator to indicate which method has been used to uniquely identify the item. Possible values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th style="text-align: left;">UUI Type</th> <th style="text-align: left;">Explanation</th> </tr> </thead> <tbody> <tr> <td>UID1</td> <td>UID Construct 1</td> </tr> <tr> <td>UID2</td> <td>UID Construct 2</td> </tr> <tr> <td>VIN</td> <td>Vehicle Identification Number</td> </tr> <tr> <td>GRAI</td> <td>Global Returnable Asset Identifier</td> </tr> <tr> <td>GIAI</td> <td>Global Individual Asset Identifier</td> </tr> <tr> <td>ESN</td> <td>Electronic Serial Number</td> </tr> </tbody> </table>	UUI Type	Explanation	UID1	UID Construct 1	UID2	UID Construct 2	VIN	Vehicle Identification Number	GRAI	Global Returnable Asset Identifier	GIAI	Global Individual Asset Identifier	ESN	Electronic Serial Number		
UUI Type	Explanation																
UID1	UID Construct 1																
UID2	UID Construct 2																
VIN	Vehicle Identification Number																
GRAI	Global Returnable Asset Identifier																
GIAI	Global Individual Asset Identifier																
ESN	Electronic Serial Number																
Issuing Agency Code	Designator to indicate which code is used in the Enterprise Identifier. The Issuing Agency Code is required if an Enterprise Identifier is entered. Possible values are: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th style="text-align: left;">Issuing Agency Code</th> <th style="text-align: left;">Explanation</th> </tr> </thead> <tbody> <tr> <td>UN</td> <td>DUNS</td> </tr> <tr> <td>RH</td> <td>Health Industry Business Communications Council</td> </tr> <tr> <td>LH</td> <td>EHIBCC</td> </tr> <tr> <td>LD</td> <td>DoDAAC</td> </tr> <tr> <td>LB</td> <td>ANSI T1.220</td> </tr> <tr> <td>D</td> <td>CAGE</td> </tr> <tr> <td>0, 1, 2, 3, 4, 5, 6, 7, 8, or 9</td> <td>EAN.UCC Company Prefix</td> </tr> </tbody> </table>	Issuing Agency Code	Explanation	UN	DUNS	RH	Health Industry Business Communications Council	LH	EHIBCC	LD	DoDAAC	LB	ANSI T1.220	D	CAGE	0, 1, 2, 3, 4, 5, 6, 7, 8, or 9	EAN.UCC Company Prefix

LH	EHIBCC																
LD	DoDAAC																
LB	ANSI T1.220																
D	CAGE																
0, 1, 2, 3, 4, 5, 6, 7, 8, or 9	EAN.UCC Company Prefix																
Enterprise Identifier	Identifies the enterprise that assigned the item with the UUI data elements. If UUI Type is UID1 or UID2, this is the same enterprise identifier that was used in the construct. The Enterprise Identifier is required if an Issuing Agency Code is entered. <ul style="list-style-type: none"> • If Issuing Agency Code = “D”, must be 5 digits and alphanumeric. Validate against CCR. • If Issuing Agency Code = “LD”, must be 6 digits and alphanumeric. • If Issuing Agency Code = “UN”, must be 9 digits and numeric. 																
Original Part Number	The enterprise assigned part number corresponding to the assigned UUI. The Batch/Lot or Original Part Number is required if UID Type is UID2 and the part number was used within the UUI. Also, if a current part number is entered when adding a new item, the original part number is then required.																

Appendix B

IUID and Acquisition Contract Sections															
Field	Explanation														
Current Part Number	<p>Used only if the item's current part number is different from the Original Part Number. When a UII is first created, the part number entered is considered the "original part number". If a current part number is entered when adding a new item, the original part number is then required.</p> <p>During any subsequent updates to the record, any new part number that is entered is considered "current". It must be provided if the Current Part Number Effective Date is provided.</p> <p>Note: If the same values for Current Acquisition Value, Current Foreign Currency Code, Current Part Number, and Current Part Number Effective Date are found in a stored part number change for the UII, then it is a duplicate and should be rejected.</p>														
Current Part Number Effective Date	<p>The date the item was modified or changed to the current part number from a previous part number. Must be provided if Current Part Number is provided. Select a date from the calendar or enter by typing in the proper format, MM-DD-YYYY.</p> <p>Note: If there exists a Life cycle event where Event = "Consumed", "Destroyed-Accident", "Destroyed-Combat", "Expende-Normal Use", "Expende-Experimental/Target", "Lost", "Scrapped", or "Stolen", then Current Part Number Effective Date must be before the Event Date.</p>														
Serial Number	<p>The enterprise assigned serial number corresponding to the assigned UII. The serial number may be within the enterprise or within the original part number. Serial Number is required if UID Type is UID1 or UID2.</p>														
Batch/Lot	<p>Batch/Lot is required if UID Type is UID2 and the Batch/Lot was used within the UII. It is also required if the Original Part Number is not used.</p>														
UII	<p>The code that uniquely identifies the item in the IUID system. This code is case sensitive.</p>														
Ship-to Location Code	<p>Must be a valid DoDAAC-- must be valid per the DAASC Inquiry system</p>														
Manufacturer Code	<p>The designator to indicate which code was used in the Manufacturer Identifier. It is required if Manufacturer Identifier is provided. Possible values are:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Manufacturer Code</th> <th style="text-align: left;">Explanation</th> </tr> </thead> <tbody> <tr> <td>UN</td> <td>DUNS</td> </tr> <tr> <td>LH</td> <td>EHIBCC</td> </tr> <tr> <td>LD</td> <td>DoDAAC</td> </tr> <tr> <td>LB</td> <td>ANSI T1.220</td> </tr> <tr> <td>D</td> <td>CAGE</td> </tr> <tr> <td>0, 1, 2, 3, 4, 5, 6, 7, 8 or 9</td> <td>EAN.UCC Company Prefix</td> </tr> </tbody> </table>	Manufacturer Code	Explanation	UN	DUNS	LH	EHIBCC	LD	DoDAAC	LB	ANSI T1.220	D	CAGE	0, 1, 2, 3, 4, 5, 6, 7, 8 or 9	EAN.UCC Company Prefix
Manufacturer Code	Explanation

Manufacturer ID	<p>Required if Manufacturer Code is provided. Must be different from the Enterprise Identifier.</p> <ul style="list-style-type: none"> • If Manufacturer Code = "D", must be 5 digits and alphanumeric. Validate against CCR. • If Manufacturer Code = "LD", must be 6 digits and alphanumeric. • If Manufacturer Code = "UN", must be 9 digits and numeric. 														

IUID and Acquisition Contract Sections	
Field	Explanation
Warranty Indicator	Indicates whether or not a warranty accompanies the item. When a warranty indicator is added to a record, the date entered is generated in the record history.
Description	Description of the item, no limit in number of characters
Correction Reason	Reason for Correction, required field. 1,000 character limit.

Marks Page															
Data Field	Explanation														
Contents	Select from drop-down: CONTRACT NUMBER PROPERTY CONTROL NUMBER DATE OF MANUFACTURE SERIAL NUMBER FAA CERTIFICATION SERVICE/AGENCY/COMMAND HULL NUMBER SUPPLIER NAME INTERNAL ASSET NUMBER TAIL NUMBER ITEM NOMENCLATURE TYPE DESIGNATION LOT NUMBER UID MANUFACTURER CAGE USA NUMBER MANUFACTURER NAME USAF NUMBER NATIONAL STOCK NUMBER USN NUMBER PART NUMBER, VESSEL CLASS Must be "UID" if Value contains "DEFINED"														
Medium	Must contain one of the following: ○ "2D COMPLIANT" ○ "CMB" ○ "RFID" ○ "NONCOMPLIANT ○ "PDF417" ○ "DEFINED" DATA MATRIX" ○ "HUMAN READABLE" ○ "BARCODE" ○ PROFILE If Medium Code contains "DEFINED", then Contents must be "UID".														
Value	Required unless the Contents contains "UID".														
Effective Date	Select a date this mark is effective by clicking on the calendar, or enter the date by typing in the field using the proper format, MM-DD-YYYY.														
Removal Date	The effective date from the incoming UII mark event.														
Marker Code	When provided, must be one of the following values: <table border="1"> <thead> <tr> <th>Code</th> <th>Explanation</th> </tr> </thead> <tbody> <tr> <td>UN</td> <td>DUNS</td> </tr> <tr> <td>LH</td> <td>EHIBCC</td> </tr> <tr> <td>LD</td> <td>DoDAAC</td> </tr> <tr> <td>LB</td> <td>ANSI T1.220</td> </tr> <tr> <td>D</td> <td>CAGE</td> </tr> <tr> <td>0, 1, 2, 3, 4, 5, 6, 7, 8, 9</td> <td>EAN.UCC</td> </tr> </tbody> </table>	Code	Explanation	UN	DUNS	LH	EHIBCC	LD	DoDAAC	LB	ANSI T1.220	D	CAGE	0, 1, 2, 3, 4, 5, 6, 7, 8, 9	EAN.UCC
Code	Explanation

LD	DoDAAC														
LB	ANSI T1.220														
D	CAGE														
0, 1, 2, 3, 4, 5, 6, 7, 8, 9	EAN.UCC														
Marker ID	The item that is identified in the marker code, such as DUNS No., CAGE Code, UCC, etc. <ul style="list-style-type: none"> • If Marker Code = "D", must be 5 digits and alphanumeric. Validate against CCR. • If Marker Code = "LD", must be 6 digits and alphanumeric. • If Marker Code = "UN", must be 9 digits and numeric. 														

Appendix B

Marks Page	
Data Field	Explanation
Bagged/Tagged	Select the Bagged/Tagged check box if mark is applied to a tag attached to the item instead of directly on the item via a label, data plate, or direct part mark.
Set	Select from drop down one of “Set 1”, “Set 2”, “Set 3”, “Set 4”, “Set 5”, “Set 6”, “Set 7”, “Set 8”, or “Set 9”. A set is used to indicate what markings are on one data plate or grouping. If no entry is selected, the default is Set 1.

GFP/Custody Page													
Data Field	Explanation												
Custodial Contract Number	The number referring to the agreement between the government and an enterprise under which the item is designated as GFP. If the item was associated with one contract as GFP and the association is being changed directly to another contract, this would contain the second contract's number. Remove all punctuation and spaces before loading into IUID Registry. After all punctuation and spaces are removed, must meet all of the following conditions: <ul style="list-style-type: none"> • Must be alphanumeric • Cannot contain the letters “I” or “O” • Positions 7-8 must be numeric • Position 9 must be alpha 												
Custodial Contract Order Number	Must be alphanumeric. Cannot contain the letters “I” and “O”. Position 1 cannot contain the letters “A” and “P”. If provided, <ContractNumber> must be provided.												
Custodial Contract Number Type	Refers to the type of contract agreement between the government and the enterprise under which the items were procured. Select one from the drop-down menu: <table border="0" style="width: 100%; margin-left: 20px;"> <tr> <td>Cooperative agreement</td> <td>Intragovernmental</td> </tr> <tr> <td>DoD contract (FAR)</td> <td>Micropurchase</td> </tr> <tr> <td>DoD contract (Non-FAR)</td> <td>Non-DoD Contract (FAR)</td> </tr> <tr> <td>Grant</td> <td>Non-DoD Contract (Non-FAR)</td> </tr> <tr> <td>Intergovernmental</td> <td>Other Agreement</td> </tr> <tr> <td>International Agreement</td> <td></td> </tr> </table>	Cooperative agreement	Intragovernmental	DoD contract (FAR)	Micropurchase	DoD contract (Non-FAR)	Non-DoD Contract (FAR)	Grant	Non-DoD Contract (Non-FAR)	Intergovernmental	Other Agreement	International Agreement	
Cooperative agreement	Intragovernmental												
DoD contract (FAR)	Micropurchase												
DoD contract (Non-FAR)	Non-DoD Contract (FAR)												
Grant	Non-DoD Contract (Non-FAR)												
Intergovernmental	Other Agreement												
International Agreement													
CAGE Code	Five-digit alphanumeric code identifying a government contractor. Must be in CCR. At least one of CAGE, DoDAAC, and DUNS must be reported.												
DoDAAC	Six-character Department Of Defense Activity Address Code-must be valid per the DAASC Inquiry system. At least one of CAGE, DoDAAC, and DUNS must be reported. DoDAAC is not the preferred entry for GFP/Custody.												
DUNS	The nine-digit DUNS Code of the Prime Contractor specified in the contract. At least one of CAGE, DoDAAC, and DUNS must be reported.												
Sent Date	The date the item is sent to the contractor or to the government. Cannot be later then the date the file is processed. If there exists a life cycle event where Event = “Consumed”, “Destroyed-Accident”, “Destroyed-Combat”, “Expended-Normal Use”, “Expended-Experimental/Target”, “Lost”, “Scrapped”, or “Stolen”, then Sent Date must be before the Event Date.												

Appendix B

GFP/Custody Page	
Data Field	Explanation
	If both Received Date and Sent Date are provided, Sent Date cannot be later than Received Date.
Received Date	The date the item is received by the government or by the contractor. Cannot be later than the date the file is processed. If there exists a life cycle event where Event = "Consumed", "Destroyed-Accident", "Destroyed-Combat", "Expended-Normal Use", "Expended-Experimental/Target", "Lost", "Scrapped", or "Stolen", then Received Date must be before the Event Date.
Category code	Choices are "E – Equipment" and "M – Material." <ul style="list-style-type: none"> Equipment is a tangible article of personal property that is complete in-and-of itself, durable, nonexpendable, and needed for the performance of a contract. Equipment generally has an expected service life of one year or more, and does not ordinarily lose its identity or become a component part of another article when put into use. Material is property that may be consumed or expended during the performance of a contract, component parts of a higher assembly, or items that lose their individual identity through incorporation into an end-item. Material does not include Equipment, Special Tooling, Special Test Equipment, or Unique Federal Property.
Status code	Choices are "K", Contractor Custody, and "G", government custody.

Add Rollover Page	
Field	Explanation
Rollover Type	Identifies the type of rollover. Must be one of the following: BATCH OR LOT NUMBER PART NUMBER
Rollover Value	The new value assigned to the item as identified by the Rollover Type because of the rollover event.
Current Acquisition Value	The cost of the rollover incurred by the DoD.
Current Foreign Currency Code	International Organization of Standardization code from ISO 4217 representing the currency unit of Current Acquisition Value.
Rollover Contract Number	The number of the award instrument under which the rollover occurred.
Rollover Contract Number Type	The type of award instrument. Must be one of the following: "DOD CONTRACT (FAR)" "DOD CONTRACT (NON-FAR)" "PURCHASE CARD" – Does not include use of the purchase card as a payment device "GRANT" "COOPERATIVE AGREEMENT" "OTHER AGREEMENT" - arrangements with non-Governmental entities that don't fit into any of the 5 contract types listed above "INTRAGOVERNMENTAL" - e.g. MIPR - includes organic manufacture "INTERGOVERNMENTAL FEDERAL" - i.e. bought from other Federal Department or Agency

Add Rollover Page	
Field	Explanation
	"INTERGOVERNMENTAL NON-FEDERAL" - i.e. bought from state or local government in the US "MICROPURCHASE" "NON-DOD CONTRACT (FAR)" "NON-DOD CONTRACT (NON-FAR)" "INTERNATIONAL AGREEMENT" - i.e. acquired from foreign government, or international entity such as the United Nations
Rollover Description	New description of the item that reflects the rollover.
Rollover Effective Date	The date the item incurred the rollover. <ul style="list-style-type: none"> • Rollover Effective Date must be later than the Acceptance Date or Load Date. • Cannot be later then the date the file is processed plus one day. • If item was entered as 'NEW', cannot precede the item's Acceptance Date. • If the item was entered as 'LEGACY', cannot precede the Acceptance Date if provided. • If Acceptance Date was not provided, cannot precede the load date. • If there exists a life cycle event where the event is "CONSUMED", "DESTROYED-ACCIDENT", "DESTROYED-COMBAT", "EXPENDED-NORMAL USE", "EXPENDED-EXPERIMENTAL/TARGET", "SCRAPPED", or "STOLEN", then the Rollover Effective Date must be before the Event Date. • If there exists a life cycle event where event is "ABANDONED", "DONATED", "EXCHANGED-REPAIR", "EXCHANGED-SOLD", "EXCHANGED-WARRANTY", "LEASED", "LOANED", "RETIRED", "SOLD-FOREIGN GOVT", "SOLD-HISTORIC", "SOLD-OTHER FEDERAL", or "SOLD-STATE/LOCAL", Then if there is only one Life Cycle Event, then the Rollover Effective Date must be before the Event Date. Or if there are multiple Life Cycle Events, then Rollover effective date must be between the "REINTRODUCED" event date and the subsequent (if it exists) Life Cycle Event event date <u>or</u> Rollover effective date must be before the first Life Cycle Event event date.
Rollover Warranty Indicator	Indicates whether or not a new warranty is provided with the item due to the rollover. Must be one of the following: "NO" "YES" If it is unknown if there is a warranty, do not provide the element.

Item Owner Page	
Field	Explanation
Effective Date	Cannot be later then the date the file is processed plus one day.
DoD or Federal Entity	Either <DoDEntity> or <FederalEntity> must be provided but not both.
DoD Status	Must be one of the following: "AIR FORCE" "AMERICAN FORCES INFORMATION SERVICES (AFIS)"

Item Owner Page	
Field	Explanation
	<p>"ARMY" "COUNTERINTELLIGENCE FIELD ACTIVITY (CIFA)" "DEFENSE ACQUISITION UNIVERSITY (DAU)" "DEFENSE ADVANCED RESEARCH PROJECTS AGENCY (DARPA)" "DEFENSE COMMISSARY AGENCY (DECA)" "DEFENSE CONTRACT AUDIT AGENCY (DCAA)" "DEFENSE CONTRACT MANAGEMENT AGENCY (DCMA)" "DEFENSE FINANCE AND ACCOUNTING SERVICE (DFAS)" "DEFENSE INFORMATION SYSTEMS AGENCY (DISA)" "DEFENSE LOGISTICS AGENCY (DLA)" "DEFENSE MEDIA CENTER (DMC)" "DEFENSE MICROELECTRONICS ACTIVITY (DMEA)" "DEFENSE PRISONERS OF WAR/MISSING PERSONNEL OFFICE (OSD/DPMO)" "DEFENSE SECURITY COOPERATION AGENCY (DSCA)" "DEFENSE SECURITY SERVICE (DSS)" "DEFENSE TECHNICAL INFORMATION CENTER (DTIC)" "DEFENSE THREAT REDUCTION AGENCY (DTRA)" "DEPARTMENT OF DEFENSE INSPECTOR GENERAL (DODIG)" "DEPT OF DEFENSE EDUCATION ACTIVITY (DODEA)" "MARINE CORPS" "MISSILE DEFENSE AGENCY (MDA)" "NATIONAL GEOSPATIAL-INTELLIGENCE AGENCY (NGA)" "NAVY" "PENTAGON FORCE PROTECTION AGENCY (PFPA)" "TRICARE MANAGEMENT ACTIVITY (TMA)" "U.S. SPECIAL OPERATIONS COMMAND (USSOCOM)" "U.S. TRANSPORTATION COMMAND (USTRANSCOM)" "UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES (USUHS)" UNITED STATES MILITARY ENTRANCE PROCESSING COMMAND (USMEPCOM)" "WASHINGTON HEADQUARTERS SERVICE (WHS)"</p> <p>Attribute: Must contain one of the following values: ACTIVE GUARD RESERVE</p> <p>If <DoDEntity> is not one of the following, the attribute <DoDEntityStatus> must be "ACTIVE". If another value is provided, issue an informational error and replace the incoming value with "ACTIVE":</p> <p>"AIR FORCE" "ARMY" "MARINE CORPS" "NAVY"</p> <p>If <DoDEntity> is one of the following, the attribute <DoDEntityStatus></p>

Item Owner Page	
Field	Explanation
	cannot be "GUARD": "MARINE CORPS" "NAVY"
Federal Entity	Must be one of the following: "ADMINISTRATIVE CONFERENCE OF THE U. S." "AGENCY FOR INTERNATIONAL DEVELOPMENT" "AMERICAN BATTLE MONUMENTS COMMISSION" "ARMED FORCES RETIREMENT HOME" "BOARD FOR INTERNATIONAL BROADCASTING" "BROADCASTING BOARD OF GOVERNORS" "COMMISSION ON CIVIL RIGHTS" "COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED" "COMMODITY FUTURES TRADING COMMISSION" "CONSUMER PRODUCT SAFETY COMMISSION" "CORPORATION FOR NATIONAL AND COMMUNITY SERVICE" "COURT SERVICES AND OFFENDER SUPERVISION AGENCY" "DEFENSE NUCLEAR FACILITIES SAFETY BOARD" "DEPARTMENT OF AGRICULTURE" "DEPARTMENT OF COMMERCE" "DEPARTMENT OF EDUCATION" "DEPARTMENT OF ENERGY" "DEPARTMENT OF HEALTH AND HUMAN SERVICES" "DEPARTMENT OF HOMELAND SECURITY" "DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT" "DEPARTMENT OF JUSTICE" "DEPARTMENT OF LABOR" "DEPARTMENT OF STATE" "DEPARTMENT OF THE INTERIOR" "DEPARTMENT OF THE TREASURY" "DEPARTMENT OF TRANSPORTATION" "DEPARTMENT OF VETERANS AFFAIRS" "ELECTION ASSISTANCE COMMISSION" "ENVIRONMENTAL PROTECTION AGENCY" "EQUAL EMPLOYMENT OPPORTUNITY COMMISSION" "EXECUTIVE OFFICE OF THE PRESIDENT" "FEDERAL COMMUNICATIONS COMMISSION"/> "FEDERAL ELECTION COMMISSION" "FEDERAL EMERGENCY MANAGEMENT AGENCY" "FEDERAL ENERGY REGULATORY COMMISSION" "“FEDERAL HOUSING FINANCE AGENCY”" "FEDERAL HOUSING FINANCE BOARD" "FEDERAL LABOR RELATIONS AUTHORITY" "FEDERAL MARITIME COMMISSION" "FEDERAL MEDIATION AND CONCILIATION SERVICE" "FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION"

Special Tooling or Test Equipment Page	
Field	Explanation
Effective Date	Cannot be later than the date the file is processed plus one day.

Special Tooling or Test Equipment Page	
Field	Explanation
	If item was entered as 'NEW', cannot precede the item's Acceptance Date. If the item was entered as 'LEGACY', cannot precede the Acceptance Date if provided.
Status	<p>Must be provided when <Contact/Organization> is not "WAWFRA" or "WAWFPT" and there is no <SpecialToolingOrTestEquipment> section recorded in the IUID Registry.</p> <p>Must be one of the following: "Not Special Tooling Or Test Equipment" "Special Test Equipment (STE)" "Special Tooling (SE)"</p>

Type Designation Page	
Field	Explanation
Effective Date	<p>Cannot be later than the date the file is processed plus one day.</p> <p>If item was entered as 'NEW', cannot precede the item's Acceptance Date. If the item was entered as 'LEGACY', cannot precede the Acceptance Date if provided.</p>
Type Designation Method	<p>Must be one of the following:</p> <p>"AEROSPACE ENGINES, AIRBREATHING (MIL-HDBK-1812)" "AEROSPACE ENGINES, NON-AIRBREATHING (MIL-HDBK-1812)" "AEROSPACE EQUIPMENT AND SUPPORT EQUIPMENT (MIL-HDBK-1812)" "ARMY NOMENCLATURE SYSTEM (MIL-STD-1464A)" "GROUPS AND UNITS (MIL-HDBK-1812)" "JOINT ELECTRONICS TYPE DESIGNATION SYSTEM ("A/N") (MIL-STD-196E)" "NAVAL VESSEL REGISTRATION SYSTEM (SECNAV INSTRUCTION 5030.8)" "NAVY MARK/MOD NOMENCLATURE SYSTEM (MIL-STD-1661)" "PHOTOGRAPHIC EQUIPMENT (MIL-HDBK-1812)" "U.S. MILITARY AEROSPACE VEHICLE DESIGNATION - AIRCRAFT (DOD DIRECTIVE 4120.15)" "U.S. MILITARY AEROSPACE VEHICLE DESIGNATION - MISSILES, ROCKETS, PROBES AND SATELLITES (DOD DIRECTIVE 4120.15)"</p>
Type Designation Value	<u>Text, size 1-100 characters</u>

Condition Code Page	
Field	Explanation
Effective Date	Cannot be later than the date the file is processed plus one day.
Condition Code Type	Must be one of the following: "DISPOSAL" or "SUPPLY". If two iterations are provided, one must have <ConditionCodeType> = "SUPPLY" and the other must have <ConditionCodeType> = DISPOSAL".
Condition Code	When <ConditionCodeType> = "SUPPLY", must be one of the following:

Condition Code Page	
Field	Explanation
	<ul style="list-style-type: none"> • “SERVICEABLE (ISSUABLE WITHOUT QUALIFICATION)” • “SERVICEABLE (ISSUABLE WITH QUALIFICATION)” • “SERVICEABLE (PRIORITY ISSUE)” • “SERVICEABLE (TEST/MODIFICATON)” • “UNSERVICEABLE (LIMITED RESTORATION)” • “UNSERVICEABLE (REPARABLE)” • “UNSERVICEABLE (INCOMPLETE)” • “UNSERVICEABLE (CONDEMNED)” • “SUSPENDED (IN STOCK)” • “SUSPENDED (RETURNS)” • “SUSPENDED (LITIGATION)” • “SUSPENDED (IN WORK)” • “SUSPENDED (AMMUNITION SUITABLE FOR EMERGENCY COMBAT USE ONLY)” • “UNSERVICEABLE (RECLAMATION)” • “SUSPENDED (PRODUCT QUALITY DEFICIENCY)” • “SUSPENDED (RECLAIMED ITEMS, AWAITING CONDITION DETERMINATION)” • “UNSERVICEABLE (SCRAP)” • “UNSERVICEABLE (WASTE MILITARY MUNITIONS)” <p>When <ConditionCodeType> = "DISPOSAL", must be one of the following:</p> <ul style="list-style-type: none"> • “NEW” • “USABLE” • “REPAIRABLE” • “SALVAGE” • “SCRAP”

Life Cycle Event Page	
Field	Explanation
Event	<p>Specifies the type of code used to identify a life cycle event. Possible events include:</p> <ul style="list-style-type: none"> • Abandoned • consumed • destroyed by accident • destroyed by combat • donated • exchanged – repair • exchanged – sold • exchanged – warranty • expended – experimental/target • expended – normal use • leased • loaned • lost • Reintroduced • Retired • scrapped • sold – foreign government • sold – historic • sold – nongovernment • sold – other federal • sold – state/local • stolen <p>Definitions of these events are available on the second tab of the UID Elements Structure at: http://www.acq.osd.mil/dpap/pdi/uid/attachments/IUID_elements_structure_v4_1.0.xls</p>

Appendix B

Life Cycle Event Page															
Field	Explanation														
Event Date	Date the Event happened. Cannot be later than the day the file is processed. If there already exists a life cycle event where Event = “Consumed”, “Destroyed-Accident”, “Destroyed-Combat”, “Expende-Normal Use”, “Expende-Experimental/Target”, “Lost”, “Scrapped”, Or “Stolen”, then the incoming Event Date must be before the stored Event Date.														
Recording Entity Code	Indicates what type of code was used in the Recording Entity Identifier. If provided, Recording Entity Identifier must be provided. If provided, Source Document and System UID should not be provided. Possible values are: <table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Manufacturer Code</th> <th style="text-align: left;">Explanation</th> </tr> </thead> <tbody> <tr> <td>UN</td> <td>DUNS</td> </tr> <tr> <td>LH.....</td> <td>EHIBCC</td> </tr> <tr> <td>LD.....</td> <td>DoDAAC</td> </tr> <tr> <td>LB.....</td> <td>ANSI T1.220</td> </tr> <tr> <td>D</td> <td>CAGE</td> </tr> <tr> <td>0, 1, 2, 3, 4, 5, 6, 7, 8, or 9.....</td> <td>EAN.UCC Company Prefix</td> </tr> </tbody> </table>	Manufacturer Code	Explanation	UN	DUNS	LH.....	EHIBCC	LD.....	DoDAAC	LB.....	ANSI T1.220	D	CAGE	0, 1, 2, 3, 4, 5, 6, 7, 8, or 9.....	EAN.UCC Company Prefix
Manufacturer Code	Explanation														
UN	DUNS														
LH.....	EHIBCC														
LD.....	DoDAAC														
LB.....	ANSI T1.220														
D	CAGE														
0, 1, 2, 3, 4, 5, 6, 7, 8, or 9.....	EAN.UCC Company Prefix														
Recording Entity ID	Identifies the Entity that provided the life cycle event information. If provided, Recording Entity Code must be provided. <ul style="list-style-type: none"> • If Recording Entity Code = “D”, must be 5 digits and alphanumeric. Validate against CCR. • If Recording Entity Code = “LD”, must be 6 digits and alphanumeric. • If Recording Entity Code = “UN”, must be 9 digits and numeric. 														
Source Document	The document number, case number, or other identification number that can be used as a reference to the detailed information about the life cycle event in the system identified in System UID. If provided, System UID must be provided. If provided, Recording Entity Code and Recording Entity Identifier should not be provided.														
System UID	The system that provided the life cycle event information and contains the details of the life cycle event. If provided, Source Document must also be provided. If provided, Recording Entity Code and Recording Entity Identifier should not be provided. Possible choices are LTDD, PCARSS, and DAISY.														
Life cycle event Location CAGE Code	Five-digit code identifying the government contractor location where the event took place. At least one of CAGE, DoDAAC, DUNS, or Site must be reported.														
Life cycle event Location DoDAAC/MAPAC	Six-character Department Of Defense Activity Address Code where the event took place. At least one of CAGE, DoDAAC, DUNS, or Site must be reported. Requires the use of only valid codes per the DAASC Inquiry System.														
Life cycle event Location DUNS	The nine-digit DUNS Code of the Prime Contractor specified in the contract at the location where the event took place. At least one of CAGE, DoDAAC, DUNS, or Site must be reported.														
Life cycle event Location Site City	City at the location where the event took place.														
Life cycle event Location Site State/Province	State/Province at the location where the event took place.														
Life cycle event Location Site Country	Country. Must provide if City or State or Province is provided. Value must be from International Standard Organization (ISO) 3166-1 alpha-2 standard.														
Life cycle event Location	US zip code or other country postal code.														

Appendix B

Life Cycle Event Page	
Field	Explanation
Site Postal Code	
Life cycle event Site Other	Used to denote the location when other information is insufficient. E.g. Arabian Sea.
Life cycle event Recipient CAGE	Five-digit code identifying the government contractor receiving the item. At least one of CAGE, DoDAAC, DUNS, or Organization must be reported.
Life cycle event Recipient DoDAAC/ MAPAC	Six-character Department Of Defense Activity Address Code of the contractor receiving the item. At least one of CAGE, DoDAAC, DUNS, or Organization must be reported.
Life cycle event Recipient DUNS	The nine-digit DUNS Code of the Prime Contractor receiving the item. At least one of CAGE, DoDAAC, DUNS, or Organization must be reported.
Life cycle event Recipient Organization Name	Name of organization receiving the item.
Life cycle event Recipient Organization City	City of organization receiving the item.
Life cycle event Recipient Organization State/Province	State/Province of organization receiving the item.
Life cycle event Recipient Organization Country	Country of organization receiving the item. Must provide if City or State or Province is provided. Value must be from International Standard Organization (ISO) 3166-1 alpha-2 standard. If the Life Cycle Event is SOLD-FOREIGN GOVT, then the Recipient Organization Country is a required field.
Life cycle event Recipient Organization Postal Code	US zip code or other country postal code.
Life cycle event Correction Reason	Reason for Correction, required field, 1,000 character limit.

Update Non-UUI GFP – Search Page	
Data Field	Explanation
Contract Number*	The number referring to the agreement between the government and an enterprise under which the item is designated as GFP. If the item was associated with one contract as GFP and the association is being changed directly to another contract, this would contain the second contract's number. Remove all punctuation and spaces before loading into IUID Registry. After all punctuation and spaces are removed, must meet all of the following conditions: <ul style="list-style-type: none"> • Must be alphanumeric • Cannot contain the letters “I” or “O” • Positions 7-8 must be numeric • Position 9 must be alpha
Contract Order Number	Must be alphanumeric. Cannot contain the letters “I” and “O”. Position 1 cannot contain the letters “A” and “P”.
GFP Prime Contractor	Identifies the agency that holds the contract for the UUI; this can be a DUNS No. or a CAGE Code. Must meet one of the following conditions and validate

Update Non-UII GFP – Search Page	
Data Field	Explanation
	against CCR: <ul style="list-style-type: none"> • Must be 5 digits and alphanumeric • Must be 9 digits and numeric
National Stock Number	The 13-digit number assigned to items of supply, equipment, and material for purposes of identification and inventory control
Part Number	The enterprise assigned part number corresponding to the assigned UII.
Serial Number	The enterprise assigned serial number corresponding to the assigned UII.
Ship-To Date	The date the item was shipped to the Ship-To address
Ship-To Address	Must be a valid DoDAAC-- must be valid per the DAASC Inquiry system
